

THE FUTURE in Oncology Clinical Trials: Patient perspective

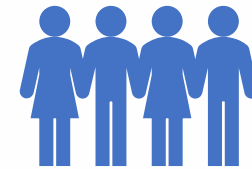

Successful Clinical Trials (CT)

CTs should serve, while preserving the safety of the patients, the innovation that can save lives

More focus and improve the patient's Quality of Life

Represent the real society and produce results adapted to all diverse patients

THE FUTURE in Oncology Clinical Trials: Patient perspective

Milestones

Reach	Reach back percentage of treatments approved from CTs partially or entirely performed in Europe. (41% 2008 – 21% 2023)
Reduce	Reduce the gap and homogenise the access to CTs across Europe.
Achieve	Achieve equal access to CTs for all social groups.
