

Dengvaxia

Procedural steps taken and scientific information after the authorisation

Application number	Scope	Opinion/ Notification ¹ issued on	Commission Decision Issued ² / amended on	Product Information affected ³	Summary
PSUSA/10740 /202106	Periodic Safety Update EU Single assessment - dengue tetravalent vaccine (live, attenuated)	13/01/2022	n/a		PRAC Recommendation - maintenance
II/0013	Update of sections 4.2 and 5.1 of the SmPC based on final results from study CYD65, listed as a category 3 study in the RMP; this is a Phase II, observer-blind,	11/11/2021	09/12/2021	SmPC and PL	Results of study CYD65 showed no or modest transient increase of neutralizing Ab titers after the booster in dengue immune subjects. Why there is a lack of/limited

¹ Notifications are issued for type I variations and Article 61(3) notifications (unless part of a group including a type II variation or extension application or a worksharing application). Opinions are issued for all other procedures.

² A Commission decision (CD) is issued for procedures that affect the terms of the marketing authorisation (e.g. summary of product characteristics, annex II, labelling, package leaflet). The CD is issued within two months of the opinion for variations falling under the scope of Article 23.1a(a) of Regulation (EU) No. 712/2012, or within one year for other procedures.

³ SmPC (Summary of Product Characteristics), Annex II, Labelling, PL (Package Leaflet).

	<p>placebo-controlled trial in order to assess Immunogenicity and Safety of Tetravalent Dengue Vaccine Given in 1-, 2-, or 3-Dose Schedules Followed by a Single Booster.</p> <p>C.I.4 - Change(s) in the SPC, Labelling or PL due to new quality, preclinical, clinical or pharmacovigilance data</p>				<p>booster effect with Dengvaxia remains not understood in terms of mechanisms and clinical implications. In the absence of immune correlates of protection, whether the absence or modest increases in Ab titers, plasmablasts, and memory B cells, do not translate or could translate in protection against dengue disease, during the first year post-boost or during a longer period, is not known. It was thus considered that the added value and timing for booster dose(s) have not been established.</p> <p>This paragraph was added to the Posology Section of the SmPC: “The added value of and appropriate timing for booster dose(s) have not been established. Current available data are included in section 5.1.”</p> <p>Cross-referred to the following text in Section 5.1: “The effect of a booster dose was assessed in subjects 9-50 years living in endemic areas after a 3-dose schedule (studies CYD63, CYD64, CYD65). No or modest transient increase of neutralizing Ab titers was observed after the boost. The booster effect was variable across serotypes and studies. Why there is a lack/limited booster effect with Dengvaxia remains not understood in terms of mechanisms and clinical implications.”</p> <p>For more information, please refer to the Summary of Product Characteristics.</p>
II/0012	Extension of indication to include paediatric population from 6 years of age for Dengvaxia; as a	11/11/2021	09/12/2021	SmPC and PL	Please refer to Scientific Discussion ‘Dengvaxia -H-C-

	<p>consequence, sections 4.1, 4.2, 4.8 and 5.1 of the SmPC and sections 1, 2 and 4 of the Package Leaflet are updated. Furthermore, the MAH takes the opportunity to add an instruction for the installation of the needle in the SmPC and the Package Leaflet of the single-dose presentation.</p> <p>C.I.6.a - Change(s) to therapeutic indication(s) - Addition of a new therapeutic indication or modification of an approved one</p>				004171-II-0012'.
II/0011	<p>Update of the PI impacting the Therapeutic Indications section to further detail the conditions for the eligibility to pre-vaccination serostatus screening. As a consequence, sections 4.1, 4.2, 4.4 and 5.1 of the SmPC and sections 1, 2 and 3 of the Package Leaflet are updated accordingly.</p> <p>C.I.6.a - Change(s) to therapeutic indication(s) - Addition of a new therapeutic indication or modification of an approved one</p>	11/11/2021	09/12/2021	SmPC and PL	Please refer to Scientific Discussion 'Dengvaxia -H-C-004171-II-0011'.
II/0016/G	<p>This was an application for a group of variations.</p> <p>Update of section 4.5. of the SmPC to include coadministration data on human papillomavirus (HPV) vaccines and tetanus, diphtheria, and pertussis (Tdap) vaccine from CYD67, CYD71 and CYD66 final study reports respectively (final reports from three MEA studies listed as category 3 studies in the RMP); these studies are focused on</p>	02/12/2021		SmPC and PL	<p>Given that the population of indication of Dengvaxia includes preadolescents and adolescents, the MAH conducted three co-administration studies with vaccines used in this age range: human papillomavirus (HPV) vaccines (studies CYD67 and CYD71, respectively) and tetanus, diphtheria, and pertussis (Tdap) vaccine in study CYD66.</p> <p>These studies assessed the immunogenicity and safety</p>

	<p>immunogenicity and safety of the concomitant administration. The Package Leaflet is updated accordingly. In addition, the MAH took the opportunity to update the list of local representatives in the Package Leaflet. The RMP version 6.3 is approved with this variation</p> <p>C.I.4 - Change(s) in the SPC, Labelling or PL due to new quality, preclinical, clinical or pharmacovigilance data</p> <p>C.I.4 - Change(s) in the SPC, Labelling or PL due to new quality, preclinical, clinical or pharmacovigilance data</p> <p>C.I.4 - Change(s) in the SPC, Labelling or PL due to new quality, preclinical, clinical or pharmacovigilance data</p>				<p>following the concomitant administration, compared to sequential administration, of Dengvaxia with the other vaccines. The final clinical study reports for these co-administration Phase III studies were submitted. The results support allowing concomitant administration of Dengvaxia with bivalent HPV, quadrivalent HPV, and Tdap vaccines.</p> <p>Section 4.5 of the Dengvaxia SmPC was updated to reflect the statistical limitation regarding the unmet non-inferiority criteria for the HPV vaccines and Dengvaxia in CYD67 and CYD71 studies. The results of these two studies are appropriately described in the SmPC, as well as those of study CYD66.</p> <p>For more information, please refer to the Summary of Product Characteristics.</p>
IB/0020	B.I.b.1.z - Change in the specification parameters and/or limits of an AS, starting material/intermediate/reagent - Other variation	12/11/2021	n/a		
PSUSA/10740 /202012	Periodic Safety Update EU Single assessment - dengue tetravalent vaccine (live, attenuated)	08/07/2021	n/a		PRAC Recommendation - maintenance
II/0018	Submission of the final report from study DNG10042, listed as a category 3 study in the RMP. This report summarises the findings on the dengue vaccine (Dengvaxia) effectiveness against virologically confirmed symptomatic infection, carried out after the mass vaccination program conducted by the Brazilian state of Paraná from 2016 to 2018.	10/06/2021	n/a
