1. Introduction

The purpose of this document is to describe the high-level & end-to-end process for PSUSA & other related post-authorisation processes, which enable the continuous evaluation of the benefit-risk profile of medicinal products throughout their lifecycle, authorised in the European Union based on a granted marketing authorisation.

This process is part of the Human Medicines Division's process map (image below) which provides a high-level overview of the 19 process clusters within the operating model of the Human Medicines Division.
