

From your stakeholder group perspective, what is the key feature that the multi-stakeholder platform should have?

Goal of the MSP

Supporting a thriving clinical trial ecosystem in Europe by providing open and transparent communication and collaboration between its key players: sponsors, investigators, ethic committees, regulators, patients. Clear KPIs defined to monitor this goal.

Focus of discussions

Common priorities across the evidence generation continuum: finding common solutions to pain points and driving implementation.

Address current challenges and design the future together: priorities for a future thriving ecosystem.

- 1) Use of innovative methodologies and technologies.
- 2) Risk based approach to regulatory assessments based on proportionality, risk to patient safety and risk to data integrity.
- 3) Legislation and guidance impacting CTs: address challenges linked to their implementation and monitor needs for changes in legislation

Features and principles: 1) Key role for Ad hoc groups and pilots. 2) Shared leadership among stakeholders
