Background and context

- The ACT EU multi-stakeholder workshop on Clinical Trials Analytics in January 2024 brought together different stakeholders with a collective ambition: [to identify research priorities that maximise the value of CT data to support evidence-based decision making and fuel innovation.](#)
- A key takeaway was that access to data for patients & patient organisations is critical for informed decision-making and effective advocacy.

“

...a simple, patient oriented, dashboard available in CTIS, that patients, their carers or their healthcare professionals, can use to locate potentially suitable trials for the patient, should be set up by EMA.”

Patient representative at the ACT EU CT Analytics workshop, Jan 2024

The ACT EU Trial Map

- Integrated in the CTIS Public Portal
- Empowers patients and healthcare professionals:
 - Provides easy **access to information** about clinical trials operating in a geographic area
 - Gives an overview of site distributions to **support advocacy efforts** regarding clinical trial access
 - Improves **access to trials** by making it easy to find the contact information for each clinical trial site
 - Increases **findability of trials** by allowing for medical condition searches in lay language (through the Consumer Health Vocabulary)
- Currently the map supports searches in English - more EU languages to be available in the future

We want your feedback

- Send us your comments and suggestions for improvements via the [EUSurvey](#)
- Feedback will inform future versions of the Trial Map

Thank you
