Committee on Herbal Medicinal Products (HMPC)

## Call for scientific data for use in HMPC assessment work on herbal tea combinations traditionally used in the therapeutic area 'loss of appetite'

Submission period: 28 February 2017 - 31 May 2017

The HMPC invites all interested parties such as pharmaceutical industry associations, health care professional groups, learned societies, consumers and patients' associations, governmental institutions as well as EU and EEA-EFTA Member States to submit any scientific data, which may be used in the assessment of herbal tea combinations traditionally used in the therapeutic area 'loss of appetite' (historically often called '*Species amarae*') as part of the establishment of European Union herbal monographs and/or European Union list entries.

Scientific contributions should be sent in electronic format by e-mail or Eudralink to [hmpc.secretariat@ema.europa.eu](mailto:hmpc.secretariat@ema.europa.eu)

or by post to

European Medicines Agency  
30 Churchill Place  
Canary Wharf  
UK-London E14 5EU  
Att.: HMPC secretariat

If an interested party intends to send scientific contributions in response to several calls for scientific data, response should be sent separately to each call.

A list of all scientific contributions and their references should be enclosed.

The name and contact details of the interested party providing the scientific contributions is required.

**Unpublished data** may be included. However, the consent of the data owner is a necessary requirement. The owner of the data will be given the opportunity to review the assessment report to remove any confidential data. The HMPC will consider such submissions on a case-by-case basis. Submitting parties are bound to obey existing copyrights. Contributors should also take duly into account the rights of interested parties, as the documentation provided will be used for the development of European Union list entries and European Union herbal monographs. Such

development is underpinned by assessment reports, which will be made public in accordance with measures taken by the Agency to ensure an appropriate level of transparency.

As regards **copyright**, it is important to clarify that the use by the HMPC of the bibliographic material is entirely for a non-commercial purpose. As its non-commercial use by the Committee is guaranteed, any interested party will not incur in any liability as to the use intended by the HMPC by forwarding the bibliographic literature to the Committee. The HMPC is in all cases willing to confirm in writing the non-commercial use of documents sent in by interested parties.

Documents should be submitted in **English** where possible since this is the working language of the HMPC, but documents in other official languages of the European Union will be accepted. In order to facilitate the assessment, the HMPC strongly recommends the submission of an abstract in English when original references are provided.

### **Conditions for data submissions**

**Traditional use:** Submitted data should provide evidence that the medicinal product in question, or a corresponding product, has been in medicinal use throughout a period of at least 30 years preceding the date of the application, including at least 15 years within the European Union. (Details of herbal substance / herbal preparation, pharmaceutical form and posology in medicinal use should be given.)

Furthermore, the Agency encourages submission of peer-reviewed data/publications (not just the reference) as the most relevant and reliable documents. Non peer-reviewed data such as references from older standard books of phytotherapy or comparable scientific sources can be taken into consideration provided that they are of an adequate quality.
