# Clinical Research Seminar

- European Federation of Internal Medicine
- Foundation for Internal Medicine in Europe

*Daniel Sereni*

*EFIM delegate to EMA*

*president FDIME*

EFIM

European Federation of Internal Medicine

# Clinical Research Seminar

- Three days course on clinical research
- In Paris
- Participants
  - Young European internists ( average 30 y)
  - With basic knowledge and experience in clinical research
  - 15 participants / year
  - Selected by a European Committee
  - > 230 residents have participated since 2003

EFIM

European Federation of Internal Medicine!

# Clinical Research Seminar

- Objectives
  - To improve knowledge in methodology
    - How to deal with main difficult issues in research
    - Learn about new aspects ( Innovative clinical trials, biologicals..)
  - to better understand practical issues
    - from interactions with experts about their own experience in research
    - Through workshops and discussions by experts of residents research projects
  - To foster networking between young European researchers
- Faculty
  - organizing committee (European internists)
  - Experts speakers: senior clinicians, methodologists, industry, patient representative

# Clinical Research Seminar program 2018

- Protection of persons in clinical research with a patients representative point of view
- Rules and ethical aspects in clinical trials
- How to deal with sample size and power
- Original methods in clinical epidemiology
- How to build a clinical trial
- Imaging biomarkers in clinical research
- New designs in clinical trials

# Clinical Research Seminar Program 2018

- How to design trials in rare diseases
- Genetic kidney diseases in Iceland
- Analyzing a clinical paper
- High yield tips in grant application writing
- Publishing your results
- Presentations of their own research projects by all residents, and discussion with experts

# Clinical Research Seminar

- What did participants find most valuable?
  - Practical examples from experts
  - Discussions about frequent difficulties encountered in research
  - Tips on building a protocol
  - Tips on grants application
  - How to write a scientific paper
  - Interaction with speakers and residents coming from different countries
