

EMA – Regulatory Science to 2025

Session 4: Addressing emerging health threats and availability/therapeutic challenges

6 December 2018
Rens van Dobbenburgh

Veterinarians and Medicines (a never ending story)

‘veterinarians should have enough products available to relief animals from suffering and treat infectious diseases’

Therefore:

- availability of medicines and vaccines
- availability includes more than AM only
- emerging diseases need (emergency) vaccines
- bans on AM for animals evidence based
- CIA classification evidence based
- respect differences between areas
