Scientific recommendation on classification of advanced therapy medicinal products

Article 17 – Regulation (EC) No 1394/2007

Disclaimer: This document is a summary for public release of a scientific recommendation on classification of advanced therapy medicinal products. The original text adopted by the Committee for Advanced Therapies (CAT) has been redacted to delete commercially confidential information.

The present scientific recommendation refers exclusively to the case as presented to the European Medicines Agency (EMA) without prejudice to future evaluations by the Agency.

It is stressed that the scientific recommendation on advanced therapy classification does not amount to any endorsement of the plausibility of the product, including the mode of action or therapeutic indication(s) claimed by the applicant.

Brief description (or name when available) of the active substance(s)

Genetically engineered AAV8 that lacks all of the viral protein-coding sequences and encodes a human MTM1 complementary DNA.

Brief description of the finished product

Suspension of product vector particles supplied in a vial.

Proposed indication

Treatment of X-linked Myotubular Myopathy.

EMA/CAT conclusion

The procedure was finalised on 27 January 2017 for the following recommendation.

On the basis that the product:

- contains a biological medicinal product as the active substance;

30 Churchill Place • Canary Wharf • London E14 5EU • United Kingdom

Send a question via our website www.ema.europa.eu/contact

An agency of the European Union

- the active substance is a recombinant nucleic acid administered to human beings with a view to adding a genetic sequence;
- its therapeutic effect relates directly to the product of the genetic expression of this sequence,

the EMA/CAT considers that the Product falls within the definition of a gene therapy medicinal product as provided in Article 2(1) of Regulation (EC) 1394/2007.
