

Industry Points

- **Key User Group**

- Don't de-prioritize RMS/OMS data quality, data governance = criteria for success
- Industry willing to support the KUG (esp. in light of manufacturer data in OMS)

- **PMS Target Operating Model**

- Data quality / trust is key, need the right operating model to enable this
- Industry is not supportive of the continuation of the current Art.57 model with PMS.

- **EU Implementation Guide**

- Industry is supportive of releasing current document "as is" with some caveats and also including an appendix containing all comments
- For V1, industry finds the term "Implementation Guide" confusing (as not implementable)
- Industry willing to support comments resolution

Industry Points

- **EU-SRS Proof of Concept**

- Need transparency on progress and challenges on POC
- Participation of industry as data owner
- If not, re-assign SMS experts to other streams (PMS, EU IG, TOM, KUG...)

- **IDMP/SPOR Program**

- Governance between IDMP and SPOR aspects
- Communication/transparency on IDMP progress
 - Especially outside TF and SGs
 - Including overall timelines towards Go Live
- Expectations in terms of TF/SG/Workshop meetings this year?
 - Request to re-schedule next TF meeting (German holiday on 3rd Oct)
