European Medicines Agency decision

P/0398/2024

of 17 December 2024

on the agreement of a paediatric investigation plan and on the granting of a deferral and on the granting of a waiver for olorofim, (EMA-003564-PIP01-23) in accordance with Regulation (EC) No 1901/2006 of the European Parliament and of the Council

The European Medicines Agency,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1901/2006 of the European Parliament and of the Council of 12 December 2006 on medicinal products for paediatric use and amending Regulation (EEC) No. 1768/92, Directive 2001/20/EC, Directive 2001/83/EC and Regulation (EC) No 726/2004¹,

Having regard to Regulation (EC) No 726/2004 of the European Parliament and of the Council of 31 March 2004 laying down Union procedures for the authorisation and supervision of medicinal products for human use and establishing a European Medicines Agency²,

Having regard to the application submitted by Shionogi BV on 18 December 2023 under Article 16(1) of Regulation (EC) No 1901/2006 also requesting a deferral under Article 20 of said Regulation and a waiver under Article 13 of said Regulation,

Having regard to the opinion of the Paediatric Committee of the European Medicines Agency, issued on 18 October 2024, in accordance with Article 17 of Regulation (EC) No 1901/2006 and Article 21 of said Regulation and Article 13 of said Regulation,

Having regard to Article 25 of Regulation (EC) No 1901/2006,

Whereas:

- (1) The Paediatric Committee of the European Medicines Agency has given an opinion on the agreement of a paediatric investigation plan and on the granting of a deferral and on the granting of a waiver.
- (2) It is therefore appropriate to adopt a decision agreeing a paediatric investigation plan.
- (3) It is therefore appropriate to adopt a decision granting a deferral.
- (4) It is therefore appropriate to adopt a decision granting a waiver.

¹ OJ L 378, 27.12.2006, p.1, as amended.

² OJ L 136, 30.4.2004, p. 1, as amended.

Has adopted this decision:

Article 1

A paediatric investigation plan for olorofim, film-coated tablet, granules, oral use, the details of which are set out in the opinion of the Paediatric Committee of the European Medicines Agency annexed hereto, together with its appendices, is hereby agreed.

Article 2

A deferral for olorofim, film-coated tablet, granules, oral use, the details of which are set out in the opinion of the Paediatric Committee of the European Medicines Agency annexed hereto, together with its appendices, is hereby granted.

Article 3

A waiver for olorofim, film-coated tablet, granules, oral use, the details of which are set out in the opinion of the Paediatric Committee of the European Medicines Agency annexed hereto, together with its appendices, is hereby granted.

Article 4

This decision is addressed to Shionogi BV, Herengracht 464, 1017 CA – Amsterdam, The Netherlands.

EMA/PDCO/334337/2024
Amsterdam, 18 October 2024

Opinion of the Paediatric Committee on the agreement of a Paediatric Investigation Plan and a deferral and a waiver

EMA-003564-PIP01-23

Scope of the application

Active substance(s):

Olorofim

Invented name and authorisation status:

See Annex II

Condition(s):

Treatment of invasive aspergillosis

Treatment of non-*Aspergillus* invasive mould infections

Pharmaceutical form(s):

Film-coated tablet

Granules

Route(s) of administration:

Oral use

Name/corporate name of the PIP applicant:

Shionogi BV

Basis for opinion

Pursuant to Article 16(1) of Regulation (EC) No 1901/2006 as amended, Shionogi BV submitted for agreement to the European Medicines Agency on 18 December 2023 an application for a paediatric investigation plan for the above mentioned medicinal product and a deferral under Article 20 of said Regulation and a waiver under Article 13 of said Regulation.

The procedure started on 22 January 2024.

Supplementary information was provided by the applicant on 4 July 2024. The applicant proposed modifications to the paediatric investigation plan.

Opinion

1. The Paediatric Committee, having assessed the proposed paediatric investigation plan in accordance with Article 17 of Regulation (EC) No 1901/2006 as amended, recommends as set out in the appended summary report:

- to agree the paediatric investigation plan in accordance with Article 17(1) of said Regulation;
- to grant a deferral in accordance with Article 21 of said Regulation;
- to grant a waiver for one or more subsets of the paediatric population in accordance with Article 13 of said Regulation and concluded in accordance with Article 11(1)(c) of said Regulation, on the grounds that the specific medicinal product does not represent a significant therapeutic benefit over existing treatments for paediatric patients.

The Paediatric Committee member of Norway agrees with the above-mentioned recommendation of the Paediatric Committee.

2. The measures and timelines of the agreed paediatric investigation plan and the subset(s) of the paediatric population and condition(s) covered by the waiver are set out in the Annex I.

This opinion is forwarded to the applicant and the Executive Director of the European Medicines Agency, together with its annexes and appendix.

Annex I

The subset(s) of the paediatric population and condition(s) covered by the waiver and the measures and timelines of the agreed paediatric investigation plan (PIP)

1. Waiver

1.1. Condition:

Treatment of invasive aspergillosis

The waiver applies to:

- the paediatric population from birth to less than 28 days of age;
- film-coated tablet, granules, oral use;
- on the grounds that the specific medicinal product does not represent a significant therapeutic benefit as clinical studies(s) are not feasible.

1.2. Condition:

Treatment of non-*Aspergillus* invasive mould infections

The waiver applies to:

- the paediatric population from birth to less than 28 days of age;
- film-coated tablet, granules, oral use;
- on the grounds that the specific medicinal product does not represent a significant therapeutic benefit as clinical studies(s) are not feasible.

2. Paediatric investigation plan

2.1. Condition:

Treatment of invasive aspergillosis

2.1.1. Indication(s) targeted by the PIP

Treatment of invasive fungal infections due to orofim-susceptible mould fungi

2.1.2. Subset(s) of the paediatric population concerned by the paediatric development

From 28 days to less than 18 years of age

2.1.3. Pharmaceutical form(s)

Film-coated tablet

Granules

2.1.4. Measures

Area	Description
Quality-related studies	Study 1 Development of an age-appropriate granule formulation of orofim for oral administration.

Non-clinical studies	Not applicable
Clinical studies	Study 2 Single dose (Part 1) and multiple dose, (Part 2), open-label, single-arm trial to assess the pharmacokinetics and safety of olorofim in children aged 28 days to less than 18 years that are candidates to receive mould-active antifungal prophylaxis (Part 1 only) or who have possible, probable, or proven invasive mould infection (IMI).
Modelling and simulation analyses	Study 3 Population Pharmacokinetic (PopPK) modelling and simulation study to confirm or modify the paediatric posology to be used in PIP study 2
Other studies	Not applicable
Extrapolation plan	Studies 2 and 3 are part of an extrapolation plan covering the paediatric population from 28 days to less than 18 years of age, as agreed by the PDCO.

2.2. Condition:

Treatment of non-*Aspergillus* invasive mould infections

2.2.1. Indication(s) targeted by the PIP

Treatment of invasive fungal infections due to olorofim-susceptible mould fungi

2.2.2. Subset(s) of the paediatric population concerned by the paediatric development

From 28 days to less than 18 years of age

2.2.3. Pharmaceutical form(s)

Film-coated tablet

Granules

2.2.4. Measures

Area	Description
Quality-related studies	Study 1 (same as for condition Treatment of invasive aspergillosis) Development of an age-appropriate granule formulation of olorofim for oral administration.
Non-clinical studies	Not applicable

Clinical studies	Study 2 (same as for condition Treatment of invasive aspergillosis) Single dose (Part 1) and multiple dose (Part 2), open-label, single-arm trial to assess the pharmacokinetics and safety of olorofim in children aged 28 days to less than 18 years that are candidates to receive mould-active antifungal prophylaxis (Part 1 only) or who have possible, probable, or proven invasive mould infection (IMI).
Modelling and simulation analyses	Study 3 (same as for condition Treatment of invasive aspergillosis) Population Pharmacokinetic (PopPK) modelling and simulation study to confirm or modify the paediatric posology to be used in PIP study 2
Other studies	Not applicable
Extrapolation plan	Studies 2 and 3 are part of an extrapolation plan covering the paediatric population from 28 days to less than 18 years of age, as agreed by the PDCO.

3. Follow-up, completion and deferral of PIP

Concerns on potential long term safety/efficacy issues in relation to paediatric use:	No
Date of completion of the paediatric investigation plan:	By July 2036
Deferral for one or more measures contained in the paediatric investigation plan:	Yes

Annex II
