Reproduction and/or distribution of the content of these training materials for non-commercial or commercial purposes is authorised, provided the European Medicines Agency is acknowledged as the source of the materials.

The European Medicines Agency developed this training material to enhance public access to information on the Clinical Trial Information System (CTIS). This material describes a preliminary version of CTIS and may therefore not entirely describe the system as it is at the time of use of this material. The Agency does not warrant or accept any liability in relation to the use (in part or in whole) or the interpretation of the information contained in this training material by third parties.

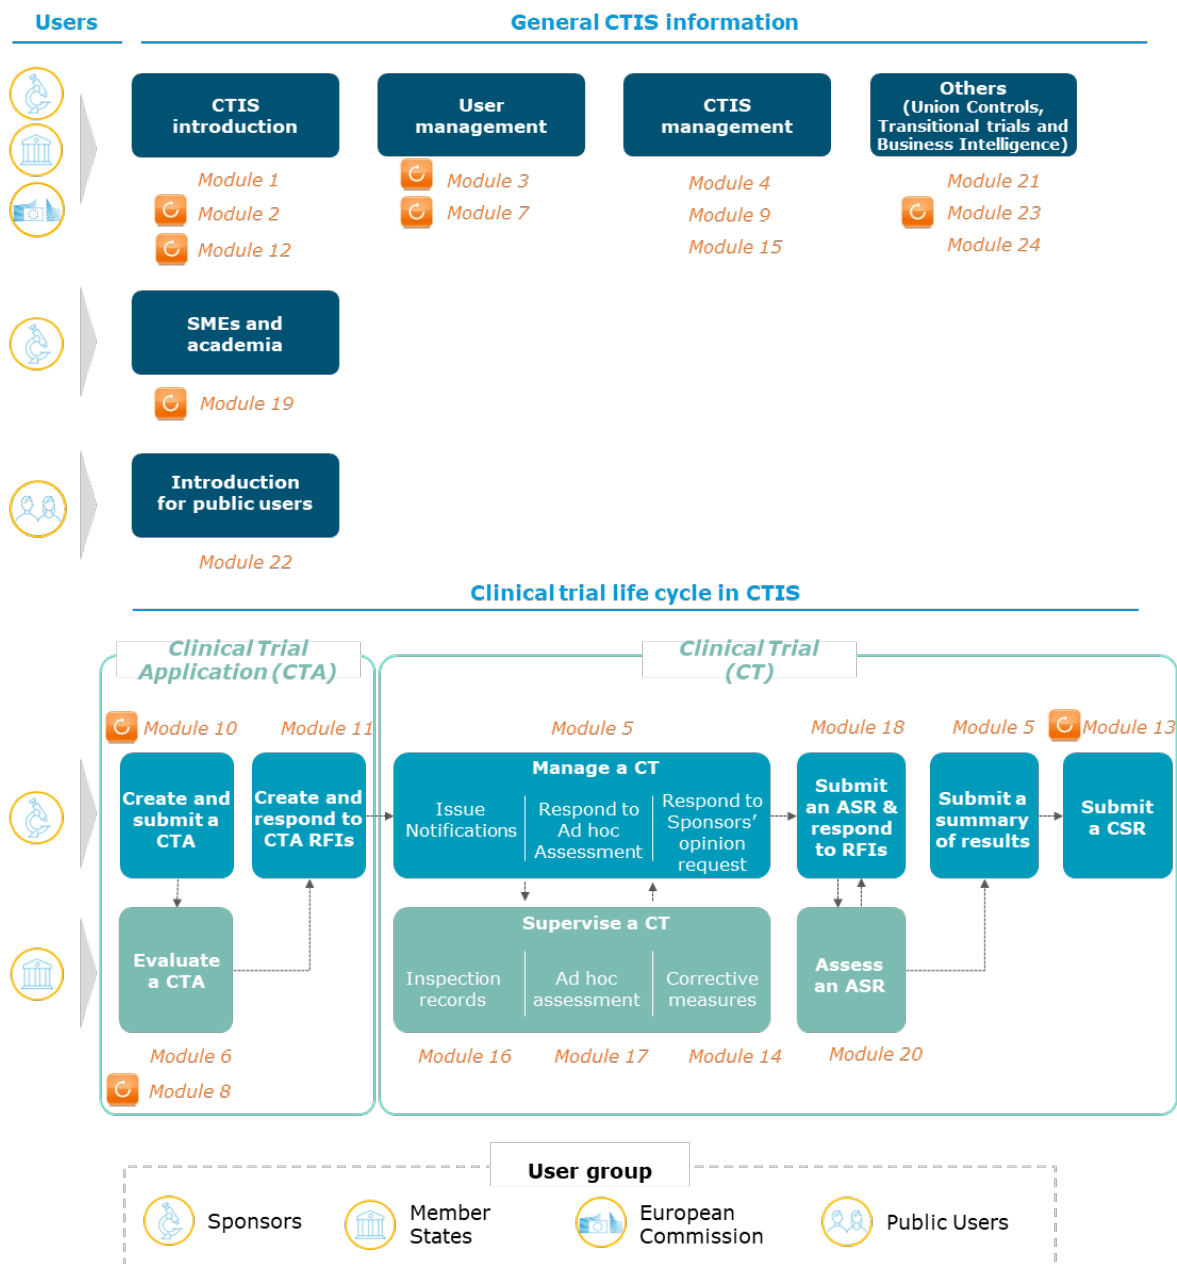

# 1. Introduction

This document aims to help users to easily identify which are the latest updated materials on the EMA website and which materials have been developed since the last time users have consulted them.

# 2. Latest updates

This section highlights the latest modules that have been updated or contain new training materials since the last version of this document has been uploaded. The details of the updates are described in each document.

Updates from 15/05/2022 to 28/02/2023

Click on the icons to view the details of the updated or new training material.

### 3. How to search for updated documents

The EMA website allows users to search and filter for documents that have been updated. Users can **click on the 'Search' button** to open the 'Search the website' page.

Once in the 'Search the website' page, users are able to use the left-hand panel to locate documents, news, events or any other material. Users need to select the 'Include documents' option available at the left-upper side of the screen to do a full search.

Additionally, at the left-bottom side of the screen, users can filter by 'Last updated' to search for updated versions of documents or by 'First published' to search for new materials. The time period needs to be indicated by the users according to the last time they consulted the EMA website.

This search functionality retrieves documents from the sections of the EMA website, so it is recommended that users include the key words 'CTIS training'. This will narrow down the search results list, provided that the search operator will retrieve results that only contain 'CTIS training' in their title. For some documents, in the search results lists, it is indicated in red if the item is an updated version or a new document.

The screenshot shows the EMA search interface with several key elements highlighted by callouts:

- 'Include documents' filter:** A callout points to the 'Include documents' checkbox in the left-hand filter panel, which is checked.
- 'Last updated' filter:** A callout points to the 'Last updated' filter section, which includes date range pickers (From and To) and radio button options for 'This week', 'This month', 'Last week', and 'Last month'.
- 'First published' filter:** A callout points to the 'First published' filter section, which includes date range pickers (From and To).
- Update type indicator:** A callout points to the word 'updated' in red text next to the first search result, indicating that the document has been updated.

The search results list displays 71565 results, sorted by Relevance. The first result is a Human medicine European public assessment report (EPAR) for Xiliar, marked as updated. Other results include reports for RoActemra, Ravicli, Felprevia, Symkevi, Kalydeco, Tremfya, and Halaven, all also marked as updated.
