

Help improve the
safety of medicines
used in animals!

An adverse event
is a **side-effect** or
adverse reaction
after using a
medicine.

Report suspected adverse events after using veterinary medicines when:

- an unfavourable and unintended event occurs in animals or humans.
- a treatment or a vaccine hasn't worked.

Anyone can report suspected
adverse events.

Any species.

Each report counts.

Reporting protects animals,
people, and the environment.

Safer medicines, healthy animals.

Report adverse events!
