Statement of Origin, BSE/TSE and Viral Risk Assessment

Dear Sir/Madam:

The following product is manufactured in and distributed from our Alabaster, Alabama-USA facility:

Plant-Derived Cholesterol (#770100, 700100)

All starting materials and excipients used in the synthesis and purification of Cholesterol (Plant) are not of animal origin and pose no BSE/TSE risk.

The product has not been evaluated for viral loading; however, the manufacturing process involves extensive use of organic solvents.

If you have any questions or need additional information, please do not hesitate to contact me.

Cordially,
