# SPOR data services - update to SPOR TF

May 2019

Presented by Francisco Penaranda on 24 May 2019 Functional title and/or  
name of organisational entity

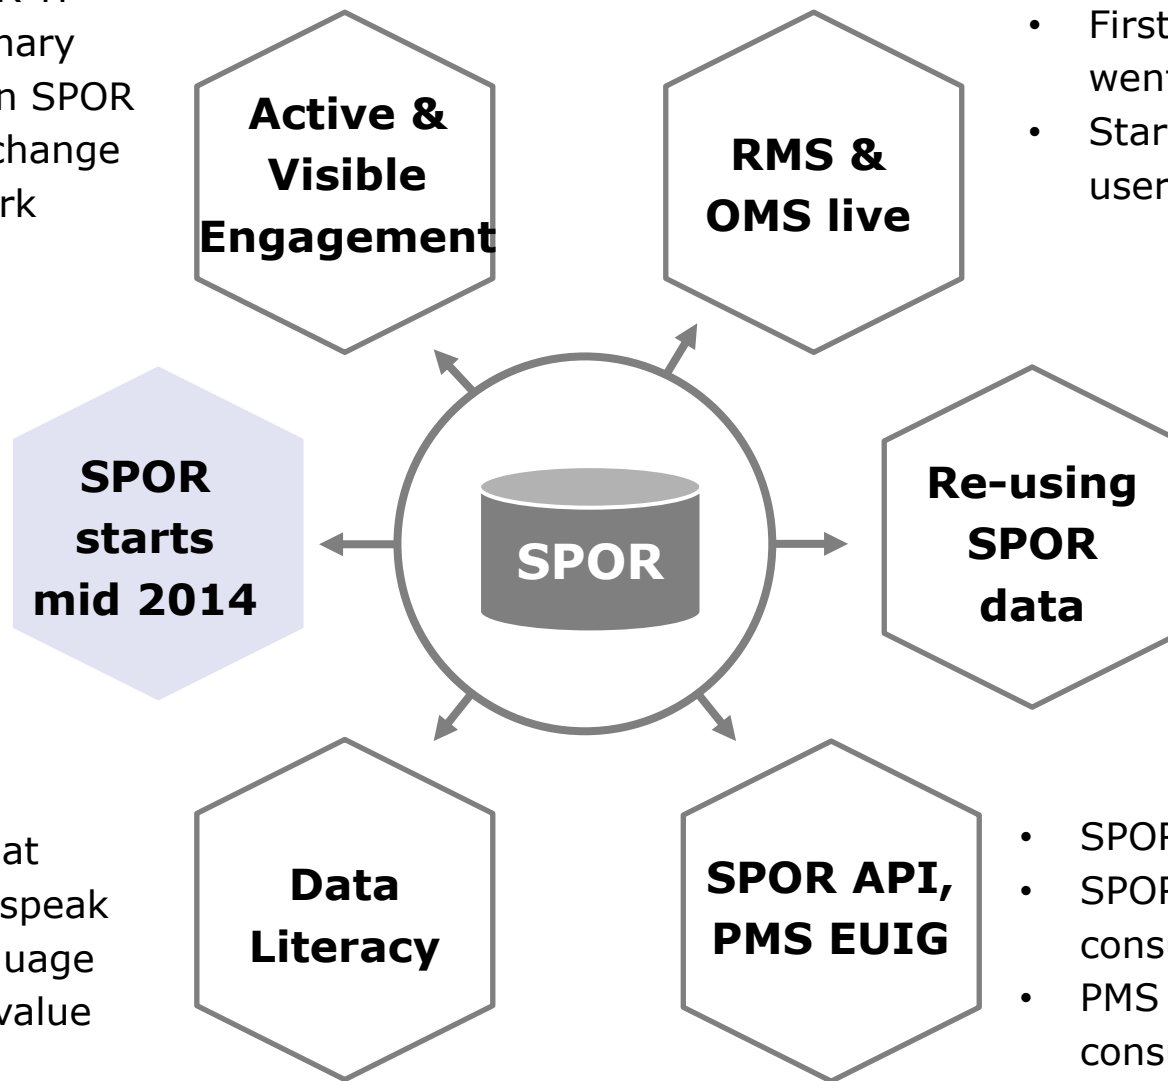

An agency of the European Union

- Set up of SPOR TF
- Involve veterinary stakeholders in SPOR
- Set up SPOR change liaisons network

- First two services went live in 2017
- Start on-boarding of users

- eAF
- EV user registration
- IRIS for OD
- IRIS for PD
- IAM

- SPOR API v.1
- SPOR API spec v.2 consultation
- PMS EU IG (Human) consultation

- Critical skill that enables us to speak the same language and leverage value of data

- Brexit relocation to the Netherlands delivered, we see changes in staff head count
- Impacts on existing projects / operational activities in the Business / Data Department
  - We don't know when we are going to replace staff who left
  - Learning curve for newcomers
  - R&O&S Operational work (change requests) has been prioritised
  - P&S project keeps focus on minimising external dependencies – SPOR API, EU IG.
  - Changes to Governance (SPOR TF ToR & R&OMS KUG) still not prioritised as insufficient staff to kick-off and support this work stream
