European Medicines Agency decision

P/0041/2013

of 25 February 2013

on the acceptance of a modification of an agreed paediatric investigation plan for beclometasone dipropionate / formoterol fumarate dihydrate (Foster and associated names, Kantos and associated names, Inuvair and associated names, Kantos Master and associated names) (EMA-000548-PIP01-09-M04) in accordance with Regulation (EC) No 1901/2006 of the European Parliament and of the Council

European Medicines Agency decision

P/0041/2013

of 25 February 2013

on the acceptance of a modification of an agreed paediatric investigation plan for beclometasone dipropionate / formoterol fumarate dihydrate (Foster and associated names, Kantos and associated names, Inuvair and associated names, Kantos Master and associated names) (EMA-000548-PIP01-09-M04) in accordance with Regulation (EC) No 1901/2006 of the European Parliament and of the Council

The European Medicines Agency,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1901/2006 of the European Parliament and of the Council of 12 December 2006 on medicinal products for paediatric use and amending Regulation (EEC) No. 1768/92, Directive 2001/20/EC, Directive 2001/83/EC and Regulation (EC) No 726/2004¹,

Having regard to Regulation (EC) No 726/2004 of the European Parliament and of the Council of 31 March 2004 laying down Community procedures for the authorisation and supervision of medicinal products for human and veterinary use and establishing a European Medicines Agency²,

Having regard to the European Medicines Agency's decision P/88/2010 issued on 1 June 2010, the decision P/192/2011 issued on 3 August 2011, the decision P/0046/2012 issued on 29 February 2012, and the decision P/0177/2012 issued on 17 August 2012,

Having regard to the application submitted by Chiesi Farmaceutici S.p.A. on 19 November 2012 under Article 22 of Regulation (EC) No 1901/2006 proposing changes to the agreed paediatric investigation plan with a deferral and a waiver,

Having regard to the opinion of the Paediatric Committee of the European Medicines Agency, issued on 8 February 2013, in accordance with Article 22 of Regulation (EC) No 1901/2006,

Having regard to Article 25 of Regulation (EC) No 1901/2006,

Whereas:

- (1) The Paediatric Committee of the European Medicines Agency has given an opinion on the acceptance of changes to the agreed paediatric investigation plan and to the deferral.
- (2) It is therefore appropriate to adopt a decision on the acceptance of changes to the agreed paediatric investigation plan, including changes to the deferral.

¹ OJ L 378, 27.12.2006, p.1.

² OJ L 136, 30.4.2004, p. 1.

Has adopted this decision:

Article 1

Changes to the agreed paediatric investigation plan for beclometasone dipropionate / formoterol fumarate dihydrate (Foster and associated names, Kantos and associated names, Inuvair and associated names, Kantos Master and associated names), pressurised inhalation, solution, inhalation powder, inhalation use, including changes to the deferral are hereby accepted in the scope set out in the opinion of the Paediatric Committee of the European Medicines Agency annexed hereto, together with its appendices.

Article 2

This decision is addressed to Chiesi Farmaceutici S.p.A., via Palermo 26/A, 43122 Parma, Italy.

Done at London, 25 February 2013

For the European Medicines Agency
Guido Rasi
Executive Director

EMA/PDCO/38879/2013

Opinion of the Paediatric Committee on the acceptance of a modification of an agreed Paediatric Investigation Plan EMA-000548-PIP01-09-M04

Scope of the application

Active substance(s):

Beclometasone dipropionate / formoterol fumarate dihydrate

Invented name:

Foster and associated names

Kantos and associated names

Inuvair and associated names

Kantos Master and associated names

Condition(s):

Treatment of asthma

Authorised indication(s):

See Annex II

Pharmaceutical form(s):

Pressurised inhalation, solution

Inhalation powder

Route(s) of administration:

Inhalation use

Name / corporate name of the PIP applicant:

Chiesi Farmaceutici S.p.A.

Information about the authorised medicinal product:

See Annex II

Basis for opinion

Pursuant to Article 22 of Regulation (EC) No 1901/2006 as amended, Chiesi Farmaceutici S.p.A. submitted to the European Medicines Agency on 19 November 2012 an application for modification of the agreed paediatric investigation plan with a deferral and a waiver as set out in the European Medicines Agency's decision P/88/2010 issued on 1 June 2010, the decision P/192/2011 issued on 3 August 2011, the decision P/0046/2012 issued on 29 February 2012, and the decision P/0177/2012 issued on 17 August 2012.

The application for modification proposed changes to the agreed paediatric investigation plan and to the deferral.

The procedure started on 12 December 2012.

Scope of the modification

Some measures and timelines of the Paediatric Investigation Plan have been modified.

Opinion

1. The Paediatric Committee, having assessed the application in accordance with Article 22 of Regulation (EC) No 1901/2006 as amended, recommends as set out in the appended summary report:
 - to agree to changes to the paediatric investigation plan and to the deferral in the scope set out in the Annex I of this opinion.

The Norwegian Paediatric Committee member agrees with the above-mentioned recommendation of the Paediatric Committee.

2. The measures and timelines of the paediatric investigation plan and the subset(s) of the paediatric population and condition(s) covered by the waiver are set out in the Annex I.

This opinion is forwarded to the applicant and the Executive Director of the European Medicines Agency, together with its annexes and appendix.

London, 8 February 2013

On behalf of the Paediatric Committee
Dr Daniel Brasseur, Chairman
(Signature on file)

Annex I

The subset(s) of the paediatric population and condition(s) covered by the waiver and the measures and timelines of the agreed Paediatric Investigation Plan

1. Waiver

1.1. Condition: Treatment of asthma

The waiver applies to:

- the paediatric population from birth to less than 5 years of age;
- for:
 - pressurised inhalation, solution;
 - inhalation powder;
- on the grounds that the specific medicinal product does not represent a significant therapeutic benefit over existing treatments.

2. Paediatric Investigation Plan

2.1. Condition: Treatment of asthma

2.1.1. Indication(s) targeted by the PIP

Maintenance therapy of asthma where use of a combination product (inhaled corticosteroid and long-acting beta2-agonist) is appropriate:

- patients not adequately controlled with inhaled corticosteroids and 'as needed' inhaled short-acting beta2-agonist;
- patients already adequately controlled on both inhaled corticosteroids and long-acting beta2-agonists.

2.1.2. Subset(s) of the paediatric population concerned by the paediatric development

From 5 years to less than 18 years of age.

2.1.3. Pharmaceutical form(s)

Pressurised inhalation, solution (pMDI).

Inhalation powder (DPI).

Beclometasone dipropionate plus formoterol fumarate dihydrate 50 µg + 6 µg per actuation, pMDI.

Beclometasone dipropionate plus formoterol fumarate dihydrate 100 µg + 6 µg per actuation, pMDI.

Beclometasone dipropionate plus formoterol fumarate dihydrate 50 µg + 6 µg per actuation, DPI.

Beclometasone dipropionate plus formoterol fumarate dihydrate 100 µg + 6 µg per actuation, DPI.

2.1.4. Studies

Area	Number of studies	Description
Quality	2	Development of an age-appropriate strength: Measure 1 • beclometasone dipropionate (BDP) plus formoterol fumarate dihydrate (FF) 50 + 6 µg per actuation, pMDI, Measure 2 • beclometasone dipropionate plus formoterol fumarate dihydrate 50 µg + 6 µg per actuation, DPI.
Non-clinical		Not applicable.
Clinical	10	Measure 3 Open, randomized, 2-way crossover, single dose PK study in asthmatic children aged 5 years to less than 12 years (Paed 1 – pMDI). Measure 4 Multicentre, randomised, double blind, 12 week, active-controlled, 3-arm parallel group efficacy and safety study in asthmatic children aged 5 years to less than 12 years (Paed 2 – pMDI). Measure 5 Multicentre, randomised, double blind, single dose, placebo and active controlled, 5-period cross-over study to evaluate the dose-related bronchodilator effect in asthmatic children aged 5 years to less than 12 years (Paed 3– pMDI). Measure 6 Open, randomized, 2-way crossover, single dose PK study in asthmatic children aged 5 years to less than 12 years (Paed 4 – DPI). Measure 7 Multicentre, randomised, double blind, 12 week, active-controlled, 3-arm parallel group efficacy and safety study in asthmatic children aged 5 years to less than 12 years (Paed 5 – DPI). Measure 8 Multicentre, randomised, double blind, single dose, placebo and active controlled, 5-period cross-over study to evaluate the dose-related bronchodilator effect in asthmatic children aged 5 years to less than 12 years (Paed 6 – DPI). Measure 9 Single-center, knemometry study in asthmatic children aged 5 years to less than 12 years (pMDI-50/6-KNE). Measure 10 Single-center, knemometry study in asthmatic children aged 5 years to less than 12 years (DPI-50/6-KNE). Measure 11 Open, randomized, 3-way crossover, single dose PK/PD study in asthmatic adolescents 12 to less than 18 years (and adults) (pMDI-100/6-ADO). Measure 12 Open, randomized, 2-way crossover, single dose PK/PD study in Asthmatic adolescents 12 to less than 18 years (and adults)

Area	Number of studies	Description
		(DPI-100/6-ADO).

3. Follow-up, completion and deferral of PIP

Concerns on potential long term safety issues in relation to paediatric use:	Yes
Date of completion of the paediatric investigation plan:	By May 2016
Deferral for one or more measures contained in the paediatric investigation plan:	Yes

Annex II

Information about the authorised medicinal product

Condition(s) and authorised indication(s):

1. Treatment of Asthma

Authorised indications:

Regular treatment of asthma where use of a combination product (inhaled corticosteroid and long-acting beta2-agonist) is appropriate:

- Patients not adequately controlled with inhaled corticosteroids and 'as needed' inhaled short-acting beta2-agonist or;
- Patients already adequately controlled on both inhaled corticosteroids and long-acting beta2-agonists.

Authorised pharmaceutical form(s):

Pressurised inhalation, solution.

Authorised route(s) of administration:

Inhalation use.
