SCIENCE MEDICINES HEALTH

## Diacomit

### Procedural steps taken and scientific information after the authorisation\*

\*Due to the Agency's update of its procedure management systems, an additional document, reflecting the historical lifecycle may be available in the 'Assessment history' section. For the complete product lifecycle procedures, you may need to also refer to **EPAR - Procedural steps taken and scientific information after authorisation (archive)**.

| Application number         | Scope | Opinion/<br>Notification<br><sup>1</sup> issued on | Commission<br>Decision<br>Issued <sup>2</sup> /<br>amended on | Product<br>Information<br>affected <sup>3</sup> | Summary   |
|----------------------------|-------|----------------------------------------------------|---------------------------------------------------------------|-------------------------------------------------|-----------|
| PSUR / EMA/PSUR/0000248464 | - -   | 19/06/2025                                         | 21/08/2025                                                    | SmPC                                            | Variation |

<sup>1</sup> Notifications are issued for type I variations and Article 61(3) notifications (unless part of a group including a type II variation or extension application or a worksharing application). Opinions are issued for all other procedures.

<sup>2</sup> A Commission decision (CD) is issued for procedures that affect the terms of the marketing authorisation (e.g. summary of product characteristics, annex II, labelling, package leaflet). The CD is issued within two months of the opinion for variations falling under the scope of Article 23.1a(a) of Regulation (EU) No. 712/2012, or within one year for other procedures.

<sup>3</sup> SmPC (Summary of Product Characteristics), Annex II, Labelling, PL (Package Leaflet).

|  |                                                                                                                                                                                                                                                                                                                                                   |  |  |  |  |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|--|
|  | <p>In view of available data on risk from clinical trial(s) and spontaneous reports, the PRAC Rapporteur considers a causal relationship between stiripentol and pneumonia is at least a reasonable possibility. The PRAC Rapporteur concluded that the product information of products containing stiripentol should be amended accordingly.</p> |  |  |  |  |
