MICYRN

Anne Junker, MD Scientific Director

Canada Fast Facts

- 10 M sq km
- 34.5 M people
- 16% aged 0–14y
- 2/3 European descent

Canada Fast Facts

National policies

- Health
- Privacy
- Ethics
- Drug approval

interpreted by 10 provinces and 3 territories and First Nations (federal)

Canada Fast Facts

Provinces control:

- Standards of care
- Drug formulary
- Type of assessments
- Access to health and other data

Incorporates 20 Organizations

Practice-based specialist networks connect 17-22 academic sites

Network Lead =	11																

Strong Partnerships

CCYHC Coalition joins:

National Infant, Child and Youth Mental Health Consortium

Networks capture:

- 70% high risk maternity beds
- all the pediatric tertiary beds
- all NICUs
- all PICU beds
- all specialty clinic practices
- all Ped academic ERs*

MICYRN Strategy at a Glance

Vision

"Better Health for Mothers and Children"

Mission

"Catalyzing advances in maternal and child healthcare by connecting minds and removing barriers to high-quality health research"

Strategies

Forge collaborations in order to encourage exchange of ideas and innovations and achieve economies of scale.

Facilitate multijurisdictional research by addressing national and international barriers to collaboration in order to achieve efficiencies and optimize the investment in research.

Inform best practices in order to a the quality and impact of resea

Thematic Areas

Clinical Trials

DOHaD

Rare Diseases

Tactics

Engaging national and international stakeholders Research Partnerships

Maximizing research outputs Pregnancy/Birth Cohort Coalition: Harmonized data and governance

Creating a coalition of Research Networks
Practice evaluation, learning and
research networks

Ensuring safe and high quality studies of new and existing interventions Clinical Trials Platform

Advancing quality & consistency of ethics review for multi-site studies Research Ethics Platform

Improving data quality, reliability and reporting Clinical Research Informatics Platform Developing evidence-based best-practices Standards and Guidance

Enabling patient input to the rese process and outcome measure Young Persons Advisory

Supporting meaningful outcome quality management and timel uptake of results.

Informatics for Integrating Biology & the Bedside

COMMENTS

- 1. Networking encourages networking (MICYRN & ICN)
- 2. Networks beget networks (?"divide & conquer")
- 3. "Sitting between 2 chairs" (site or PI dilemma to join/stay in USA or EU network or form Canadian network)
- 4. Need to market the value of Networks (ICN)
- Need to ensure physician/site credit for being involved in Networks
