EMA/237298/2012
Veterinary Medicines and Product Data Management

Procedural announcement by the European Medicines Agency
Revised application form for the establishment of maximum residue limits (MRLs)

The application form for the submission of MRL dossiers is included in Volume 8 of Rules Governing Veterinary Medicinal Products. Further to the publication of Regulation (EC) No 470/2009, this application form became outdated as it made reference to an inexistent legal reference (Regulation 2377/90 which was revoked by Regulation No 470/2009). Pending the revision of Volume 8, the EMA has in the meantime revised the application form to bring it in line with current legislation and is publishing it on its website. This is intended to help applicants in the preparation of their dossiers.
