Patient experience data and therapeutic areas Survey

Joint Patients' and Consumers' (PCWP) and Healthcare Professionals' (HCPWP)
Working Parties meeting

27 February 2024

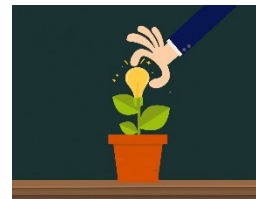

Presented by Rosa Gonzalez-Quevedo

Acknowledgements Claire Espinasse and Friederike Wilke

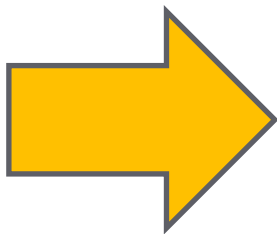

Background information

- PED in the EU network: growing topic, many initiatives
- PED experience seems to vary across therapeutic area
- PED perception / PED awareness seem to vary amongst stakeholders depending on the therapeutic area
- No research in Europe on these particular aspects (that we know of)

Background information

- It was decided to do a **survey** to try and get a clear picture of PED needs among therapeutic areas
- The results can help progress the PED initiative further

Objectives of the survey:

- 1st Objective: To have the **overview** of PED experience in Europe per therapeutic area/diseases from **Key** stakeholders (Patients, Healthcare Professionals, Assessors and Pharmaceutical industry)

(*) Therapeutic area will also cover geriatrics, paediatrics, orphan medicines and pregnancy

- 2nd Objective: to help us identify **potential gaps** and areas of **unmet needs**

Few practical information

- short survey: no more than 10-15 min to complete
- survey to be as consistent as possible for all stakeholder groups (to enable us to compare results amongst the different groups)
- to be disseminated to **all eligible organisations**
- timelines: TBC (launch expected around Q2 2024)
- **looking for a few volunteers (patients and HCPs) today to test the survey ahead of the launch**

Thank you!

Any questions?
