## MRL summary opinion<sup>1</sup>

---

# Diflubenzuron

## *Salmonidae*

Further to a request from the European Commission for the review of the MRL for diflubenzuron, due to concerns relating to the genotoxic potential of the metabolite 4-chloroaniline, the Committee adopted, on 7 May 2015, an opinion recommending the modification of the current entry for diflubenzuron in *Salmonidae* in Table 1 (Allowed substances) of the Annex to Commission Regulation (EU) No 37/2010, amending the existing MRL to a provisional one, pending provision of additional residue data, in accordance with the following table:

Pharmacologically active substance	Marker residue	Animal species	MRLs	Target tissues	Other provisions	Therapeutic classification
Diflubenzuron	Diflubenzuron	<i>Salmonidae</i>	1000 µg/kg	Muscle and skin in natural proportions	Provisional MRL expires on 30 April 2017	Antiparasitic agents / Agents against ectoparasites
