Refer to section 1.1.5 and 2.1.5 for details of administrative charges applicable to worksharing procedures under the terms of Article 20 of Commission Regulation (EC) No 1234/2008.

Fee determination and payment

4. Fee determination and payment

4.1. Legal requirements

Article 10 of Council Regulation (EC) No 297/95 stipulates the dates when fees are due and when they are payable.

Fee due date

The fee due date is the date when the Agency determines the total fee amount that is due for an application or service. The applicant's or marketing authorisation holder's obligation to pay that fee starts on that date.

The fee due date corresponds to:

- The date of administrative validation of an application; or
- The date of the start of a procedure (when there is no administrative validation), e.g. for type IA variation fees, transfer fees, Article 30(1) or 31 referrals; or
- The date of the anniversary of the notification of the marketing authorisation decision, for annual fees; or
- The date of the start of an inspection, for inspection fees.

Payment of fees

The Agency's terms and conditions for payment of fees stipulate that an invoice is payable 30 days from the invoice date. That represents the deadline for the applicant to settle the payment.

In summary, the procedure shown in Figure 1 applies.

Figure 1. Procedure for fee determination and payment

Deferred fees

When the applicant is a small or medium-sized enterprise (SME) payment of the fee for a marketing authorisation (MA) application and the fee for inspections undertaken as part of the assessment of a MA application is deferred until the final decision on the MA is issued or the application is withdrawn. The invoice issued at the time the fee is due informs the applicant that the fee is deferred. A reminder is issued by the Agency as soon as there is a decision or withdrawal; the fee is payable within 45 days of the date of the notification of the final decision on the MA or of the withdrawal of the application. The procedure is summarised in Figure 2.

Figure 2. Procedure for fee determination and deferral of payment by SME

The payment of the fee for an application for a MA of a medicinal product to be used in a human pandemic situation, so-called core dossier submission, is deferred until the pandemic situation is duly recognised, either by the World Health Organisation or the European Union, or up to 5 years from the due date, whichever comes first. Nevertheless the deferral can come to an end earlier on withdrawal prior to an opinion on the MA application, or if a negative Commission Decision is issued. A reminder is issued by the Agency as soon as the deferral comes to an end and the fee is payable immediately.

4.2. Criteria for fee determination

The criteria that are taken into account by the Agency when determining the fee that is due are the ones that apply by the fee due date. These include:

- The applicant's status (e.g. valid SME status assigned by the Agency);
- The product type (e.g. advanced therapy medicinal product, designated orphan product, veterinary product for minor uses and minor species (MUMS)/limited markets);
- The product status (e.g. in the first year following grant of a MA); and
- The procedure type.

Any change to the applicable criteria after the fee due date is not taken into account and will not influence the total fee due that has been determined.

4.3. Established fee exemptions

An applicant qualifies for fee exemptions and incentives specified in Chapter 5 provided that the required criteria apply on the fee due date. Any criterion that is no longer valid on the fee due date, e.g. expired SME status, cannot be taken into consideration by the Agency.

Applicants should ensure that they meet all the required criteria at the time of submission of an application or a request for a service.

4.4. Request for ad hoc fee reduction

Applicants may request the Executive Director to grant an ad hoc fee reduction under the provisions of the first paragraph of Article 9 of Council Regulation (EC) No 297/95.

The applicant is required to provide sufficient justification to prove that the request is made (1) in exceptional circumstances and (2) for imperative reasons of public or animal health. The request will be considered by the Executive Director, who will consult the competent scientific committee and will decide each request on a case-by-case basis.

In view of the administrative procedure that has to be followed and the mandatory scientific consultation, applicants are required to make their request in a letter to the Executive Director at least

two months before the date of submission of the relevant application. The applicant should cite Article 9, paragraph 1 of Council Regulation (EC) No 297/95 and provide details of the product, procedure type and applicable fee, and the reason(s) for the request that justify exceptional circumstances and imperative reasons of public or animal health.

Applicants are advised that late requests may not be processed in time by the fee due date and may not be taken into consideration when determining the fee. Requests received after the fee due date will not be considered.

Further information on fees and fee exemptions is available on the Agency's [website](#).

Fee exemptions

5. Fee exemptions

Where an applicant could, in respect of the same fee, benefit from more than one category of fee reduction or incentive (e.g. advanced therapy medicinal product, orphan medicinal product, micro, small or medium sized enterprises) the provisions which are the most favourable to the applicant would apply. The applicant can contact the Agency prior to submission of the application for confirmation of the applicable fee.

5.1. Micro, small or medium-sized enterprise

5.1.1. Definitions

Pursuant to Article 70(2) of Regulation (EC) No 726/2004 of 31 March 2004, applicants that meet the definition of a micro, small or medium-sized enterprise are eligible for fee incentives from the Agency. Companies developing medicinal products for human and/or veterinary use can benefit from fee reductions, exemptions and/or deferrals, as applicable, under Articles 5 to 9 of Regulation (EC) No 2049/2005. Applicants must be established in the EEA and fulfil the definition of a micro, small or medium-sized enterprise as set out in Commission Recommendation 2003/361/EC of 6 May 2003.

5.1.2. Fee incentives

5.6.1. Definitions

A total exemption from the payment of the fees laid down in the fee regulation is granted for the regulatory activities specified below within the framework of the submission of a core dossier for a pandemic influenza vaccine and the follow-up submission of a pandemic variation, as described in the 'Guideline on Dossier Structure and Content for Pandemic Influenza Vaccine Marketing Authorisation Application' ([EMA/CPMP/VEG/4717/03](#)).

The following total exemptions apply until the type II pandemic variation, submitted once the human pandemic situation is duly recognised, has been authorised by the European Union but, in any case, do not apply after the five-year period from the date of administrative validation of the marketing authorisation application for the core dossier has elapsed.

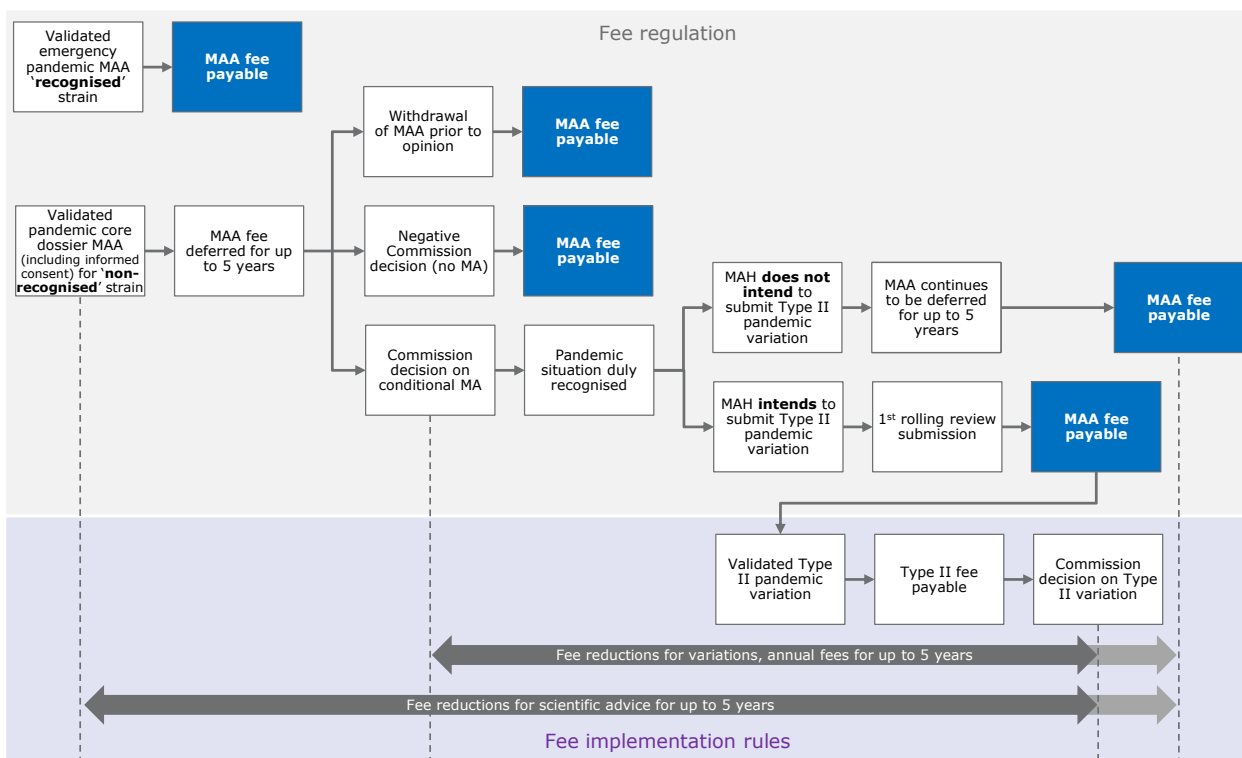

5.6.2. Fee incentives related to pandemic core dossier (including informed consent) for 'non-recognised' strain

Scientific advice	100% reduction to the total applicable fee
Post-authorisation activities including type-IA, type-IB, type-II variations (but excluding the type-II pandemic variation) and annual fee	100% reduction to the total applicable fee
Negative validation of a type-IB or type-II variation (but excluding the type-II pandemic variation)	100% reduction to the total applicable fee

- The fee for a validated pandemic core dossier marketing authorisation application (MAA), including informed consent application, for a pandemic strain that has not yet been "duly recognised, either by the World Health Organisation or by the Community" is deferred.
- If the core dossier MAA is withdrawn prior to opinion or receives a negative Commission Decision, the fee becomes payable and the deferral comes to an end.
- If the core dossier receives a positive Commission Decision, the fee shall continue to be deferred. The MAH also receives fee reductions on variations and annual fees.

- When the pandemic situation becomes duly recognised, the marketing authorisation holder (MAH) may choose not to submit a Type II pandemic variation. In this case the MAA fee continues to be deferred for up to 5 years from the MAA validation date. The MAH continues to receive fee reductions on variations and annual fees for up to 5 years from the MAA validation date.
- If the MAH chooses to submit a Type II pandemic variation, the initial MAA fee becomes payable on the first submission made as part of the rolling review. When the Type II pandemic variation is validated the applicable Type II fee becomes payable. The MAH continues to receive fee reductions on variations and annual fees until the date of the Type II Commission Decision.
- Fee reductions for scientific advice are applicable to requests in the context of a pandemic core dossier and at any time up to 5 years from the MAA validation date or the date of the Type II Commission Decision, whichever comes first.
- The fee for an emergency pandemic MAA submitted when the pandemic situation has been duly recognised becomes payable on validation.

A.1.1.6. Examples of the determination of fees for renewals of marketing authorisation

It should be noted that the number of renewal fees charged for a medicinal product depends on the number of strengths associated with each pharmaceutical form determined as shown in section A.1.1.2. The number of presentations is not taken into consideration for the calculation of the renewal fee. The examples shown below do not represent an exhaustive list.

A.1.1.7.1. Examples of the determination of fees for GMP inspections

In accordance with Annex IV to the "Rules for the implementation of Council Regulation (EC) No 297/95 on fees payable to the European Medicines Agency and other measures", applicants are liable for more than one inspection fee on the basis of the following flowchart.

The examples shown below do not represent an exhaustive list. They apply to good manufacturing practice (GMP) inspections in relation to medicines for human use and to medicines for veterinary use.

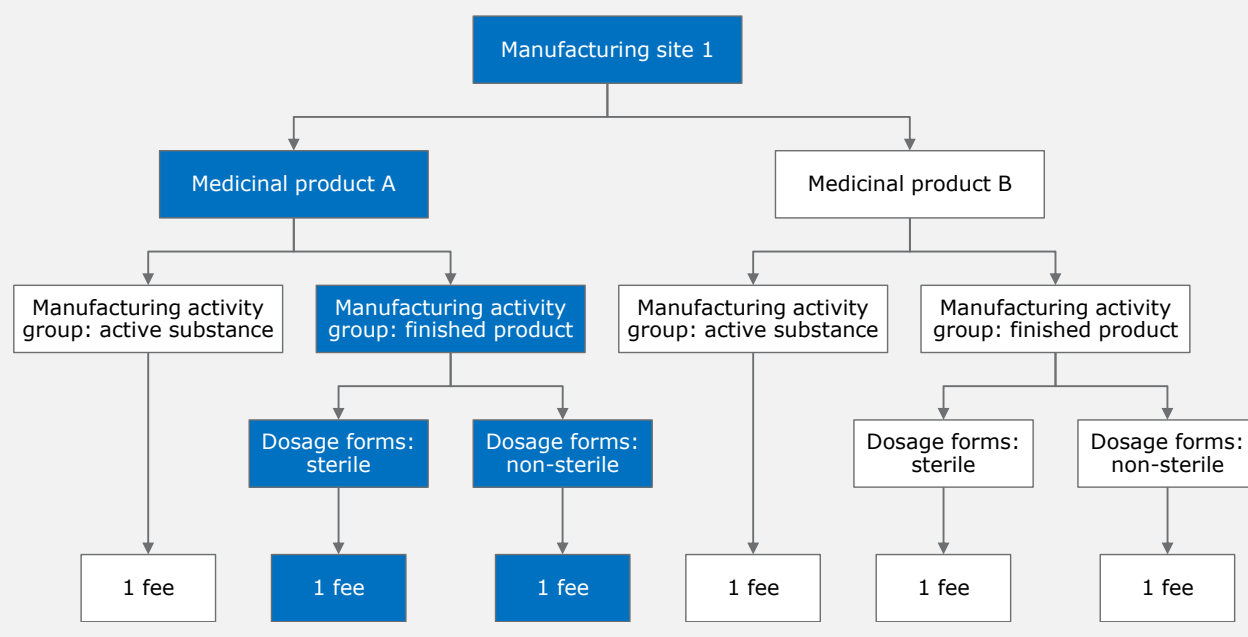

Scenario 1:

GMP inspection of manufacturing site 1 for one medicinal product A and involving two pharmaceutical forms: capsules (non-sterile) and solution for injection (sterile). The manufacturing activity for the two pharmaceutical forms is the same, i.e. manufacture of the finished product.

Fee payable: 2 basic fees (level I), i.e. 21 200 EURO + 21 200 EURO = 42 400 EURO

Rationale: there are two types of dosages forms (sterile and non-sterile) and each one attracts a basic fee (Level I).

The applicable fees to be paid are represented by the blue boxes in the flowchart below.

Scenario 2:

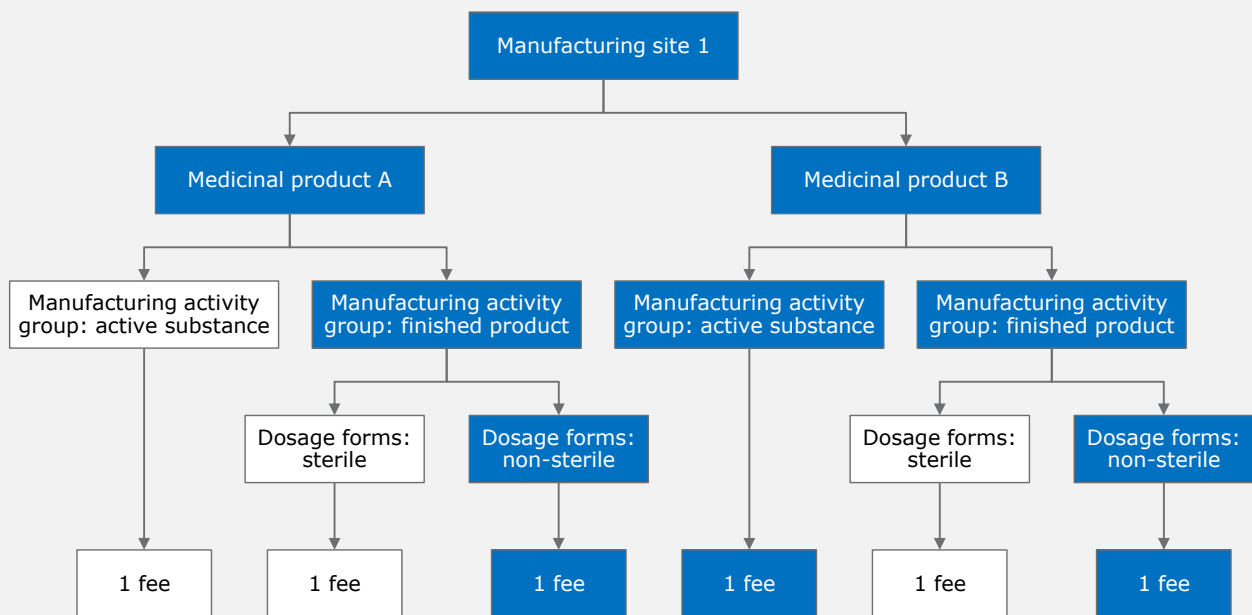

GMP inspection of manufacturing site 1 for two medicinal products (A and B). Product A involves only one pharmaceutical form (capsules) and one pharmaceutical activity (primary packaging). Product B also involves one pharmaceutical form (tablets) and four manufacturing activities (manufacture of the active substance, quality control of the active substance, manufacture of the finished product and primary packaging).

Fee payable: 3 basic fees (Level I), i.e. 21 200 EURO + 21 200 EURO + 21 200 EURO = 63 600 EURO

Rationale: Product A attracts only one fee because there is only one group of manufacturing activities (i.e. finished product) and one dosage form (non-sterile). Product B attracts two fees because there are manufacturing activities related to each group as follows:

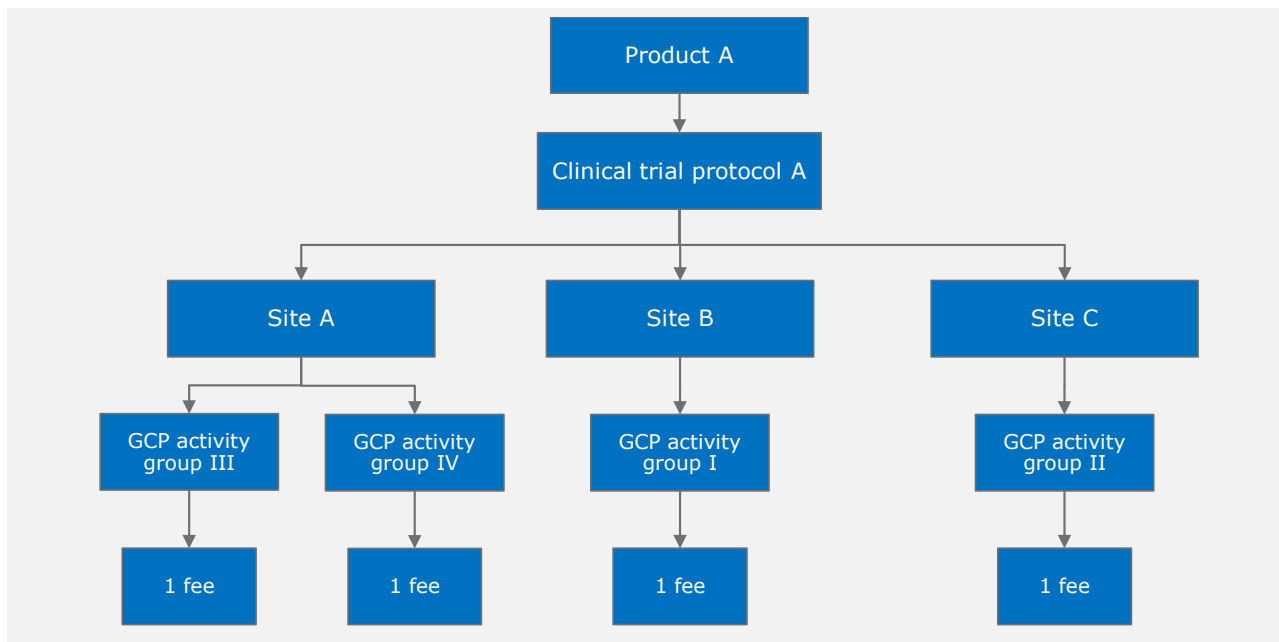

- Group Active Substance: manufacture of the active substance and quality control of the active substance
- Group Finished Product: manufacture of the finished product and Primary Packaging

The applicable fees to be paid are represented by the blue boxes in the flowchart below.

A.1.1.7.2. Examples of the determination of fees for GCP inspections

In accordance with Annex IV to the "Rules for the implementation of Council Regulation (EC) No 297/95 on fees payable to the European Medicines Agency and other measures", applicants are liable for more than one inspection fee on the basis of the following flowchart.

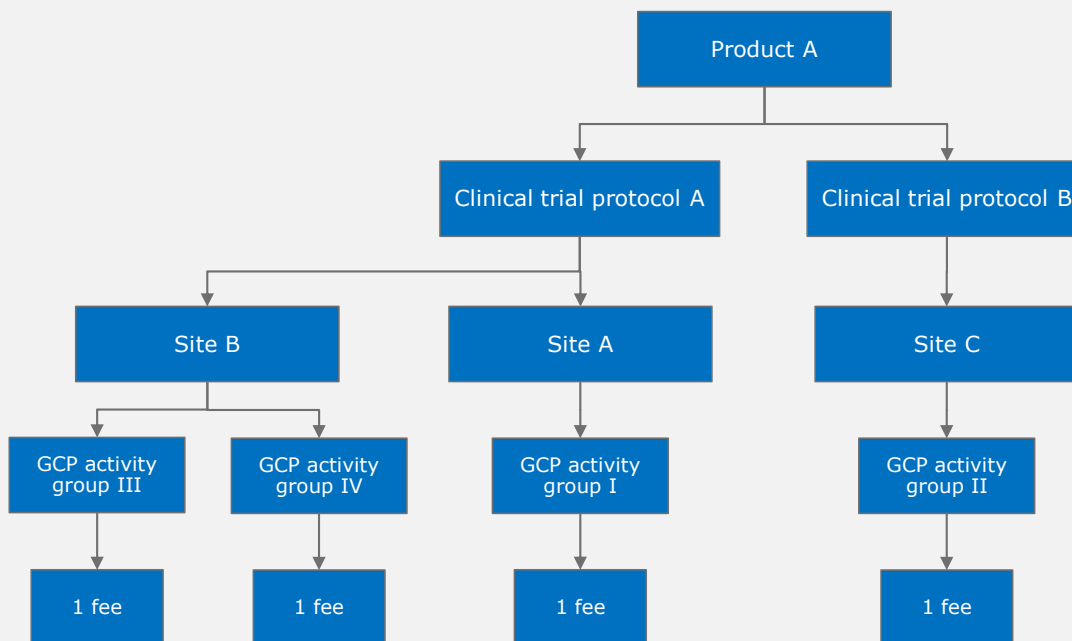

The examples shown below do not represent an exhaustive list. They apply to good clinical practice (GCP) inspections in relation to medicines for human use and to medicines for veterinary use.

Scenario 1:

GCP inspection request for Product A marketing authorisation application and the conduct of clinical trial protocol A at Site A (investigator site) for one clinical trial activity (Activity Group I) and at site B (sponsor site) for two clinical trial activities (Activity Group III and Activity Group IV). GCP inspection of clinical trial protocol B conducted at site C (Central laboratory) for one activity group (Activity group II);

Fee payable: 4 basic fees, i.e. 21 200 EURO + 21 200 EURO + 21 200 EURO + 21 200 EURO = 84 800 EURO;

Rationale: there is one product A supported by two pivotal trials the conduct of which is inspected for clinical trial protocol A at Site A for one activity group (Activity Group I) and at site B for two activity Groups (Activity group III and Activity Group IV). The clinical trial protocol B is inspected at site C for one activity group (Activity Group II) and each activity group attracts a basic fee (Level I).

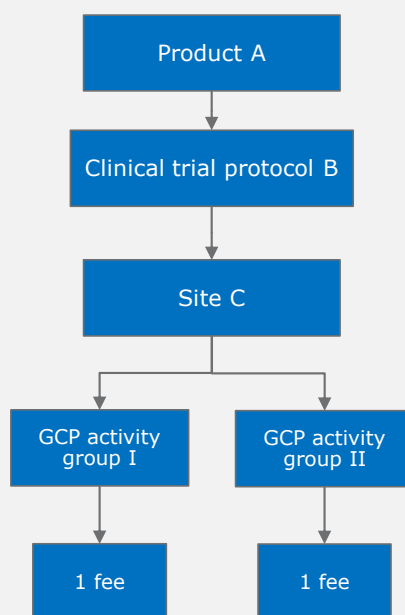

Scenario 2:

GCP inspection request for Product A marketing authorisation application and the conduct of clinical trial protocol B at Site C (i.e. CRO site including clinical and bioanalytical facility) for two clinical trial activities (Activity Group I) and (Activity Group II).

Fee payable: 2 basic fees, i.e. 21 200 EURO + 21 200 EURO = 42 400 EURO

Rationale: there is one product A supported by one pivotal trial the conduct of which is inspected for clinical trial protocol B at Site C for two activity groups (Activity Group I and Activity Group II) and each activity group attracts a basic fee (Level I).

A.2. Medicinal products for veterinary use

A.2.1.6. Examples of the determination of fees for renewals of marketing authorisation

It should be noted that the number of renewal fees charged for a medicinal product depends on the number of strengths associated with each pharmaceutical form determined as shown in section A.2.1.2. The number of presentations is not taken into consideration for the calculation of the renewal fee. The examples shown below do not represent an exhaustive list.

Scenario 1:

Full dossier application for a medicinal product having one pharmaceutical form with one strength and X number of presentations

Strengths associated with a pharmaceutical form:

- One strength associated with one pharmaceutical form

**7 100 EURO**

For renewal.

Basic fee

Scenario 2:

Full dossier application for a medicinal product having two pharmaceutical forms with two strengths and X presentations/strength associated with the first form and one strength and Y presentations associated with the second form.

Strengths associated with a pharmaceutical form:

- Two strengths associated with first pharmaceutical form
- One strength associated with second pharmaceutical form

**2*7 100 EURO**

For renewal.

Basic fee

**+ 7 100 EURO**

Fee payable using the standard procedure: **560 EURO**

 **280 EURO**
Basic fee
For the first set of 5 certificates for country 1.

 **+ 140 EURO**
Additional fee
For the second set of maximum 6 out of 10 certificates for country 2.

 **+ 140 EURO**
