

## EU Big Data Stakeholder Forum 2024

---

28 November 2024

Session 4

Presented by Anne Cambon-Thomsen. CNRS, CERPOP, Centre of epidemiology and research on population health, Inserm, University of Toulouse, France

Ethics expert, HMA-EMA Big Data Steering Group member

# Ethical challenges for EMRN network strategy

- Unified network or articulated network
- Characterisation of ethical options in their diversity are metadata to consider (ex : consent category)
- Ethics embedded in training (ex work on characterisation of ethics diverse positions, Catalogue of ethics cases)
- Practical ethics literacy

Characterise what does mean :

- « to the highest ethical standards »
- « as open as possible, as close as necessary » in defined contexts

Construct and train on:

- Practical ethics literacy

Document the possible conflict of interests also in the use of « ethics reasons »
