

#### Big Data Veterinary workstream

Overview of 2021 deliverables and plan for 2022

An agency of the European Union

Veterinary Big Data Workstream – how we started in 2020

Veterinary Big Data Workstream - Deliverables 2021

Veterinary Big Data Workstream – how we started in 2020

Veterinary Big Data Workstream – Deliverables 2021

### Vet big data: how we started in 2020!

#### Vet big data: how we started in 2020!

→ Analysis and findings on applicability of new digital technologies and RWD availability in Veterinary regulatory domain was performed and shared with BDSG in December 2020

#### Methodology

Research in literature on "Big Data/RWD in Veterinary medicine"

Define regulatory framework and datalegal boundaries

Analysis of Vet data nature, environment and opportunities

Set the Veterinary business areas

Set vision on implementation strategy

Identify key next steps

Veterinary Big Data Workstream – how we started in 2020

Veterinary Big Data Workstream - Deliverables 2021

# Veterinary Big Data Team - Deliverables 2021 (1)

Report to CVMP on Big Data availability and applicability in Veterinary domain

PRELIMINARY IDEA

# Veterinary Big Data Team – Deliverables 2021 (2)

Report to CVMP on Big Data availability and applicability in Veterinary domain

Additional expert from BVL joined the Vet Big Data Team

KEY RESOURCES

### Veterinary Big Data Team – Deliverables 2021 (3)

Report to CVMP on Big Data availability and applicability in Veterinary domain

1<sup>st</sup> Veterinary Big Data Stakeholder Forum

Additional expert from BVL joined the Vet Big Data Team

PRELIMINARY IDEA

KEY RESOURCES

ENGAGED AND LISTENED TO OUR STAKEHOLDERS

# Summary of the event

- Event run for 1 day and a half
- Organised in 4 sessions
- 8 moderators and 21 speakers
- Average turnout of 300 to 350 attendees
  - > Presentations and videos are available on **EMA** website

# Key conclusions from the Vet Big Data Stakeholder Forum

- 1. Current efforts are focused on Reg. EU 2019/6 (VMP-Reg) implementation
- 2. Big Data is already happening and regulators need to be ready to accept/adsorb digital innovation via participation, cooperation, specialisation and transparency
- 3. Aspects to be addressed include build data mind-set, establish international cooperation forum, determine data governance, funding and resources
- 4. EU Veterinary Big Data strategy proposal to be developed across Vet Reg Network

### EU Veterinary Big Data strategy: why now!

- EMRN and the BDSG take leadership in the implementation of new digital technology with important advancements in Human-specific area
- VMP-Reg facilitated new digital systems which will generate increased amounts of data across the EU

→ It is now to investigate the convergence of traditional systems development with the advancement offered by emerging digital technologies

### Veterinary Big Data Team – Deliverables 2021 (4)

Report to CVMP on Big Data availability and applicability in Veterinary domain

1<sup>st</sup> Veterinary Big Data Stakeholder Forum

Additional expert from BVL joined the Vet Big Data Team

ENGAGED AND LISTENED TO OUR STAKEHOLDERS Draft proposal on EU Veterinary Big Data Strategy shared with HMA

PRELIMINARY IDEA

KEY RESOURCES

CONSOLIDATE FRAMEWORK PROPOSAL

### Draft EU Veterinary Big Data strategy: highlights

**Drivers & Benefits:** For the Vet Network to absorb and embrace the challenges and opportunities that digital transformation offers continue building on the VMP-Reg goals of increase regulatory systems interoperability, reduce administrative and economic burden and enhance consistency, transparency and responsiveness.

**Purpose:** Propose ways forward for identifying relevant (regulatory) use cases, existing and additional data sources, critical infrastructures and methods to ensure an innovation-friendly environment for the development of new veterinary treatments for the benefit animal and human health and well-being.

**Content and scope:** Provide vision and direction for the Vet EU Regulatory Network to set a data framework on how veterinary data resulting from innovative solutions should be managed to support key regulatory activities in the short, medium and long-term phase

Veterinary Big Data Workstream – how we started in 2020

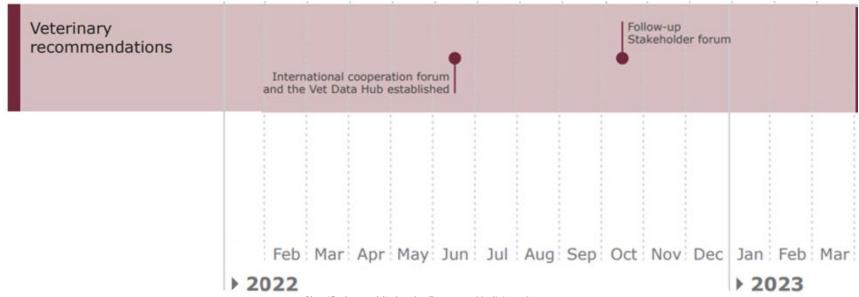

Veterinary Big Data Workstream – Deliverables 2021

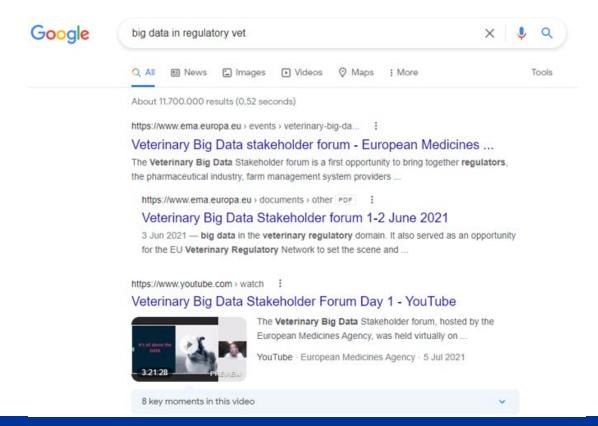

# Ways ahead: 2022 workplan activities

- → EU Vet Big Data Strategy consultation and adoption by HMA in the course of 2022
- → Training curriculum definition to reach all NCAs
- → Possible thematic workshops with NCAs and stakeholders

#### Vet big data end of 2021: where we are today!
