EMA/565106/2013

European Medicines Agency decision
P/0237/2013

of 24 September 2013

Disclaimer

This Decision does not constitute entitlement to the rewards and incentives referred to in Title V of Regulation (EC) No 1901/2006.

Only the English text is authentic.
European Medicines Agency decision
P/0237/2013

of 24 September 2013

The European Medicines Agency,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 726/2004 of the European Parliament and of the Council of 31 March 2004 laying down Community procedures for the authorisation and supervision of medicinal products for human and veterinary use and establishing a European Medicines Agency2,

Having regard to the European Medicines Agency’s decision P/0192/2012 issued on 24 August 2012 and the decision P/0302/2012 issued on 20 December 2012,

Having regard to the application submitted by Novartis Europharm Limited on 16 May 2013 under Article 22 of Regulation (EC) No 1901/2006 proposing changes to the agreed paediatric investigation plan with a deferral and a waiver,

Having regard to the opinion of the Paediatric Committee of the European Medicines Agency, issued on 9 August 2013, in accordance with Article 22 of Regulation (EC) No 1901/2006,

Having regard to Article 25 of Regulation (EC) No 1901/2006,

Whereas:

(1) The Paediatric Committee of the European Medicines Agency has given an opinion on the acceptance of changes to the agreed paediatric investigation plan.

(2) It is therefore appropriate to adopt a decision on the acceptance of changes to the agreed paediatric investigation plan.
Has adopted this decision:

**Article 1**

Changes to the agreed paediatric investigation plan for sonidegib, capsule, hard, film-coated tablet, powder and solvent for oral suspension, oral use, are hereby accepted in the scope set out in the opinion of the Paediatric Committee of the European Medicines Agency annexed hereto, together with its appendices.

**Article 2**

This decision is addressed to Novartis Europharm Limited, Wimblehurst Road, RH12 5AB – Horsham, United Kingdom.

Done at London, 24 September 2013

For the European Medicines Agency
Guido Rasi
Executive Director
(Signature on file)
Opinion of the Paediatric Committee on the acceptance of a modification of an agreed Paediatric Investigation Plan
EMEA-000880-PIP02-11-M02

Scope of the application

Active substance(s):
Sonidegib

Condition(s):
Treatment of medulloblastoma

Pharmaceutical form(s):
Capsule, hard
Film-coated tablet
Powder and solvent for oral suspension

Route(s) of administration:
Oral use

Name/corporate name of the PIP applicant:
Novartis Europharm Limited

Basis for opinion

The application for modification proposed changes to the agreed paediatric investigation plan.

The procedure started on 12 June 2013.
Scope of the modification

Some details of the studies in the paediatric investigation plan were modified.

Opinion

1. The Paediatric Committee, having assessed the application in accordance with Article 22 of Regulation (EC) No 1901/2006 as amended, recommends as set out in the appended summary report:
   - to agree to changes to the paediatric investigation plan in the scope set out in the Annex I of this opinion.

   The Norwegian Paediatric Committee member agrees with the above-mentioned recommendation of the Paediatric Committee.

2. The measures and timelines of the paediatric investigation plan and the subset(s) of the paediatric population and condition(s) covered by the waiver are set out in the Annex I.

This opinion is forwarded to the applicant and the Executive Director of the European Medicines Agency, together with its annex(es) and appendix.

London, 9 August 2013

On behalf of the Paediatric Committee
Dr Daniel Brasseur, Chairman
(Signature on file)
Annex I

The subset(s) of the paediatric population and condition(s) covered by the waiver and the measures and timelines of the agreed Paediatric Investigation Plan
1. Waiver

1.1. Condition: Treatment of medulloblastoma

The waiver applies to:

- The paediatric population from birth to less than 4 months of age;
- for capsule, hard, film-coated tablet and powder and solvent for oral suspension for oral use;
- on the grounds that the disease or condition for which the specific medicinal product is intended does not occur in the specified paediatric subset(s).

2. Paediatric Investigation Plan

2.1. Condition: Treatment of medulloblastoma

2.1.1. Indication(s) targeted by the PIP

- Treatment of paediatric and adult patients with hedgehog pathway-activated medulloblastoma who relapse following standard of care therapy (including children younger than 3 years of age and children not eligible for radiation therapy).
- Treatment of paediatric patients with high-risk hedgehog pathway-activated medulloblastoma in combination with standard chemotherapy following primary surgical resection with or without radiotherapy (including children younger than 3 years of age).

2.1.2. Subset(s) of the paediatric population concerned by the paediatric development

From 4 months to less than 18 years of age.

2.1.3. Pharmaceutical form(s)

- Capsule, hard.
- Film-coated tablet.
- Powder and solvent for oral suspension.
2.1.4. Measures

<table>

| Clinical     | 4                 | Measure 2: Open-label, single-arm, non-controlled, dose-escalating, cohort-expanding trial to evaluate pharmacokinetics, tolerability and activity of sonidegib (LDE225) in children from 1 to less than 18 years of age (and in adults) with a refractory or recurrent solid malignant tumour which is potentially driven by hedgehog pathway.  
Measure 3: Randomised, active-controlled, open-label multi-centre trial to evaluate the safety and activity of sonidegib (LDE225) compared to temozolomide in children from 4 months to less than 18 years of age (and adults) with a relapse of medulloblastoma with hedgehog pathway-activation after radiation therapy, with an open-label non-controlled arm in children who could not receive radiation therapy.  
Measure 4: Randomised, double-blind, multi-centre, placebo-controlled trial to evaluate the efficacy and safety of sonidegib (LDE225) as add-on to standard frontline chemotherapy and, where appropriate, radiation therapy in children from 12 months to less than 18 years with medulloblastoma with high-risk features and with hedgehog activation, with a safety run-in phase.  
Measure 5: Population pharmacokinetic model using data from paediatric and adult patients. |

3. Follow-up, completion and deferral of PIP

| Concerns on potential long term safety issues in relation to paediatric use: | Yes |
| Date of completion of the paediatric investigation plan:                   | By December 2024 |
| Deferral for one or more studies contained in the paediatric investigation plan: | Yes |
