This newsletter is addressed primarily to organisations representing patients, consumers and healthcare professionals. It provides a summary of key information relating to medicines for human use published during the previous month by the European Medicines Agency.

Information is selected based on recommendations from consulted patients, consumers and healthcare professionals, and does not necessarily cover all relevant information published by the Agency.

To receive each new issue of the newsletter, please click here RSS feeds, choose ‘Human medicines highlights newsletter’ and then click on ‘Subscribe to this feed’. Please note, in order to be able to view RSS feeds you need one of the following: a modern web browser; a web-based news reader or a desktop news reader. For a list of RSS readers please refer to our RSS guide and follow the instructions from the selected RSS reader in order to add our newsletter feed.

You can find details on how to cancel / unsubscribe to an RSS feed on the RSS reader tool that you are using, for example Unsubscribe from an RSS Feed for users of Microsoft Outlook.

For further information on the processing of your personal data, please find EMA’s Privacy statement regarding the sending of electronic newsletters click here.

### Information on medicines

#### COVID-19 vaccines and treatments

**Withdrawal of applications for extension of indication**

- **Olamiant** (*baricitinib*)
  Intended for treatment of patients hospitalized with Covid-19

#### Cancer

**Positive CHMP opinions on new medicines**

- **Imjudo** (*tremelimumab*)
  Treatment of liver cancer

- **Tremelimumab AstraZeneca** (*tremelimumab*)
  Treatment of non-small cell lung cancer
New medicines authorised

- **Locametz** (gozetotide)
  Treatment of prostate cancer

- **Padcev** (enfortumab vedotin)
  Treatment of bladder and urinary tract cancer

- **Pluvicto** (lutetium (177Lu) vipivotide tetraxetan)
  Treatment of prostate cancer

New information on authorised medicines

- **Enhertu** (trastuzumab deruxtecan) - new indication
  Treatment of breast cancer

- **Imfinzi** (durvalumab) - new indication
  Treatment of liver cancer

Negative CHMP opinions on new medicines

- **Omblastys** (iodine (131I) omburtamab)
  Intended for treatment of a rare type of cancer which forms from immature nerve cells

Cardiovascular system

New information on authorised medicines

- **Adcirca** (previously Tadalafil Lilly) (tadalafil) - new indication
  Treatment of pulmonary arterial hypertension (high blood pressure in lungs)

- **Edistride** (dapagliflozin) - extension of indication
  Treatment of symptomatic chronic heart failure

- **Forxiga** (dapagliflozin) - extension of indication
  Treatment of symptomatic chronic heart failure

Arbitration procedures

- **Rambis and associated names** (ramipril, bisoprolol fumarate) - outcome
  Treatment of certain long-term heart conditions and high blood pressure

Haematology (blood conditions)

Positive CHMP opinions on new medicines

- **Hemgenix** (etranacogene dezaparvovec)
  Treatment of inherited bleeding disorder

New medicines authorised

- **Pyrukynd** (mitapivat)
  Treatment of a disease that causes red blood cells to break down faster than normal

New information on authorised medicines

- **Hemlibra** (emicizumab) - extension of indication
  Prevention of bleeding in patients with haemophilia A (a blood clotting disorder)
Hepatology (liver conditions)

New information on authorised medicines

- **Imfinzi (durvalumab)** - new indication
  Treatment of liver cancer

Positive CHMP opinions on new medicines

- **Imjudo (tremelimumab)**
  Treatment of liver cancer

Direct Healthcare Professional Communication (DHPC)

- **Terlipressin (terlipressin)**
  Treatment of hepatorenal syndrome (serious kidney problems in people with advanced liver disease)

HIV

New information on authorised medicines

- **Triumeq (abacavir sulfate / dolutegravir sodium / lamivudine)** - new pharmaceutical form
  Treatment of HIV in children weighing between 14 to 25kg

Hormone system

New medicines authorised

- **Mycapssa (octreotide)**
  Treatment of acromegaly (excess growth of body tissues due to excessive growth hormone)

Immune system

New information on authorised medicines

- **Dupixent (dupilumab)** - new indication
  Treatment of an inflammatory condition affecting the oesophagus, or food pipe

Metabolic disorders

Positive CHMP opinions on new medicines

- **Livmari (Maralixibat chloride)**
  Treatment of intense itching due to a build-up of bile in patients aged 2 months and older

- **Pombiliti (cipaglucosidase alfa)**
  Treatment of glycogen storage disease (a disease that causes the build up of glycogen, a complex sugar, in organs and muscles)

---

**Key to symbols used**

- **O** Orphan medicine
- **G** Generic medicine
- **B** Biosimilar medicine
- **C** Conditional approval
- **E** Exceptional circumstances
Nephrology (kidney conditions)

New information on authorised medicines

- **Kerendia** (*finerenone*) - extension of indication
  Treatment of chronic kidney disease

Withdrawal of applications for new medicines

- **Imbarkyd** (*bardoxolone methyl*)
  Treatment of chronic kidney disease caused by an inherited disease called Alport syndrome

Direct Healthcare Professional Communication (DHPC)

- **Terlipressin** (*terlipressin*)
  Treatment of hepatorenal syndrome (serious kidney problems in people with advanced liver disease)

Nervous system

Positive CHMP opinions on new medicines

- **Dimethyl fumarate Accord** (*dimethyl fumarate*)
  Treatment of multiple sclerosis

New information on authorised medicines

- **Fintepla** (*fenfluramine*) - new indication
  Treatment of seizures associated with Lennox-Gastaut syndrome (a severe form of epilepsy that starts in childhood)

Ophthalmology (eye conditions)

Positive CHMP opinions on new medicines

- **Gelisia and associated names** (*timolol maleate*)
  Treatment of high pressure inside the eye

Respiratory system

Safety update

- Review of **Pholcodine-containing medicinal products** (*pholcodine*) - PRAC recommendation
  Treatment of dry cough and (in combination with other active substances for treatment of) symptoms of cold and flu

Rheumatology (immune and inflammatory conditions)

New medicines authorised

- **Eladynos** (*abaloparatide*)
  Treatment of osteoporosis in women in menopause with increased risk of bone fractures

Key to symbols used

- O Orphan medicine
- ☒ Generic medicine
- ☀ Biosimilar medicine
- ✔ Conditional approval
- ☢ Exceptional circumstances
Urology

New medicines authorised

- **Locometz** *(gozetotide)*  
  Treatment of prostate cancer

- **Padcev** *(enfortumab vedotin)*  
  Treatment of bladder and urinary tract cancer

- **Pluvicto** *(lutetium (177Lu) vipivotide tetraxetan)*  
  Treatment of prostate cancer

Vaccines

New medicines authorised

- **Qdenga** *(dengue tetravalent vaccine (live, attenuated))*  
  Protection against dengue disease in patients from 4 years of age

Other medicines

Safety update

- **Review of Synchron (INN)** - European Commission final decision (Scope of safety referral)  
  Suspension of medicines over flawed studies

Medicines under additional monitoring

Other information

Guidelines

Adopted guidelines

- **Liposomal amphotericin B product-specific bioequivalence guidance** - Scientific guideline

- **Lanreotide acetate, prolonged-release solution for injection in prefilled syringe 60, 90 and 120 mg product-specific bioequivalence guidance** - Scientific guideline

- O Orphan medicine
- Generic medicine
- Biosimilar medicine
- Conditional approval
- E Exceptional circumstances
Explanation of terms used

Orphan medicine
A medicine intended for the treatment of a rare, serious disease. These medicines are granted orphan status during their development; at time of approval, orphan designations are reviewed to determine whether the information available to date allows maintaining the medicine's orphan status.

Generic medicine
A medicine that is essentially the same as one that has already been authorised for use. (The latter is known as the 'reference medicine')

Highly similar medicine
A biological medicine that is similar to another biological medicine which has already been authorised for use. (Biosimilar medicines are also known as 'similar biological' medicines)

Conditional approval
A medicine that fulfils an unmet medical need may, if its immediate availability is in the interest of public health, be granted a conditional marketing authorisation on the basis of less complete clinical data than are normally required, subject to specific obligations being imposed on the authorisation holder to generate complete data on the medicine.

Exceptional circumstances
A medicine may be approved in some cases where the applicant cannot provide comprehensive data on the safety or efficacy of the medicine under normal conditions of use, due to exceptional circumstances such as ethical issues or the rarity of the disease concerned. These medicines are subject to specific post-authorisation obligations and monitoring.

Medicines assessed under Article 58
Article 58 of Regulation (EC) No 726/2004 allows the CHMP to give opinions, in co-operation with the World Health Organization, on medicinal products that are intended exclusively for markets outside of the European Union.

Note on the centralised authorisation procedure
To obtain a single marketing authorisation (licence) for a medicine that is valid in all Member States of the European Union (EU) – via a process known as the 'centralised procedure' – the company or person developing the medicine must submit an application to the European Medicines Agency.

The Agency’s Committee for Medicinal Products for Human Use (CHMP) carries out a scientific evaluation of the information contained in the application and prepares an opinion (scientific recommendation). The Agency transmits this (positive or negative) opinion to the European Commission, which then issues a Decision granting or refusing the marketing authorisation.

When the CHMP adopts a positive opinion on a medicine, the Agency publishes on its website a 'summary of opinion', in the first instance, followed by more detailed information in a 'European public assessment report (EPAR)' after the marketing authorisation has been granted.
