

## Adjupanrix

### Procedural steps taken and scientific information after the authorisation

Application number	Scope	Opinion/ Notification <sup>1</sup> issued on	Commission Decision Issued <sup>2</sup> / amended on	Product Information affected <sup>3</sup>	Summary
R/0062	Renewal of the marketing authorisation.	29/05/2019	31/07/2019		Based on the review of data on quality, safety and efficacy, the CHMP considered that the benefit-risk balance of Adjupanrix in the approved indication remains favourable and therefore recommended the renewal of the marketing authorisation with unlimited validity.
IA/0068	B.I.a.4.a - Change to in-process tests or limits applied during the manufacture of the AS - Tightening of in-process limits	29/07/2019	n/a		

<sup>1</sup> Notifications are issued for type I variations and Article 61(3) notifications (unless part of a group including a type II variation or extension application or a worksharing application). Opinions are issued for all other procedures.

<sup>2</sup> A Commission decision (CD) is issued for procedures that affect the terms of the marketing authorisation (e.g. summary of product characteristics, annex II, labelling, package leaflet). The CD is issued within two months of the opinion for variations falling under the scope of Article 23.1a(a) of Regulation (EU) No. 712/2012, or within one year for other procedures.

<sup>3</sup> SmPC (Summary of Product Characteristics), Annex II, Labelling, PL (Package Leaflet).

IA/0067/G	This was an application for a group of variations.  A.7 - Administrative change - Deletion of manufacturing sites B.II.c.2.b - Change in test procedure for an excipient - Deletion of a test procedure if an alternative test procedure is already authorised	26/07/2019	n/a		
WS/1670	This was an application for a variation following a worksharing procedure according to Article 20 of Commission Regulation (EC) No 1234/2008.  B.II.z - Quality change - Finished product - Other variation	25/07/2019	n/a		
IG/1110	A.7 - Administrative change - Deletion of manufacturing sites	12/07/2019	n/a

IG/0466/G	This was an application for a group of variations.  B.II.e.2.c - Change in the specification parameters and/or limits of the immediate packaging of the finished product - Deletion of a non-significant specification parameter (e.g. deletion of an obsolete parameter)  B.II.e.2.c - Change in the specification parameters and/or limits of the immediate packaging of the finished product - Deletion of a non-significant specification parameter (e.g. deletion of an obsolete parameter)	20/08/2014	n/a		
R/0036	Renewal of the marketing authorisation.	22/05/2014	18/07/2014		Based upon the data that have become available since the granting of the initial Marketing Authorisation, the CHMP considers that the benefit-risk balance of Adjupanrix remains positive, but considers that its safety profile is to be closely monitored for the following reasons: Considering the theoretical possibility that the AS03

					<p>adjuvant or some other vaccine component common to the MAH's pandemic influenza vaccines has a role in the development of narcolepsy, this event is considered a potential risk for Adjuvanrix until data awaited from epidemiological and mechanistic studies allow for further discussion on whether this risk may be applied to AS03-containing products other than Pandemrix H1N1.</p> <p>The CHMP decided that the MAH should continue to submit 1-yearly PSURs.</p> <p>Therefore, based upon the safety profile of Adjuvanrix, which requires the submission of 1-yearly PSURs, the CHMP concluded that the MAH should submit one additional renewal application in 5 years' time.</p>
II/0034	<p>Update of section 4.4 of the SmPC in order to add a warning regarding the observed increased risk of narcolepsy following vaccination with Pandemrix, the MAH's AS03 adjuvanted H1N1 influenza vaccine, based on a review of epidemiologic or post-marketing surveillance. Furthermore, the PI is being brought in line with the latest QRD template version 9.</p> <p>C.I.4 - Change(s) in the SPC, Labelling or PL due to new quality, preclinical, clinical or pharmacovigilance data</p>	26/06/2014	11/06/2015	SmPC, Annex II and PL	<p>Epidemiological studies relating to another AS03-adjuvanted vaccine (Pandemrix H1N1, also manufactured in the same facility as Adjuvanrix), in several European countries have indicated an increased risk of narcolepsy with or without cataplexy in vaccinated as compared with unvaccinated individuals. In children/adolescents (aged up to 20 years), these studies have indicated an additional 1.4 to 8 cases in 100,000 vaccinated subjects. Available epidemiological data in adults aged over 20 years have indicated approximately 1 additional case per 100,000 vaccinated subjects. These data suggest that the excess risk tends to decline with increasing age at vaccination. There is currently no evidence to indicate that Adjuvanrix may be associated with a risk of narcolepsy.</p>
IG/0446	C.I.8.a - Introduction of or changes to a summary of Pharmacovigilance system - Changes in QPPV (including contact details) and/or changes in the PSMF location	24/06/2014	n/a		

II/0035/G	<p>This was an application for a group of variations.</p> <p>Update of sections 4.2 and 5.1 of the SmPC in order to extend up to 12 months the interval between the two doses based on data from study D-PAN-H5N1-012 in adults. In addition some corrections to figures included in section 5.1 of the SmPC were introduced.</p> <p>The Package Leaflet is updated accordingly.</p> <p>C.I.4 - Change(s) in the SPC, Labelling or PL due to new quality, preclinical, clinical or pharmacovigilance data</p> <p>C.I.z - Changes (Safety/Efficacy) of Human and Veterinary Medicinal Products - Other variation</p>	20/03/2014	22/05/2014	SmPC and PL	<p>The data assessed in this group of variations comprise additional efficacy and safety data from adult subjects in Study 012 who received A/Vietnam and were subsequently boosted with A/Vietnam or A/Indonesia at 6 or 12 months. The immune response achieved with boosting at 12 months was comparable to that achieved with boosting at 6 months. This applies to both single and double priming regimens, and cross-protection for heterologous strains. There was no evidence of a waning of the priming effect over the 12 month period. The safety data support the favourable benefit-risk relationship for the regimens studied. The amendments proposed for the SmPC and PL were agreed.</p>
IB/0033/G	<p>This was an application for a group of variations.</p> <p>B.II.f.1.b.5 - Stability of FP - Extension of the shelf life of the finished product - Biological/immunological medicinal product in accordance with an approved stability protocol</p> <p>B.II.f.1.b.5 - Stability of FP - Extension of the shelf life of the finished product - Biological/immunological medicinal product in accordance with an approved stability protocol</p> <p>B.II.d.1.a - Change in the specification parameters and/or limits of the finished product - Tightening of specification limits</p> <p>B.II.d.1.z - Change in the specification parameters and/or limits of the finished product -</p>	06/03/2014	22/05/2014	SmPC and PL

WS/0161/G	<p>This was an application for a group of variations following a worksharing procedure according to Article 20 of Commission Regulation (EC) No 1234/2008.</p> <p>Type II: to update sections 4.6 and 4.8 of the SmPC, with data on experience gained with Pandemrix, as requested by the CHMP in the 4th PSUR assessment for the AS03-adjuvanted H5N1 vaccine Marketing Authorisations. The PL is updated accordingly.</p> <p>1st Type IB: to align the SmPC, labelling and PL texts for Prepandrix and Pandemic duplicate H5N1 licences, with wording present in the Pandemrix</p>	17/11/2011	22/12/2011		<p>The proposed changes to the Product Information, to reflect post marketing experience with Pandemrix in SmPC sections 4.6 and 4.8, and to align the Product Information with wording in the Pandemrix and Pumarix Product Informations were considered acceptable. Wording for SmPC section 6.6 (Special precautions for disposal and other handling) in the paragraphs in points 1 and 7 of 'Instructions for mixing and administration of the vaccine were further revised to add more clarity.</p>

	<p>and Pumarix PI's.</p> <p>2nd Type IB: to align the PL text for Prepandrix and Pandemic duplicate H5N1 licences with wording present in the Arepanrix and Pumarix PLs following readability testing.</p> <p>C.I.z - Changes (Safety/Efficacy) of Human and Veterinary Medicinal Products - Other variation</p> <p>C.I.4 - Variations related to significant modifications of the SPC due in particular to new quality, pre-clinical, clinical or pharmacovigilance data</p> <p>C.I.z - Changes (Safety/Efficacy) of Human and Veterinary Medicinal Products - Other variation</p>				
WS/0153	<p>This was an application for a variation following a worksharing procedure according to Article 20 of Commission Regulation (EC) No 1234/2008.</p> <p>This was an application for a group of variations following a worksharing procedure according to Article 20 of Commission Regulation (EC) No 1234/2008. Update of section 4.4 of the SmPC to include a warning on psychogenic syncope based on the available safety data. The PL was proposed to be updated in accordance. In addition, the company took the opportunity to update the list of local representatives in the PL of Pumarix, Ambirix, Pandemrix, Pandemic influenza vaccine (H5N1) (split virion, inactivated, adjuvanted) GlaxoSmithKline Biologicals, Prepandrix and Fendrix.</p>	17/11/2011	22/12/2011	SmPC and PL	<p>Based on a review of literature and a search in the global safety database performed by the MAH, the CHMP recommended including a wording on psychogenic syncope to the product information of the MAH injectable vaccines. The literature review showed an incidence peak occurred around the age of 15 years, with females having more than twice the incidence of males. The syncope reports with secondary injuries were reported most frequently in children and adolescents.</p> <p>Given that psychogenic syncope is not a true side effect, it was not considered appropriate to include syncope as an undesirable effect in section 4.8 of the SmPC. However, as such events can result in injury, and may not have occurred in the absence of the vaccination, the CHMP recommended to add a reference to such events in section 4.4 'Warning and Precaution' of the SmPC and in the PL.</p>

	C.I.4 - Variations related to significant modifications of the SPC due in particular to new quality, pre-clinical, clinical or pharmacovigilance data				
IG/0133	C.I.9.h - Changes to an existing pharmacovigilance system as described in the DDPS - Other change(s) to the DDPS that does not impact on the operation of the pharmacovigilance system	22/11/2011	n/a

II/0004	<p>To reflect new data obtained from study D-Pan H5N1-009 in section 4.2, 4.4, 4.8 and 5.1 of the SmPC, as well as in the Package Leaflet (sections 3 and 4). This clinical study is conducted in children aged 3 to 9 years, to evaluate the immunogenicity, reactogenicity and safety of three formulations of AS03 adjuvanted H5N1 vaccine, given following a two dose schedule on Days 0 and 21. The MAH is also taking the opportunity of this procedure to update Annex II in order to reflect the wording on the Pharmacovigilance System as requested by CHMP and to include the Marketing Authorisation numbers in the Labelling.</p> <p>C.I.4 - Variations related to significant modifications of the SPC due in particular to new quality, pre-clinical, clinical or pharmacovigilance data</p>	17/03/2011	18/04/2011	SmPC, Annex II, Labelling and PL	<p>Concerning immune response, the D42 HI immune response parameters (SCR, SPR, SCF) did not clearly distinguish any one of the three formulations (Half HA/Half AS03, Full HA/Half AS03, Full HA/Full AS03) tested. However, the administration of a higher HA dose and, especially, the full adult dose, demonstrated advantages in terms of several HI and NA immune parameters. In particular, use of the adult dose gave improved HI responses to the heterologous strain and higher NA GMTs. Concerning safety, the greatest differences between the H5N1 vaccine and control groups in this study were seen when the adult dose was administered. Despite the greater local and general reactogenicity with the adult dose uptake of the second dose was very high and only four subjects did not complete both doses in the entire study. In addition the data do not indicate that higher reactogenicity was associated with SAEs.</p> <p>Overall, a difference in the frequency of adverse reactions between half adult and adult doses was observed after each dose. However, the administration of a second half adult or an adult dose did not enhance the reactogenicity, except for rates of general symptoms which were higher after the</p>

					second adult dose.
IA/0003	B.II.c.1.a - Change in the specification parameters and/or limits of an excipient - Tightening of specification limits	16/12/2010	n/a		
IB/0002	To extend the shelf life of the finished product from 24 months to 36 months at 2-8 degrees. To change in the specification limits for squalene from "not more than 20 ppm" to "not more than 10ppm".  B.II.f.1.b.5 - Stability of FP - Extension of the shelf life of the finished product - Extension of storage period of a biological/immunological medicinal product in accordance with an approved stability protocol	16/07/2010	n/a		
IB/0001	B.I.d.1.a.4 - Stability of AS - Change in the re-test period/storage period - Extension or introduction of a re-test period/storage period supported by real time data	23/06/2010	n/a
