- Additional subheading

HEADINGS NUMBERING: Must respect the current template. No additional numbering should be created. Do not use automatic numbering insertion.

BOXED HEADINGS: 1. HEADING

Boxed headings in Annex III A (labelling) provide a structure to facilitate the work of applicants, assessors and reviewers, etc.; they must remain in the annexes during the whole evaluation procedure. However, they must NOT appear in the final printed packaging materials (e.g. actual carton, container label) or on the mock-ups and specimens. Boxed headings should be created by using "outside borders" and not by inserting a table. Boxed headings should always be kept, even when not applicable.

SCIENTIFIC SYMBOLS: Insert from the symbol window (normal text), e.g. μ, α, ½, ≤, ±, etc. Do not use AutoCorrect to automatically insert symbols that are included in the built-in list to ensure that the symbols are always readable.

TABLES: Font: in case the table is too big to fit in the page, a slightly smaller font size may be accepted on a case by case basis, as long as readability is maintained. Borders: single line style, colour automatic, width 1/2 pt. Do not use background or shading.

CROSS-REFERENCE: When cross-referring in the SmPC, do not mention the section heading but only the section number and be consistent throughout the text.
- Examples: ... (see section 5.1)
  ... (see sections 5.1 and 5.3)
Shaded text can be used by applicants to highlight text which will not be printed in the actual SmPC, PL or label. Its use should be limited.
