

European Platform for Regulatory science research

A mechanism for dialogue and collaboration between academic, public and non-for-profit researchers and regulatory scientists

- To systematically **advance and accelerate research** addressing regulatory needs
- To refine and enrich regulatory topics with **research interests** and **methods expertise**
- To progress methodological standards and to increase the **quality and relevance** of research outputs for regulatory implementation
- To accelerate **translation of outputs** into improved R&D and regulatory practices
- To support **growth of academic researcher community** engaging on regulatory issues

To avoid background noise, please
mute your **microphones**

For questions during the meeting,
please **submit them via the Q&A
button in Microsoft Teams**

The meeting will be **recorded**, for
note taking purposes

If you would like to speak, please
raise your hand and wait for the
chair to give you the floor. When given
the floor, please first state your name
and affiliation

Platform meetings

Platform topics

Combination of **research needs** and **cross-cutting** topics e.g., on methodology, translation, collaboration, funding

- Starting point: [EMA's Regulatory Science Research Needs](#) (EMA June 2025)
- Your input on the broader research topic that underpins regulatory needs

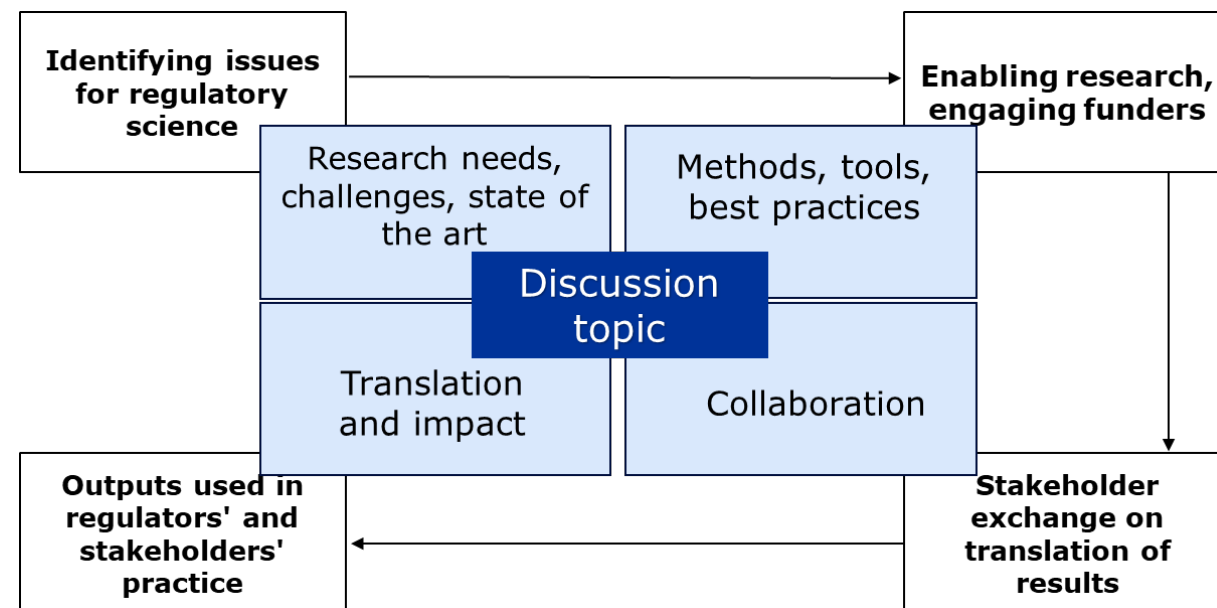

Table 1: Overview on 2024 updated of RSRNs

Sections with Research needs to ...

- | |
|--|
| 2.2. ...improve clinical research |
| 2.3. ...improve regulatory system evolution |
| 2.4. ... foster technologies for development of specific types of medicines |
| 2.5. ... advance specifically animal health and the regulation of veterinary medicines |

Structured discussion approach

Ad hoc working groups and outputs
