Scientific recommendation on classification of advanced therapy medicinal products

Article 17 – Regulation (EC) No 1394/2007

Disclaimer: This document is a summary for public release of a scientific recommendation on classification of advanced therapy medicinal products. The original text adopted by the Committee for Advanced Therapies (CAT) has been redacted to delete commercially confidential information.

The present scientific recommendation refers exclusively to the case as presented to the European Medicines Agency (EMA) without prejudice to future evaluations by the Agency

Brief description (or name where available) of the active substance(s)

Mesenchymal stem cells isolated from umbilical cord

Brief description of the finished product

Mesenchymal stem cells isolated from umbilical cord seeded acellular amniotic matrix

Proposed indication

Burns, non-healing wounds

EMA/CAT conclusion

The committee adopted on 29th January 2016 the following scientific recommendation.

On the basis that the product:

- consists of cells have been subject to substantial manipulation so that biological characteristics, physiological functions or structural properties relevant for the intended regeneration, repair or replacement have been altered,

- the cells are administered to human beings with a view to regenerating, repairing or replacing a human tissue,

the EMA/CAT considers that the product falls within the definition of a tissue engineered product.
