Data Governance Act-EHDS

DGA:

- minimum rules for access to data applicable to all sectors
- a single information point
- body with support function
- national authority for providers of data sharing services
- data altruism organisations
- European Data Innovation Board

EHDS:

- Health specific
- data permit authority/support function
- sectoral bodies for interoperability
- sectoral bodies on data altruism/data permit authorities
- EU level body on secondary use of health data

European Commission

EHDS1: MyHealth@EU: cross-border exchange of patients' data

EHDS2: access to data for research and policy making (secondary use of health data)

EHDS2 NODEs are the entry point for stakeholders into the EHDS

EHDS2 NODEs can be established by National or Trans-national stakeholders

EHDS2 NODEs follow common policies and interoperability specifications

DATA Holders make health data available for research and policy making

DATA Consumers use data for research or policy making

Pilot architecture - 2021
