Total GLP-1 supply (A10BJ) in volume (packs) +

Summary

- Communication between authorities and MAHs are crutial
- **S** For dynamic areas, like GLP-1, it is necessary to rationally estimate the future need and development of the market
- **S** MAH must carefully plan production and allocations to avoid shortage more than 2 weeks
- If there is a need to intervene in the functioning of the market, transparency and discussions with learned societies is appropriate
- Our experience shows that timely, targeted and broadly communicated restrictive measures can positively influence market dynamics and improve the availability of medicines
