The structure of these release notes has been refined and simplified for enhanced accessibility to all users. The document contains now 3 sections and 3 annexes. It should be noted that specific segments have been excised, owing to their availability within other documents (such as the EU IG).

Overview of key changes:

With every new release, the UPD release notes are updated to highlight to the user the changes compared to previous versions by detailing new/updated functionalities and/or issues that have been resolved, are known, and/or are newly reported.

Resolved issues since the previous release (UPD version 1.7.2513, released on 4 March 2025)	4
Known Issues	16
Next release's expected date	Q2 2025

Overview of new functionality(ies):

- This release includes only bug fixes and no new functionalities are included.

Notes:

- In case of receiving an error file after the Availability Status (AvS) submission, MAHs are advised to follow these steps:
 - If the errors in the file are due to business validations (see section 4.3.2 of [Vet EU IG Chapter 7](#)), **fix the errors and resubmit the file**.
 - If the file contains ER.36** (see section 4.3.1 of [Vet EU IG Chapter 7](#)), then pay attention to the last column of the file:
 - The rows that in the last column contain ER.36, please group them in a new Excel or CSV file and submit it in a ticket to [EMA Service Now](#).
 - If you have rows having in the last column the value 'N/A', please resubmit those rows to UPD;
 - If you have rows having in the last column values of the type 'Database updated - Submission 0000 - Product 00000', please do not resubmit as those updates have been processed successfully.

- Once the errors of type ER.36 have been addressed, incorporate the AvS of those products into the next submission, and if you again receive any error repeat all the above steps.

Over time, as ER.36 issues are cleaned up, the size of the carry forward from month to month should diminish in size and eventually disappear.

For information:

- All Competent Authorities that are participating in the SPC harmonisation procedure must ensure that the selected reference medicinal products contain all mandatory data before the RMS creates the procedure in UPD. If any of these products is missing mandatory data, the creation of MRP will fail.

- The system is experiencing inconsistencies in the Export csv file related to the QPPV email information for CAPs i.e. the QPPV email field might be displaying N/A instead of the email address. A bug 215611 was raised in October 2024 to find the root cause of the problem. The investigation concluded that there's a timing issue that prevents exporting in real time accurately data from the UPD. Three potential solutions were considered, and the preferred one is a complex task which might be addressed later this year. Unfortunately, this means that **the Export csv file may on rare occasions display N/A (when the QPPV email information has already been submitted)**. Until the solution is deployed, in case of any value missing in the Export csv file for CAPs, we recommend checking the product in the UPD UI to confirm the existing information. If the data displayed in the UPD UI is incorrect (and the MAH has previously submitted the correct QPPV email), then a ticket should be raised via [EMA Service Now](#).
