

ESVAC Stakeholder meeting 2016

FVE input

London, 2 March 2016

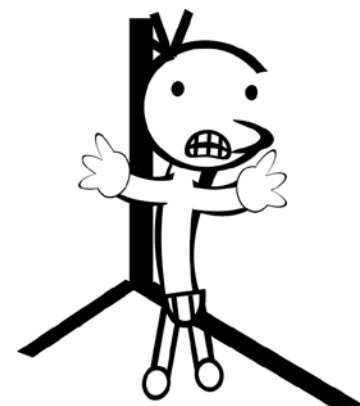

Federation of
Veterinarians of Europe

Exciting times

www.fve.org

- Revision medicated feed/vet med legislation
- Re-evaluation EC action plan on AMR
- Many events/congresses
- Many AMR related surveys:
 - 6 EFSA/EMA questions on antibiotic use in food-producing animals and possibly to reduce
 - Colistin

www.fve.org

Regarding ESVAC (1/3)

- Welcomes 5th ESVAC report & ESVAC strategy 2016-2020
- Welcomes intention to supplement sales with consumption data by species/subspecies; while acknowledging this is not easy
- 4 main goals for FVE:
 1. Get all EU/EFTA countries into ESVAC
 2. Ctn work on antimicrobial data collection internationally
 3. Ctn to work on having a robust comparable system on antibiotic use and amr in humans & animals (with some ecosystem indicators?)
 4. Use both data for risk assessment in relation to AMR

www.fve.org

Regarding ESVAC (2/3) ...

- To consider:
 - *Many differences between countries/regions:*
 - ✓ Species/subspecies farmed
 - ✓ Production systems (intensive/extensive)
 - ✓ Climate conditions
 - ✓ Diseases present
 - ✓ Availability of antibiotics but also alternatives or preventive measures
 - *Companion Animals, Rabbits, Turkeys, etc*
 - *Investigate why antibiotic use in some regions/species is higher e.g. no preventive vaccines available, ZnOx not allowed, etc.*

Regarding ESVAC (3/3) ...

- What is the European Parliament asking:

Amendment 162

*“Member States shall collect relevant comparable and sufficiently detailed data, at per-farm level, on the volume of **sales** in terms of weight and cost for each antimicrobial type and the **use** of veterinary antimicrobial medicinal products including the species treated, the disease diagnosed and the route of administration.”*

Regarding ESVAC (3/3) ...

- What is the European Parliament asking:

Amendment 162

Why?

*“Member States shall collect relevant data and sufficiently detailed data, at per-farm level, on the volume of **sales** in terms of weight **and cost** for each antimicrobial type and the **use** of veterinary antimicrobial medicinal products including the species treated, the **disease diagnosed** and the route of administration.”*

Nice, but often differential diagnosis

www.fve.org

Rens van Dobbenburgh – new Chair of EPRUMA

- ✓ EPRUMA – European Platform for Responsible Use of Medicines for Animals
- ✓ Wide coalition of all EU partners in animal health field (Copa-Cogeca, FESASS, IFAH, EGGVP, EMVD, FEFAC, PGEU, EISA, FECAVA, FVE + as associates AMCRA, RUMA, SDa and VETRESPONSABLE)
- ✓ Chair for 3 years

Welcome to the FVE website

The Federation of Veterinarians of Europe (FVE) is an umbrella organisation of veterinary organisations from 36 European countries. We also represent 4 vibrant sections, each of which representing key groups within our profession: Practitioners (UEVP), Hygienists (UEVH), Veterinary State Officers (EASVO) and veterinarians in Education, Research and Industry (EVERI)
