Procedural steps taken and scientific information after the authorisation

Application number	Scope	Opinion/ Notification ¹ issued on	Commission Decision Issued ² / amended on	Product Information affected ³	Summary
IAIN/0010/G	This was an application for a group of variations. B.II.b.2.a - Change to importer, batch release arrangements and quality control testing of the FP - Replacement/addition of a site where batch control/testing takes place B.III.1.a.2 - Submission of a new/updated or deletion of Ph. Eur. Certificate of Suitability to the	25/02/2021		Annex II and PL	

¹ Notifications are issued for type I variations and Article 61(3) notifications (unless part of a group including a type II variation or extension application or a worksharing application). Opinions are issued for all other procedures.

² A Commission decision (CD) is issued for procedures that affect the terms of the marketing authorisation (e.g. summary of product characteristics, annex II, labelling, package leaflet). The CD is issued within two months of the opinion for variations falling under the scope of Article 23.1a(a) of Regulation (EU) No. 712/2012, or within one year for other procedures.

³ SmPC (Summary of Product Characteristics), Annex II, Labelling, PL (Package Leaflet).

PSUSA/10690 /201905	Periodic Safety Update EU Single assessment - glibenclamide (for centrally authorised products only)	16/01/2020	n/a		PRAC Recommendation - maintenance
II/0004	<p>Update of section 4.2 and 5.1 of the SmPC to reconcile posology instructions with the actual use of the product in clinical practice in order to avoid overdosing, to harmonise sections related to "Dosage adjustments and long-term treatment management" and remove reference to the off-label use of crushed tablets. This update is based on recently published literature, the ISPAD consensus guideline, and in line with the NEOGLI CSR.</p> <p>In addition, the applicant took the opportunity to make editorial corrections.</p> <p>C.I.4 - Change(s) in the SPC, Labelling or PL due to new quality, preclinical, clinical or pharmacovigilance data</p>	04/07/2019	03/09/2019	SmPC and PL	<p>Update based on recently published literature, the ISPAD consensus guideline, and in line with the NEOGLI Clinical Study Report.</p> <p>The SmPC section 4.2 has been updated to reconcile posology instructions with the actual use of the product in clinical practice and to improve clarity and readability. The segment "Dosage adjustments and long-term management" is initiated by a new paragraph summarising information on observed average daily doses. In the recommendation for blood glucose and HbA1c monitoring after insulin discontinuation it was added that, once insulin independence is achieved and steady state of glibenclamide is reached, capillary blood glucose does no longer need to be daily monitored except in clinical situations at risk of metabolic unbalance. In all cases, HbA1c must be monitored every three months. Reference to the off-label use of crushed tablets was removed.</p> <p>The SmPC section 5.1 has been updated with reference to the success rate, the average doses, and most recent data.</p>

IA/0005	B.II.d.2.a - Change in test procedure for the finished product - Minor changes to an approved test procedure	16/07/2019	n/a
