

The European Agency for the Evaluation of Medicinal Products
Veterinary Medicines and Inspections

London, 9 November 2001
EMEA/CVMP/1027/01

PRESS RELEASE
COMMITTEE FOR VETERINARY MEDICINAL PRODUCTS
71st MEETING

Under the Chairmanship of Mr S. P. Dean the seventy first meeting of the Committee for Veterinary Medicinal Products took place in London on 6-8 November 2001.

CVMP Opinions on Medicinal Products

The Committee unanimously adopted a positive opinion and CVMP assessment report for a Type I variation following a Type II procedure, relating to quality aspects with respect to an immunological product previously assessed under the centralised procedure. The Committee also adopted a positive opinion and CVMP assessment report for a Type II variation relating to a change in the target species for one of the indications with respect to a pharmaceutical product previously assessed under the centralised procedure.

Establishment of Maximum Residue Limits

The Committee unanimously adopted a positive opinion and summary report on the inclusion in Annex II of Council Regulation (EEC) No. 2377/90 of one substance previously included in Annex II for other animal species.

The Committee unanimously adopted 3 positive opinions and summary reports on the inclusion of 3 substances, having provisional MRLs, in Annex I of Council Regulation (EEC) No. 2377/90, and a negative opinion on the establishment of final MRLs, for another substance also having provisional MRLs.

The Committee considered an appeal in respect of a MRL opinion for an extension to another animal species for one substance and upheld the previous decision not to recommend the establishment of MRLs.

	Opinions delivered since 1.1.1995	Applications under evaluation	Applications anticipated within the next 4 months
Centralised procedures	40	14	4
New MRL procedures¹	109²	8	9

¹ Applications submitted to the EMEA after 01.01.1995

² Including 16 Opinions recommending definitive MRLs for substances with previously provisional MRLs

Guidelines, SOPs and Position Papers

The Committee adopted the following final guideline following the end of the consultation period:

- Guideline on the Quality of Water for Pharmaceutical Use (EMEA/CVMP/115/01-FINAL)

The Committee adopted the following guideline for release for consultation:

- Guideline on Use of Near Infra-red Spectroscopy (EMEA/CVMP/961/01-CONSULTATION)

These Guidelines are scheduled to be adopted by the CPMP at its meeting of 11-13 November 2001. Following the adoption of the guidelines by the CPMP, they will be made available on the Website of the EMEA.

Referrals

The Committee considered the referral from one Member State under Article 20 of Council Directive 81/851/EEC regarding a class of nationally authorised products and agreed a list of questions to be sent to the Marketing Authorisation Holders of the existing marketing authorisations in EU Member States.

Pharmacovigilance issues

Periodic Safety Update Reports (PSURs) on 2 centrally authorised products were considered by the Committee. The Committee concluded that the information available did not create a need for further action or changes to the respective Summary of Product Characteristics (SPC).

International Harmonisation

The Committee nominated Dr Eva Johnsson as EU expert to the VICH Safety Working Party.

The Committee adopted the CVMP comments on the VICH guideline regarding the Studies to Evaluate the Safety of residues of Veterinary Drugs in Human Food: Carcinogenicity Testing currently under consultation and after consulting the CVMP Safety Working Party. The comments will be forwarded to the VICH secretariat.

Other issues

The Committee adopted the Work programmes for the Pharmacovigilance Working Party, Efficacy Working Party, Safety Working Party, Immunologicals Working Party and CPMP/CVMP Quality Working Party for 2002-2003. The Work programmes of the working parties will be incorporated in the EMEA Work programme for 2002-2003.

The next meeting of the CVMP will be held on 4-6 December 2001

Peter G.H. Jones

Head, Veterinary Medicines Evaluation Unit
