

EMA/480853/2018

European Medicines Agency decision

P/0237/2018

of 15 August 2018

on the agreement of a paediatric investigation plan and on the granting of a deferral and on the granting of a waiver for trimeric, recombinant HIV-1 envelope glycoprotein 140 of Clade C / trimeric, recombinant HIV-1 envelope glycoprotein 140 containing motifs of multiple HIV-1 variants, adjuvanted with aluminium phosphate [Clade C gp140/ Mosaic gp140] (EMEA-002161-PIP01-17) in accordance with Regulation (EC) No 1901/2006 of the European Parliament and of the Council

European Medicines Agency decision

P/0237/2018

of 15 August 2018

on the agreement of a paediatric investigation plan and on the granting of a deferral and on the granting of a waiver for trimeric, recombinant HIV-1 envelope glycoprotein 140 of Clade C / trimeric, recombinant HIV-1 envelope glycoprotein 140 containing motifs of multiple HIV-1 variants, adjuvanted with aluminium phosphate [Clade C gp140/ Mosaic gp140] (EMA-002161-PIP01-17) in accordance with Regulation (EC) No 1901/2006 of the European Parliament and of the Council

The European Medicines Agency,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1901/2006 of the European Parliament and of the Council of 12 December 2006 on medicinal products for paediatric use and amending Regulation (EEC) No. 1768/92, Directive 2001/20/EC, Directive 2001/83/EC and Regulation (EC) No 726/2004¹,

Having regard to Regulation (EC) No 726/2004 of the European Parliament and of the Council of 31 March 2004 laying down Community procedures for the authorisation and supervision of medicinal products for human and veterinary use and establishing a European Medicines Agency²,

Having regard to the application submitted by Janssen-Cilag International NV on 7 July 2017 under Article 16(1) of Regulation (EC) No 1901/2006 also requesting a deferral under Article 20 of said Regulation and a waiver under Article 13 of said Regulation,

Having regard to the opinion of the Paediatric Committee of the European Medicines Agency, issued on 29 June 2018, in accordance with Article 17 of Regulation (EC) No 1901/2006 and Article 21 of said Regulation and Article 13 of said Regulation,

Having regard to Article 25 of Regulation (EC) No 1901/2006,

Whereas:

- (1) The Paediatric Committee of the European Medicines Agency has given an opinion on the agreement of a paediatric investigation plan and on the granting of a deferral and on the granting of a waiver.
- (2) It is therefore appropriate to adopt a decision agreeing a paediatric investigation plan.
- (3) It is therefore appropriate to adopt a decision granting a deferral.
- (4) It is therefore appropriate to adopt a decision granting a waiver.

¹ OJ L 378, 27.12.2006, p.1.

² OJ L 136, 30.4.2004, p. 1.

Has adopted this decision:

Article 1

A paediatric investigation plan for trimeric, recombinant HIV-1 envelope glycoprotein 140 of Clade C / trimeric, recombinant HIV-1 envelope glycoprotein 140 containing motifs of multiple HIV-1 variants, adjuvanted with aluminium phosphate [Clade C gp140/ Mosaic gp140], suspension for injection, intramuscular use, the details of which are set out in the opinion of the Paediatric Committee of the European Medicines Agency annexed hereto, together with its appendices, is hereby agreed.

Article 2

A deferral for trimeric, recombinant HIV-1 envelope glycoprotein 140 of Clade C / trimeric, recombinant HIV-1 envelope glycoprotein 140 containing motifs of multiple HIV-1 variants, adjuvanted with aluminium phosphate [Clade C gp140/ Mosaic gp140], suspension for injection, intramuscular use, the details of which are set out in the opinion of the Paediatric Committee of the European Medicines Agency annexed hereto, together with its appendices, is hereby granted.

Article 3

A waiver for trimeric, recombinant HIV-1 envelope glycoprotein 140 of Clade C / trimeric, recombinant HIV-1 envelope glycoprotein 140 containing motifs of multiple HIV-1 variants, adjuvanted with aluminium phosphate [Clade C gp140/ Mosaic gp140], suspension for injection, intramuscular use, the details of which are set out in the opinion of the Paediatric Committee of the European Medicines Agency annexed hereto, together with its appendices, is hereby granted.

Article 4

This decision is addressed to Janssen-Cilag International NV, Turnhoutseweg 30, 2340 – Beerse, Belgium.

EMA/PDCO/435621/2018

London, 29 June 2018

Opinion of the Paediatric Committee on the agreement of a Paediatric Investigation Plan and a deferral and a waiver

EMA-002161-PIP01-17

Scope of the application

Active substance(s):

Trimeric, recombinant HIV-1 envelope glycoprotein 140 of Clade C / trimeric, recombinant HIV-1 envelope glycoprotein 140 containing motifs of multiple HIV-1 variants, adjuvanted with aluminium phosphate [Clade C gp140/ Mosaic gp140]

Condition(s):

Prevention of human immunodeficiency virus (HIV-1) infection

Pharmaceutical form(s):

Suspension for injection

Route(s) of administration:

Intramuscular use

Name / corporate name of the PIP applicant:

Janssen-Cilag International NV

Basis for opinion

Pursuant to Article 16(1) of Regulation (EC) No 1901/2006 as amended, Janssen-Cilag International NV submitted for agreement to the European Medicines Agency on 7 July 2017 an application for a paediatric investigation plan for the above mentioned medicinal product and a deferral under Article 20 of said Regulation and a waiver under Article 13 of said Regulation.

The procedure started on 12 September 2017.

Supplementary information was provided by the applicant on 30 March 2018. The applicant proposed modifications to the paediatric investigation plan.

Opinion

1. The Paediatric Committee, having assessed the proposed paediatric investigation plan in accordance with Article 17 of Regulation (EC) No 1901/2006 as amended, recommends as set out in the appended summary report:

- to agree the paediatric investigation plan in accordance with Article 17(1) of said Regulation;
- to grant a deferral in accordance with Article 21 of said Regulation;
- to grant a waiver for one or more subsets of the paediatric population in accordance with Article 13 of said Regulation and concluded in accordance with Article 11(1)(c) of said Regulation, on the grounds that the specific medicinal product does not represent a significant therapeutic benefit over existing treatments for paediatric patients.

The Norwegian Paediatric Committee member agrees with the above-mentioned recommendation of the Paediatric Committee.

2. The measures and timelines of the agreed paediatric investigation plan and the subset(s) of the paediatric population and condition(s) covered by the waiver are set out in the Annex I.

This opinion is forwarded to the applicant and the Executive Director of the European Medicines Agency, together with its annex and appendix.

Annex I

The subset(s) of the paediatric population and condition(s) covered by the waiver and the measures and timelines of the agreed paediatric investigation plan (PIP)

1. Waiver

1.1. Condition:

Prevention of human immunodeficiency virus (HIV-1) infection

The waiver applies to:

- the paediatric population from birth to less than 9 years of age;
- suspension for injection, intramuscular use;
- on the grounds that clinical studies with the specific medicinal product cannot be expected to be of significant therapeutic benefit to or fulfil a therapeutic need of the specified paediatric subset(s).

2. Paediatric investigation plan

2.1. Condition:

Prevention of human immunodeficiency virus (HIV-1) infection

2.1.1. Indication(s) targeted by the PIP

Prevention of human immunodeficiency virus (HIV-1) infection

2.1.2. Subset(s) of the paediatric population concerned by the paediatric development

From 9 to less than 18 years of age

2.1.3. Pharmaceutical form(s)

Suspension for injection

2.1.4. Measures

Area	Number of measures	Description
Quality-related studies	0	Not applicable
Non-clinical studies	0	Not applicable
Clinical studies	1	Study 1 Double-blind, randomised, placebo-controlled trial to evaluate safety, tolerability and immunogenicity of the prophylactic HIV-1 vaccine regimen in healthy children from 9 to less than 18 years of age <i>This study is the same as study 1 of PIP EMEA-002221-PIP01-17 and subsequent modifications thereof and of EMEA-002160-PIP01-17 and subsequent modifications thereof.</i>

Extrapolation, modelling and simulation studies	0	Not applicable
Other studies	0	Not applicable
Other measures	0	Not applicable

3. Follow-up, completion and deferral of PIP

Concerns on potential long term safety/efficacy issues in relation to paediatric use:	No
Date of completion of the paediatric investigation plan:	By March 2026
Deferral for one or more measures contained in the paediatric investigation plan:	Yes
