European Medicines Agency decision

P/30/2011

of 28 January 2011

on the acceptance of a modification of an agreed paediatric investigation plan for ticagrelor (EMA-000480-PIP01-08-M01) in accordance with Regulation (EC) No 1901/2006 of the European Parliament and of the Council

The European Medicines Agency,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1901/2006 of the European Parliament and of the Council of 12 December 2006 on medicinal products for paediatric use and amending Regulation (EEC) No. 1768/92, Directive 2001/20/EC, Directive 2001/83/EC and Regulation (EC) No 726/2004¹,

Having regard to Regulation (EC) No 726/2004 of the European Parliament and of the Council of 31 March 2004 laying down Community procedures for the authorisation and supervision of medicinal products for human and veterinary use and establishing a European Medicines Agency²,

Having regard to the European Medicines Agency's decision P/199/2009 issued on 2 October 2009,

Having regard to the application submitted by AstraZeneca AB on 1 October 2010 under Article 22 of Regulation (EC) No 1901/2006 proposing changes to the agreed paediatric investigation plan with a deferral and a waiver,

Having regard to the opinion of the Paediatric Committee of the European Medicines Agency, issued on 10 December 2010, in accordance with Article 22 of Regulation (EC) No 1901/2006,

Having regard to Article 25 of Regulation (EC) No 1901/2006,

Whereas:

- (1) The Paediatric Committee of the European Medicines Agency has given an opinion on the acceptance of changes to the agreed paediatric investigation plan.
- (2) It is therefore appropriate to adopt a decision on the acceptance of changes to the agreed paediatric investigation plan,

¹ OJ L 378, 27.12.2006, p.1.

² OJ L 136, 30.4.2004, p. 1.

Has adopted this decision:

Article 1

Changes to the agreed paediatric investigation plan for ticagrelor, film-coated tablet, age appropriate formulation(s) to be developed, oral use, are hereby accepted in the scope set out in the opinion of the Paediatric Committee of the European Medicines Agency annexed hereto, together with its appendices.

Article 2

This decision is addressed to AstraZeneca AB, Building 411A, Floor 4, S-151 85 – Sodertalje, Sweden.

Done at London, 28 January 2011

For the European Medicines Agency
Andreas Pott
Acting Executive Director

EMA/PDCO/776066/2010

Opinion of the Paediatric Committee on the acceptance of a modification of an agreed Paediatric Investigation Plan

EMA-000480-PIP01-08-M01

Scope of the application

Active substance(s):

Ticagrelor

Condition(s):

Thromboembolic events

Pharmaceutical form(s):

Film-coated tablet

Age appropriate formulation(s) to be developed

Route(s) of administration:

Oral use

Name/corporate name of the PIP applicant:

AstraZeneca AB

Basis for opinion

Pursuant to Article 22 of Regulation (EC) No 1901/2006 as amended, AstraZeneca AB submitted to the European Medicines Agency on 1 October 2010 an application for modification of the agreed paediatric investigation plan with a deferral and a waiver as set out in the European Medicines Agency's decision P/199/2009 issued on 2 October 2009.

The application for modification proposed changes to the agreed paediatric investigation plan.

The procedure started on 13 October 2010.

Scope of the modification

Some of the agreed measures and timelines have been modified.

Opinion

1. The Paediatric Committee, having assessed the application in accordance with Article 22 of Regulation (EC) No 1901/2006 as amended, recommends as set out in the appended summary report:
 - to agree to changes to the paediatric investigation plan in the scope set out in the Annex I of this opinion.

The Icelandic and the Norwegian Paediatric Committee member(s) agree with the above-mentioned recommendation of the Paediatric Committee.

2. The measures and timelines of the paediatric investigation plan and the subset(s) of the paediatric population and condition(s) covered by the waiver are set out in the Annex I.

This opinion is forwarded to the applicant and the Executive Director of the European Medicines Agency, together with its annex(es) and appendix.

London, 10 December 2010

On behalf of the Paediatric Committee
Dr Daniel Brasseur, Chairman
(Signature on file)

Annex I

The subset(s) of the paediatric population and condition(s) covered by the waiver and the measures and timelines of the agreed Paediatric Investigation Plan

1. Waiver

1.1. Condition: Thromboembolic events

Condition/Indication: Acute coronary syndrome

The waiver applies to:

- All subsets of the paediatric population from birth to less than 18 years of age,
- for film-coated tablet, age appropriate formulation(s) to be developed, oral use,
- on the grounds that the disease or condition for which the specific medicinal product is intended does not occur in the specified paediatric subset(s).

2. Paediatric Investigation Plan

2.1. Condition: Thromboembolic events

2.1.1. Indication(s) targeted by the PIP

Prevention of thrombosis and thromboembolic events in paediatric patients with a central venous catheter.

2.1.2. Subset(s) of the paediatric population concerned by the paediatric development

From 0 to less than 18 years.

2.1.3. Pharmaceutical form(s)

Film-coated tablet, age appropriate formulation(s) to be developed, oral use

2.1.4. Studies

Area	Number of studies	Description
Quality	1	Development of age appropriate formulation(s) for oral use for paediatric patients below the age of 6 years.
Non-clinical	4	Dose Range-Finding Study in Suckling Rats. Definitive study in Suckling Rats. Definitive Study in Weaning Rats. Suckling rat lung function study.

Clinical	3	Double-blind, dose-escalating study in patients aged 0 to less than 18 years of age who have a central venous catheter to determine the age-appropriate dose of ticagrelor as add on to standard-of-care treatment. Randomized, double-blind, placebo-controlled study to assess the safety and efficacy of ticagrelor added to standard of care compared with standard of care alone in patients from 6 to less than 18 years of age at risk for thrombosis due to the presence of a central venous catheter. Randomised, double-blind, placebo-controlled study evaluating the safety of ticagrelor added to standard of care compared with standard of care alone in patients from 0 to less than 8 years of age who have a central venous catheter.
----------	---	--

3. Follow-up, completion and deferral of PIP

Measures to address long term follow-up of potential safety issues in relation to paediatric use:	Yes
Date of completion of the paediatric investigation plan:	By December 2019.
Deferral for one or more studies contained in the paediatric investigation plan:	Yes
