An agency of the European Union

European Medicines Agency decision

P/0203/2019

of 12 June 2019

on the acceptance of a modification of an agreed paediatric investigation plan for palbociclib (IBRANCE), (EMA-002146-PIP01-17-M01) in accordance with Regulation (EC) No 1901/2006 of the European Parliament and of the Council

The European Medicines Agency,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1901/2006 of the European Parliament and of the Council of 12 December 2006 on medicinal products for paediatric use and amending Regulation (EEC) No. 1768/92, Directive 2001/20/EC, Directive 2001/83/EC and Regulation (EC) No 726/2004¹,

Having regard to Regulation (EC) No 726/2004 of the European Parliament and of the Council of 31 March 2004 laying down Community procedures for the authorisation and supervision of medicinal products for human and veterinary use and establishing a European Medicines Agency²,

Having regard to the European Medicines Agency's decision P/0209/2018 issued on 17 July 2018,

Having regard to the application submitted by Pfizer Europe MA EEIG on 17 January 2019 under Article 22 of Regulation (EC) No 1901/2006 proposing changes to the agreed paediatric investigation plan with a waiver,

Having regard to the opinion of the Paediatric Committee of the European Medicines Agency, issued on 26 April 2019, in accordance with Article 22 of Regulation (EC) No 1901/2006,

Having regard to Article 25 of Regulation (EC) No 1901/2006,

Whereas:

- (1) The Paediatric Committee of the European Medicines Agency has given an opinion on the acceptance of changes to the agreed paediatric investigation plan.
- (2) It is therefore appropriate to adopt a decision on the acceptance of changes to the agreed paediatric investigation plan.

¹ OJ L 378, 27.12.2006, p.1.

² OJ L 136, 30.4.2004, p. 1.

Has adopted this decision:

Article 1

Changes to the agreed paediatric investigation plan for palbociclib (IBRANCE), capsule, hard, age-appropriate oral dosage form, oral use, are hereby accepted in the scope set out in the opinion of the Paediatric Committee of the European Medicines Agency annexed hereto, together with its appendices.

Article 2

This decision is addressed to Pfizer Europe MA EEIG, Boulevard de la Plaine 17, 1050 – Brussels, Belgium.

EUROPEAN MEDICINES AGENCY
SCIENCE MEDICINES HEALTH

EMA/PDCO/44138/2019
Amsterdam, 26 April 2019

Opinion of the Paediatric Committee on the acceptance of a modification of an agreed Paediatric Investigation Plan EMA-002146-PIP01-17-M01

Scope of the application

Active substance(s):

Palbociclib

Invented name:

IBRANCE

Condition(s):

Treatment of Ewing sarcoma

Authorised indication(s):

See Annex II

Pharmaceutical form(s):

Capsule, hard

Age-appropriate oral dosage form

Route(s) of administration:

Oral use

Name/corporate name of the PIP applicant:

Pfizer Europe MA EEIG

Information about the authorised medicinal product:

See Annex II

Basis for opinion

Pursuant to Article 22 of Regulation (EC) No 1901/2006 as amended, Pfizer Europe MA EEIG submitted to the European Medicines Agency on 17 January 2019 an application for modification of the agreed paediatric investigation plan with a waiver as set out in the European Medicines Agency's decision P/0209/2018 issued on 17 July 2018.

The application for modification proposed changes to the agreed paediatric investigation plan.

The procedure started on 26 February 2019.

Scope of the modification

Some measures and timelines of the Paediatric Investigation Plan have been modified.

Opinion

1. The Paediatric Committee, having assessed the application in accordance with Article 22 of Regulation (EC) No 1901/2006 as amended, recommends as set out in the appended summary report:
 - to agree to changes to the paediatric investigation plan in the scope set out in the Annex I of this opinion.

The Norwegian Paediatric Committee member agrees with the above-mentioned recommendation of the Paediatric Committee.

2. The measures and timelines of the paediatric investigation plan and the subset(s) of the paediatric population and condition(s) covered by the waiver are set out in the Annex I.

This opinion is forwarded to the applicant and the Executive Director of the European Medicines Agency, together with its annexes and appendix.

Annex I

The subset(s) of the paediatric population and condition(s) covered by the waiver and the measures and timelines of the agreed paediatric investigation plan (PIP)

1. Waiver

1.1. Condition:

Treatment of Ewing sarcoma

The waiver applies to:

- the paediatric population from birth to less than 2 years of age;
- capsule, hard, age-appropriate oral dosage form, oral use;
- on the grounds that clinical studies with the specific medicinal product cannot be expected to be of significant therapeutic benefit to or fulfil a therapeutic need of the specified paediatric subset(s).

2. Paediatric investigation plan

2.1. Condition:

Treatment of Ewing sarcoma

2.1.1. Indication(s) targeted by the PIP

In combination with temozolomide and irinotecan for the treatment of patients from 2 years to less than 18 years of age with refractory or recurrent Ewing sarcoma

2.1.2. Subset(s) of the paediatric population concerned by the paediatric development

From 2 years to less than 18 years of age

2.1.3. Pharmaceutical form(s)

- Capsule, hard
- Age-appropriate oral dosage form

2.1.4. Measures

Area	Number of measures	Description
Quality-related studies	1	Study 1 Development of an oral solution formulation for paediatric patients unable to swallow the capsules
Non-clinical studies	2	Study 2 In <i>vivo</i> study to assess the anti-tumour activity of palbociclib used in combination with irinotecan and temozolomide compared irinotecan and temozolomide alone in Ewing sarcoma xenografts

		<p>Study 3</p> <p>In <i>vitro</i> study to evaluate the anti-tumour activity of palbociclib used in with irinotecan in Ewing sarcoma (EWS) cell lines</p>
Clinical studies	2	<p>Study 4</p> <p>Open-label, single-arm dose-escalation trial to evaluate the safety, pharmacokinetics and anti-tumour activity of palbociclib used in combination with temozolomide and irinotecan in children from 2 years to less than 18 years of age (and young adults) with a recurrent or refractory solid tumour with a dose-finding phase (dose-escalation part) and an expansion cohort (dose expansion part) (A5481092)</p> <p>Study 5</p> <p>Open-label, randomised controlled trial to evaluate the efficacy, safety and pharmacokinetics of palbociclib used in combination with temozolomide and irinotecan as compared to temozolomide and irinotecan alone in children from 4 years to less than 18 years of age (and adults) with recurrent and /or refractory Ewing sarcoma (rEECur, palbociclib in combination with temozolomide and irinotecan arm)</p>
Extrapolation, modelling and simulation studies	0	Not applicable
Other studies	0	Not applicable
Other measures	0	Not applicable

3. Follow-up, completion and deferral of PIP

Concerns on potential long term safety/efficacy issues in relation to paediatric use:	Yes
Date of completion of the paediatric investigation plan:	By June 2023
Deferral for one or more measures contained in the paediatric investigation plan:	No

Annex II

Information about the authorised medicinal product

Condition(s) and authorised indication(s):

1. Treatment of breast malignant neoplasms

Authorised indication(s):

- IBRANCE is indicated for the treatment of hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative locally advanced or metastatic breast cancer:
 - in combination with an aromatase inhibitor;
 - in combination with fulvestrant in women who have received prior endocrine therapy.

In pre- or perimenopausal women, the endocrine therapy should be combined with a luteinizing hormone-releasing hormone (LHRH) agonist.

Authorised pharmaceutical form(s):

Capsule, hard

Authorised route(s) of administration:

Oral use
