Herbal preparation	
Peppermint oil: essential oil obtained by steam dis flowering plant	tillation from the fresh aerial parts of the
European Pharmacopoeia monograph referen	
Peppermint oil – Menthae piperitae aetheroleum (C	J4U5J
Indications	
Indication 1) Traditional herbal medicinal product colds.	used for the relief of symptoms in coughs and
Indication 2) Traditional herbal medicinal product of muscle pain.	used for the symptomatic relief of localised
Indication 3) Traditional herbal medicinal product of pruritic conditions in intact skin.	used for the symptomatic relief of localised
The product is a traditional herbal medicinal produ	

based upon long-standing use.

Type of tradition

European

#### Specified strength

Indications 1), 2) and 3)

Single dose

Cutaneous and transdermal use

Children 4 to 11 years of age

Semi-solid preparations 2-10%

Hydroethanolic preparations 2-4%

Adolescents

Semi-solid preparations 5-15%

Hydroethanolic preparations 3-6%

Adults, elderly

Semi-solid and oily preparations 5-20%

In Hydroethanolic preparations 5-10%

Indication 1)

Adolescents, adults and elderly

In nasal ointments 1-5% essential oil.

#### Specified posology

Up to three times daily

Indication 1)

Apply a thin layer on the chest or on the back or around the nostrils.

Indications 2) and 3)

Apply a thin layer on the affected area.

The amount of the preparation of the daily dose must not exceed the limit of pulegone and menthofuran (see Pharmaceutical particulars).

The use in children under 2 years of age is contraindicated (see Contraindications).

The use is not recommended in children 2-3 years of age (see Special warnings and precautions for use).

The nasal application is not recommended in children between 2 and 11 years of age (see Special warnings and precautions for use).

#### Route of administration

Cutaneous and transdermal.

#### Duration of use or any restrictions on the duration of use

#### Indications 2) and 3)

It is not recommended to use the medicinal product continuously for more than 2 weeks.

#### Indications 1), 2) and 3)

If the symptoms persist during the use of the medicinal product, a doctor or a qualified health care practitioner should be consulted.

#### Any other information necessary for the safe use

#### Contraindications

Children under 2 years of age, because menthol can induce reflex apnoea and laryngospasm.

Children with history of seizures (febrile or not).

Hypersensitivity to peppermint oil or menthol.

#### Special warnings and precautions for use

Eye contact with unwashed hands after the application of peppermint oil may potentially cause irritation.

Peppermint oil should not be applied on broken or irritated skin.

The use in children between 2 to 3 years of age has not been established due to lack of adequate data.

The nasal application in children from 2 to 11 years of age has not been established due to lack of adequate data.

Other medicinal products containing peppermint oil shall be avoided during the use of this medicinal product.

#### Interactions with other medicinal products and other forms of interaction

None reported

#### Fertility, Pregnancy and lactation

In the absence of sufficient data, the use during pregnancy and lactation is not recommended. No fertility data available.

#### Effects on ability to drive and use machines

No studies on the effect on the ability to drive and use machines have been performed.

#### Undesirable effects

Hypersensitivity reactions such as skin rash, contact dermatitis, and eye irritation have been reported. These reactions are most of the time mild and transient. The frequency is not known.

Irritation of the skin and mucosa of the nose is possible, after local application. The frequency is not known.

If other adverse reactions not mentioned above occur, a doctor or a qualified health care practitioner should be consulted.

#### Overdose

No case of overdose has been reported.

#### Pharmaceutical particulars

A limit of pulegone and menthofuran corresponding to the exposure of 0.75 mg/kg bw per day for children, adolescents and adults should not be exceeded.

For more details see the "Public statement on the use of herbal medicinal products containing pulegone and menthofuran)" (EMA/HMPC/138386/2005 Rev1).

### Pharmacological effects or efficacy plausible on the basis of long-standing use and experience

Not applicable

#### Date of compilation/Last revision
