Comments received

- Importance of One Health Approach
- Support to collection of data by animal species
- Support to DDDvet and DCDvet
- Collect data by species step by step
- Do not forget companion animals and fish
- Link to EC action plan on AMR

Comments received (cont.)

- Some of the comments go beyond the strategy -> mostly addressed in RONAFA
- Data to be collected from all countries
- Harmonized definition of the different age/production of animals
- Validity / accuracy of the data
- ESVAC database, should be part of the EMA SPOR data repository
- Confidentiality to be carefully considered

Changes in strategy

Few, mostly on terminology and weight of each of pillar.

Reference to opinion in indicators added.

Thank you for your attention
