

Fate of VMPs in manure – Outline of the day

- Presentations
 - Joop De Knecht
 - Leo Van Leemput
 - Gregor Scheef
 - Robert Kreuzig
- Design of studies to examine the fate of VMPs
 - Selection and handling of the test manure
 - Matrix characterisation
 - Establishing test conditions
 - Test substance
 - Extraction and determination of the test substance, metabolites and non extractable residues
 - Data analysis

Fate of VMPs in manure – Outline of the day

- Evaluation and use of the test results
 - Extrapolation of biotic and abiotic transformation of VMPs within and between manure types
 - Defining realistic and representative storage conditions for standardisation
 - Use of test results to refine PECs
 - Identification of relevant metabolites

Fate of VMPs in manure – Objectives

- Emphasis on guidance as strategy (vs protocol)
- To debate/discuss each of the topics in turn in order to produce for each one decisions or recommendations on how the topic is to be addressed in the guideline.
- For those areas where agreement cannot be reached to produce an action plan for the gathering of information/data so that a decision and/or recommendations can be reached
