New product information wording – Extracts from PRAC recommendations on signals
Adopted at the 3-6 July 2023 PRAC

The product information wording in this document is extracted from the document entitled ‘PRAC recommendations on signals’ which contains the whole text of the PRAC recommendations for product information update, as well as some general guidance on the handling of signals. It can be found here (in English only).

New text to be added to the product information is underlined. Current text to be deleted is struck through.

1. Olaparib – Hepatocellular damage and hepatitis (EPITT no 19846)

Summary of product characteristics

4.4. Special warnings and precautions for use

Hepatotoxicity

Cases of hepatotoxicity have been reported in patients treated with olaparib (see section 4.8). If clinical symptoms or signs suggestive of hepatotoxicity develop, prompt clinical evaluation of the patient and measurement of liver function tests should be performed. In case of suspected drug-induced liver injury (DILI), treatment should be interrupted. In case of severe DILI treatment discontinuation should be considered as clinically appropriate.

4.8. Undesirable effects

Table 1 Tabulated list of adverse reactions
### MedDRA System Organ Class
