Procedural announcements

Composition of the new EMEA scientific committees

The composition of the new scientific committees that will meet as from June 2004 will be announced on 1 June 2004 following the conclusion of the Management Board consultation procedure.

The first meeting of the new Committee for Medicinal Products for Human Use (CHMP) will be on 1-3 June 2004. The first meeting of the new Committee for Medicinal Products for Veterinary Use (CVMP) will be on 15-17 June 2004.

Please note that the 11-13 May 2004 CVMP meeting will include the current membership together with two members from each of the 10 new EU Member States. This membership list will be removed after the May CVMP meeting.

The membership list of the old CPMP has been removed from the EMEA web site.

Submission of product information in Maltese

As a consequence of a recent decision by the Council of Ministers, product information will not need to be submitted to the EMEA in the Maltese language.

This follows publication of Council Regulation (EC) No 930/2004 ([OJ L 169, 1.5.2004, p. 1](#)) and applies to all decisions taken by the European Commission. This is a temporary derogation at the request of the Maltese government and is for a transitional period of three years as of 1 May 2004.
