

# EU Big Data Stakeholder Forum Opportunities, Challenges, Priorities, Risks & Collaboration.

EMA Big Data Stakeholder Forum Virtual Meeting

December 15<sup>th</sup>, 2020

Álmath Spooner on behalf of

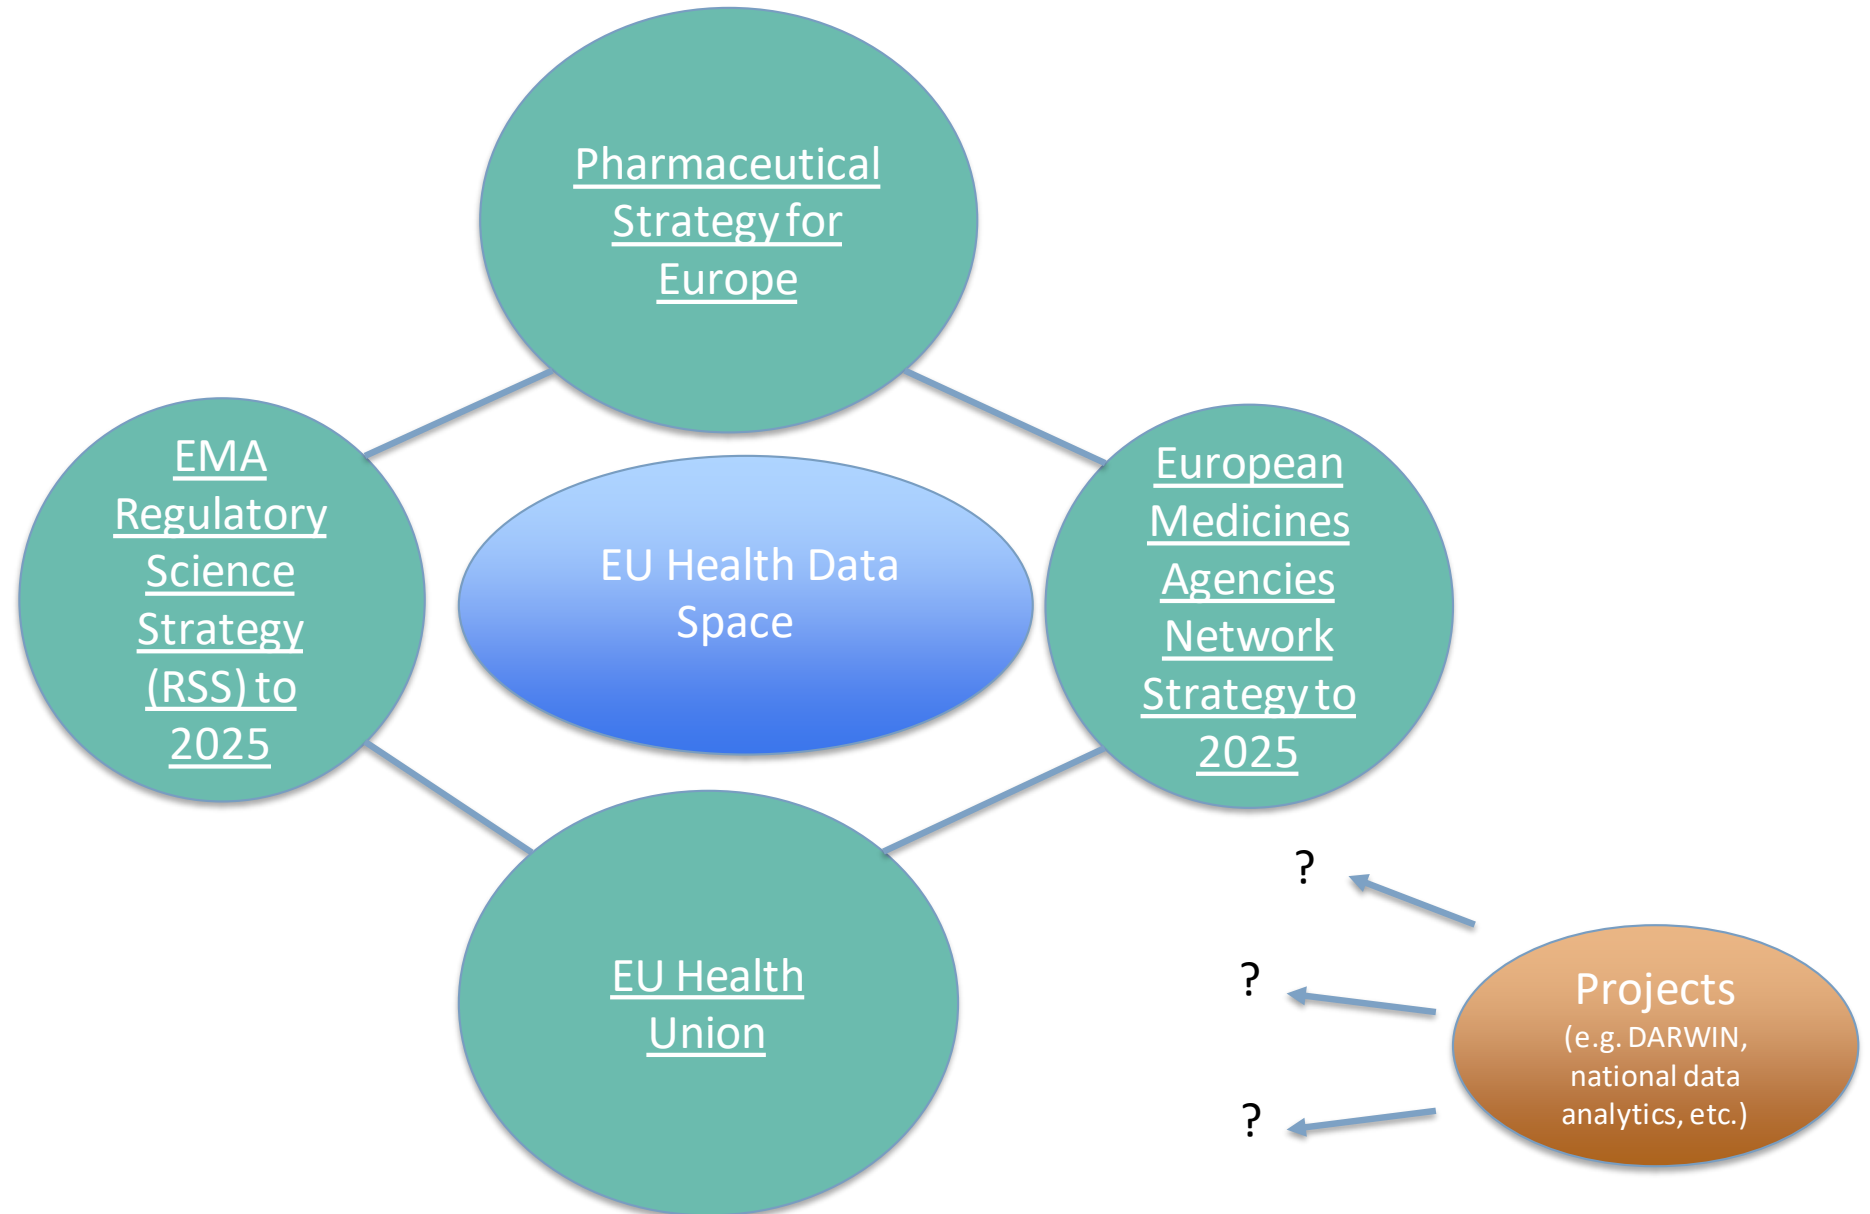

The European Association for Bioindustries

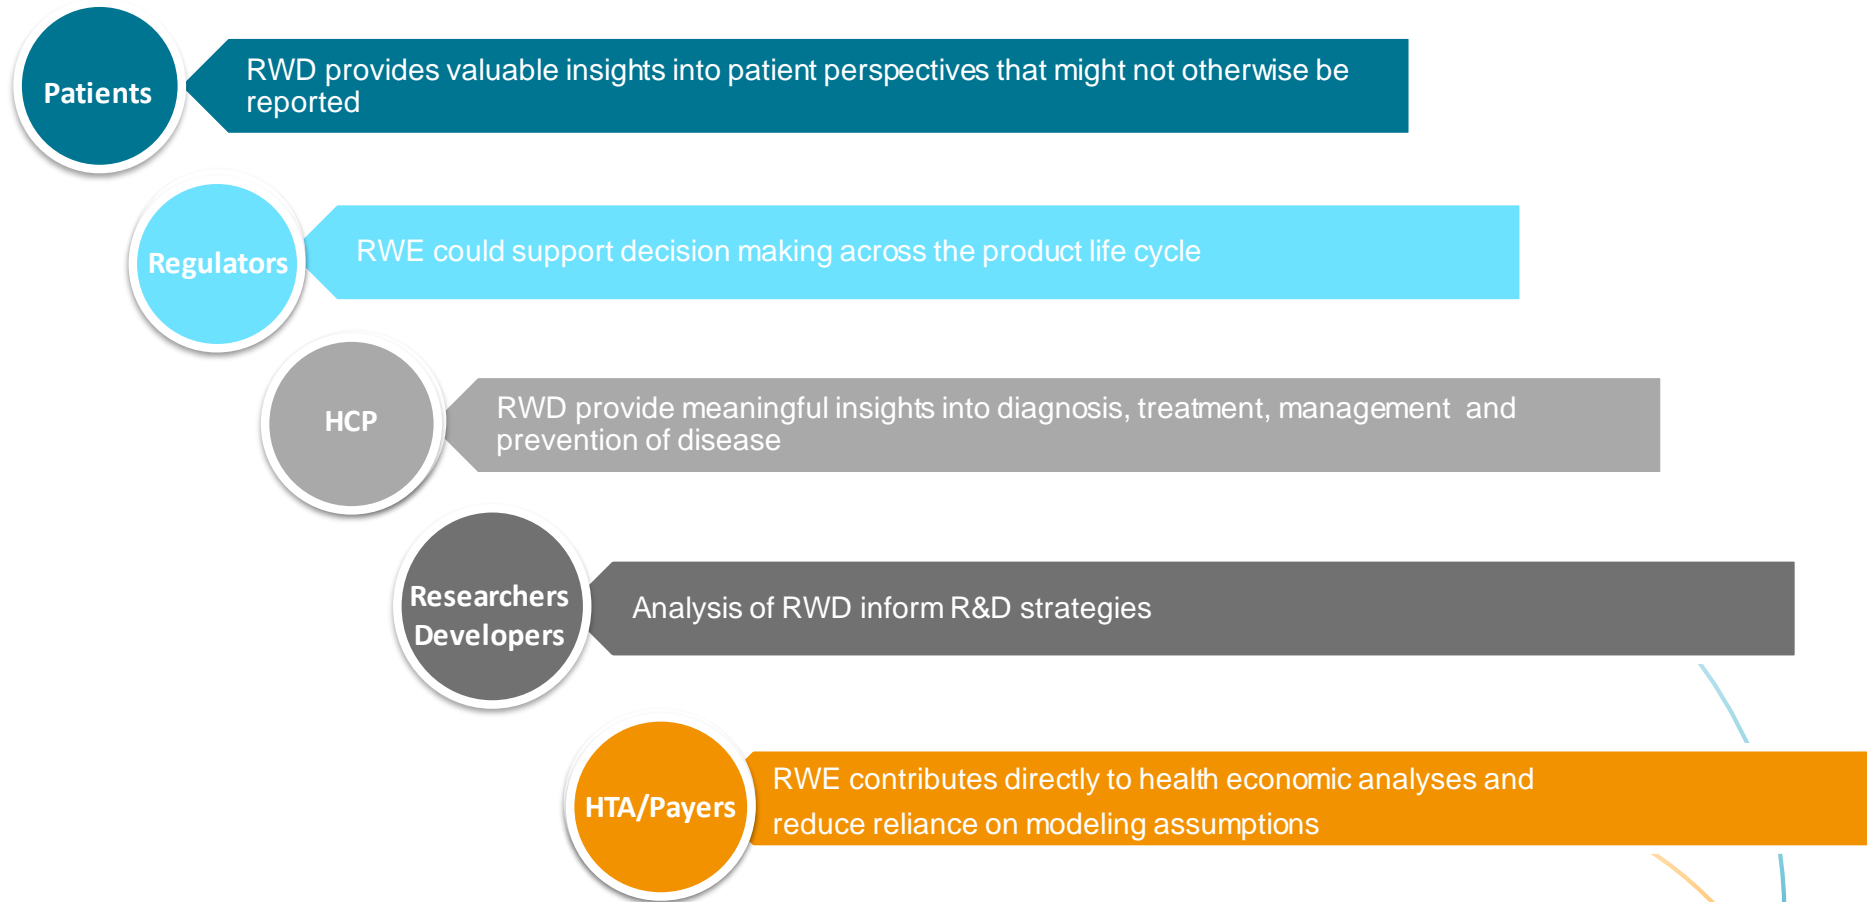

European Federation of Pharmaceutical  
Industries and Associations

# Review of European Regulatory Ecosystem to be Fit-For-Future

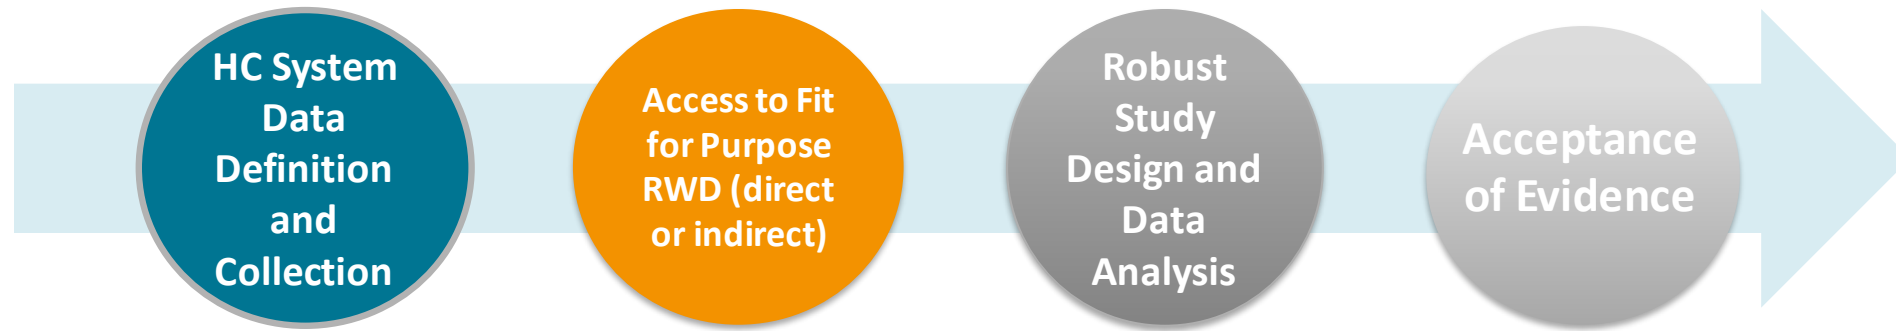

# Opportunities - Value for stakeholders

And many more credible evidence and insights

# Challenges for RWD /RWE

## Challenges

Major questions around relevance, depth and quality of source data

Data privacy and access issues

Familiarity with and acceptance of study designs & robust analytical methods

---

## How to address challenges and strengthen the use of RWD/RWE

**Improve the quality, relevance and interoperability of RWD source**

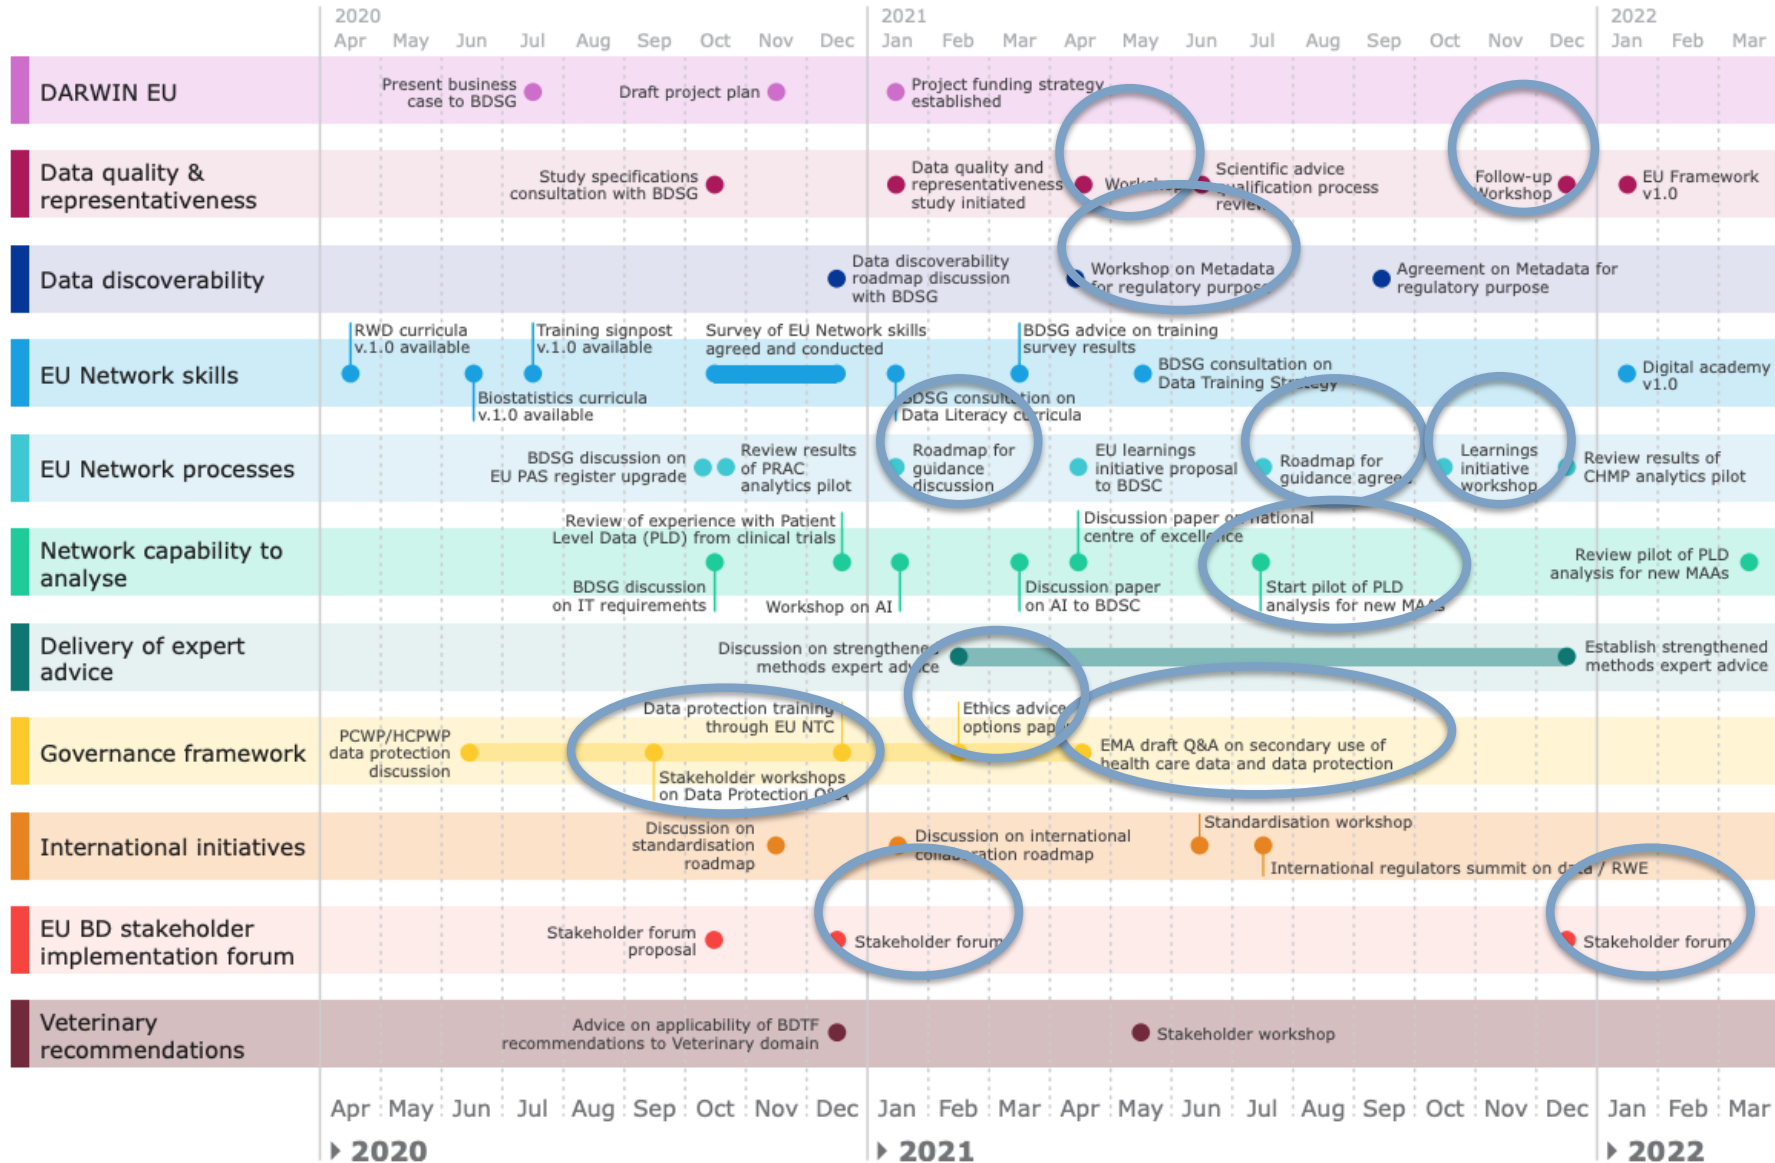

**Achieve sustainable, appropriate access and use of RWD addressing data privacy concerns (e.g. GDPR)**

**Develop best practices regarding study design and analytical approaches. Define plans prospectively**

**Drive acceptance through multi-stakeholder interactions, discussion on use cases and development of guidance**

# EMA/HMA Big Data SG workplan – Transparency & Timelines

## THE HMA-EMA JOINT BIG DATA STEERING GROUP WORKPLAN

# Priorities

---

- Establish an EU framework for **data quality and representativeness**: Develop guidelines, a strengthened process for data qualification through Scientific Advice and promote Member State uptake of EHRs, registries, genomics data, and secure data availability.
- Ensure data are managed and analysed within a **secure and ethical governance framework**: Engage with initiatives on the *harmonisation* of EU data protection regulations, engage with *medicines developers*, patients and healthcare professionals on data governance, establish an Ethics Advisory Committee.
- Modernise the **delivery of expert advice**: Establish a Methodologies Working Party (RWD, epidemiology, advanced analytics, etc). This can be supported by the conduct of **pilots** and **learning from national and global experience**.
- Deliver a **sustainable platform to access and analyse EU healthcare data** (DARWIN) including developing EU **network capability** for big data analysis. Equitable access a priority.

# Areas for Collaboration

-  Common understanding of what constitutes fit for the intended purpose
-  Demonstration by case studies and share learnings
-  Development of guidance and best practices
-  Striving for internationally harmonised approaches & agreement on standardised outcomes
-  Extensive stakeholder interaction

## How to move forward?

RWD / RWE has **great potential to improve patient lives their experience of care and to increase the efficiency of the healthcare system.**

Everything needs to be **connected and aligned** or we risk not having:

- well-resourced healthcare organisations designed to enhance delivery of quality care and to provide high quality RWD to accessible research platforms
- the necessary collaboration to develop high quality data and research networks that allow the integration and interoperability of data from a wide range of sources
- the capacity to generate evidence and insights based on RWD using a variety of designs and methodologies which are fit for purpose and accepted by relevant stakeholders

Thank you !
