

## Glivec

### Procedural steps taken and scientific information after the authorisation

| Application number | Scope   | Opinion/ Notification <sup>1</sup> issued on | Commission Decision Issued <sup>2</sup> / amended on | Product Information affected <sup>3</sup> | Summary |
|--------------------|---|--|--|---|---------|
| IAIN/0116/G        | This was an application for a group of variations.<br><br>B.II.b.1.a - Replacement or addition of a manufacturing site for the FP - Secondary packaging site<br><br>B.II.b.1.b - Replacement or addition of a manufacturing site for the FP - Primary packaging site<br><br>B.II.b.2.a - Change to importer, batch release arrangements and quality control testing of the FP - | 14/08/2019                                   |  | Annex II and PL                           |         |

<sup>1</sup> Notifications are issued for type I variations and Article 61(3) notifications (unless part of a group including a type II variation or extension application or a worksharing application). Opinions are issued for all other procedures.

<sup>2</sup> A Commission decision (CD) is issued for procedures that affect the terms of the marketing authorisation (e.g. summary of product characteristics, annex II, labelling, package leaflet). The CD is issued within two months of the opinion for variations falling under the scope of Article 23.1a(a) of Regulation (EU) No. 712/2012, or within one year for other procedures.

<sup>3</sup> SmPC (Summary of Product Characteristics), Annex II, Labelling, PL (Package Leaflet).

| II/0106 | <p>Update of section 4.8 of the SmPC to update the safety information on the existing ADR 'musculoskeletal pain including myalgia' so as to inform that musculoskeletal pain during treatment with imatinib or after discontinuation has been observed in post-marketing. The Package Leaflet has been updated accordingly. Further, the MAH has taken the opportunity to merge the SmPCs of the different strengths of the same pharmaceutical form i.e. 50 mg and 100 mg hard capsules, and 100 mg and 400 mg film coated tablets, respectively, and to align the annexes with version 10 of the QRD template.</p> <p>C.I.4 - Change(s) in the SPC, Labelling or PL due to new quality, preclinical, clinical or pharmacovigilance data</p> | 10/11/2016 | 08/05/2017 | SmPC, Annex II, Labelling and PL | N/A |

|         |  |            |            |      |  |
|---------|--|------------|------------|------|--|
| II/0103 | <p>Submission of an updated RMP version 11.0 in order to introduce minor administrative changes and updated epidemiological information.</p> <p>C.I.11.b - Introduction of, or change(s) to, the obligations and conditions of a marketing authorisation, including the RMP - Implementation of change(s) which require to be further substantiated by new additional data to be submitted by the MAH where significant assessment is required</p>   | 13/10/2016 | n/a        |      | N/A  |
| II/0104 | <p>Update of section 5.1 of the SmPC, upon request by the CHMP, to reflect the results of Study CSTI571L2401, an observational registry collecting long-term safety and efficacy data in patients with myeloid neoplasms with platelet derived growth factor receptor beta rearrangement (MPN with PDGFRB rearrangement) treated with imatinib mesylate, in fulfilment of the post-authorisation measure MEA 168.8.</p> <p>C.I.13 - Other variations not specifically covered elsewhere in this Annex which involve the submission of studies to the competent authority</p> | 15/09/2016 | 08/05/2017 | SmPC | <p>An observational registry (study L2401) was conducted to collect long-term safety and efficacy data in patients suffering from myeloproliferative neoplasms with PDGFR- <math>\beta</math> rearrangement and who were treated with Glivec. The 23 patients enrolled in this registry received Glivec at a median daily dose of 264 mg (range: 100 to 400 mg) for a median duration of 7.2 years (range 0.1 to 12.7 years). Due to the observational nature of this registry, haematologic, cytogenetic and molecular assessment data were available for 22, 9 and 17 of the 23 enrolled patients, respectively. When assuming conservatively that patients with missing data were non-responders, CHR was observed in 20/23 (87%) patients, CCyR in 9/23 (39.1%) patients, and MR in 11/23 (47.8%) patients, respectively. When the response rate is calculated from patients with at least one valid assessment, the response rate for CHR, CCyR and MR was 20/22 (90.9%), 9/9 (100%) and 11/17 (64.7%), respectively.</p> |
| II/0100 | Submission of the Final Clinical Study Report for Study CSTI571A2403: "A global Gleevec/Glivec and Tasigna   | 15/09/2016 | 08/05/2017 | SmPC | The MAH provided the results of the pregnancy registry CSTI571A2403 with the objective to monitor pregnancies  |

|           |  |            |            |             |   |
|-----------|--|------------|------------|-------------|---|
|           | <p>Pregnancy Exposure Registry" (Category 3).</p> <p>C.I.13 - Other variations not specifically covered elsewhere in this Annex which involve the submission of studies to the competent authority</p> |            |            |             | <p>exposed to imatinib in order to estimate the prevalence of birth defects. An analysis of the scientific literature of pregnancy women treated with imatinib was also provided in the context of this variation. In view of the information gathered, a possible role of imatinib in causing foetal anomalies could not be completely ruled out. Therefore, an update to section 4.6 of the SmPC was agreed to reflect the know information the issue, to read as follows:</p> <p>Women of childbearing potential<br/> Women of childbearing potential must be advised to use effective contraception during treatment.</p> <p>Pregnancy<br/> There are limited data on the use of imatinib in pregnant women. There have been post-marketing reports of spontaneous abortions and infant congenital anomalies from women who have taken Glivec. Studies in animals have however shown reproductive toxicity (see section 5.3) and the potential risk for the foetus is unknown. Glivec should not be used during pregnancy unless clearly necessary. If it is used during pregnancy, the patient must be informed of the potential risk to the foetus.</p> |

| PSUSA/1725/201505 | Periodic Safety Update EU Single assessment - imatinib   | 14/01/2016 | n/a        |             | PRAC Recommendation - maintenance   |
| II/0096           | <p>Update of sections 4.4 and 4.8 of the SmPC in order to include chronic renal failure as an adverse drug reaction and a warning related to renal insufficiency following PRAC recommendation. The Package leaflet is updated accordingly.</p> <p>C.I.4 - Change(s) in the SPC, Labelling or PL due to new quality, preclinical, clinical or pharmacovigilance data</p>   | 26/02/2015 | 14/01/2016 | SmPC and PL | <p>In this variation, the following wording has been added to section 4.4 of the SmPC: "Long-term treatment with imatinib may be associated with a clinically significant decline in renal function. Renal function should, therefore, be evaluated prior to the start of imatinib therapy and closely monitored during therapy, with particular attention to those patients exhibiting risk factors for renal dysfunction. If renal dysfunction is observed, appropriate management and treatment should be prescribed in accordance with standard treatment guidelines."</p> <p>In addition, "renal failure chronic" has been added to section 4.8 of the SmPC and Package Leaflet under a frequency "not known".</p> |
| II/0095           | Update of SmPC section 4.4 to include information about 'Gastric Antral Vascular Ectasia' (GAVE) under the existing warning 'Gastrointestinal haemorrhage', and SmPC section 4.8 to add GAVE as a new ADR. Further, SmPC section 4.8 has been aligned with   | 18/12/2014 | 14/01/2016 | SmPC        | Gastric antral vascular ectasia (GAVE), a rare cause of gastrointestinal haemorrhage, has been reported in post-marketing experience in patients with CML, ALL and other diseases. When needed, discontinuation of Glivec treatment may be considered.  |

|           |   |            |            |                        |  |
|-----------|---|------------|------------|------------------------|--|
|           | <p>current guidelines regarding table layout and estimation of frequencies of adverse reactions. In addition, the MAH took the opportunity to introduce standard text in the SmPC and Package Leaflet regarding additional monitoring in line with the latest QRD templates, and to implement minor editorial changes in the SmPC.</p> <p>C.I.4 - Change(s) in the SPC, Labelling or PL due to new quality, preclinical, clinical or pharmacovigilance data</p> |            |            |                        |  |
| II/0093/G | <p>This was an application for a group of variations.</p> <p>A.1 - To change the address of the marketing authorisation holder, Novartis Europharm Limited, from Wimblehurst Road, Horsham, West Sussex, RH12 5AB, United Kingdom, to Frimley Business Park, Camberley GU16 7SR, United Kingdom.</p> <p>A.1 - Administrative change - Change in the name and/or address of the MAH</p>  | 03/12/2014 | 14/01/2016 | SmPC, Labelling and PL | C.I.4 was withdrawn during the procedure |
| IG/0443   | A.5.b - Administrative change - Change in the name and/or address of a manufacturer/importer of the finished product, including quality control sites (excluding manufacturer for batch release)  | 20/08/2014 | n/a        |                        |  |
| IA/0092   | B.II.d.2.a - Change in test procedure for the finished product - Minor changes to an approved test procedure  | 26/06/2014 | n/a        |                        |  |

|           |   |            |            |                       |  |

| IAIN/0091 | B.II.a.1.a - Change or addition of imprints, bossing or other markings including replacement, or addition of inks used for product marking - Changes in imprints, bossing or other markings   | 19/06/2014 | 18/07/2014 | SmPC and PL           |  |
| II/0090   | <p>Update of section 4.8 of the SmPC in order to include the term "Drug rash with eosinophilia and systemic symptoms" (DRESS) under the SOC Skin and subcutaneous disorders with a frequency of unknown further to the PRAC request following the assessment of a cumulative review of cases of DRESS. The Package Leaflet was proposed to be updated accordingly.</p> <p>Furthermore, the MAH took the opportunity of this variation to add and correct information in the PL to bring it in line with the SmPC. Editorial changes were also proposed to the SmPC.</p> <p>C.I.3.z - Change(s) in the SPC, Labelling or PL intended to implement the outcome of a procedure concerning PSUR or PASS or the outcome of the assessment done under A 45/46 - Other variation</p> | 24/10/2013 | 18/07/2014 | SmPC and PL           | A cumulative safety review of cases of DRESS reported in patients treated with Glivec was conducted by the MAH following the PRAC request further to the assessment of the PSUR covering the period 11 May 2009 to 10 May 2012. The MAH retrieved 12 cases of DRESS. Three of the reported cases had a positive re-challenge (patients re-experienced the reaction after reintroduction of Glivec). Three cases showed a positive de-challenge (patient recovering after drug withdrawal). In one case the DRESS was confirmed with a skin biopsy. The section 4.8 of the SmPC was therefore updated to add DRESS as an adverse drug reaction. |
| II/0089   | <p>Update of section 5.3 of the SmPC in order to reflect the results of a juvenile development toxicology study. In addition, the MAH took the opportunity to reflect in the PL the adverse drug reaction of "bleeding in the eyes" which was already listed in section 4.8 of the SmPC and update the list of local representatives in the Package Leaflet.</p> <p>Furthermore, the PI is being brought in line with the latest QRD template version 9.0.</p>  | 25/07/2013 | 18/07/2014 | SmPC, Annex II and PL | The Applicant submitted results of juvenile toxicity studies which did not show new target organs than those previously identified. In the juvenile toxicology study, effects upon growth, delay in vaginal opening and preputial separation were observed at approximately 0.3 to 2 times the average paediatric exposure at the highest recommended dose of 340 mg/m <sup>2</sup> . In addition, mortality was observed in juvenile animals (around weaning phase) at approximately 2 times the average paediatric exposure at the highest   |

|           |   |            |            |                       |  |
|-----------|---|------------|------------|-----------------------|--|
|           | C.I.4 - Variations related to significant modifications of the SPC due in particular to new quality, pre-clinical, clinical or pharmacovigilance data   |            |            |                       | recommended dose of 340 mg/m2.<br>Section 5.3 of the SmPC was updated to reflect this new information. |
| II/0080   | <p>Extension of the indication for the treatment of paediatric patients with newly diagnosed Philadelphia chromosome positive acute lymphoblastic leukaemia (Ph+ALL) integrated with chemotherapy.</p> <p>Consequently, the MAH proposed the update of sections 4.1, 4.2, 4.8, 5.1, 5.2 and 5.3 of the SmPC. The Package Leaflet was updated in accordance.</p> <p>Furthermore, the MAH proposed this opportunity to bring the PI in line with the latest QRD template version 9.</p> <p>C.I.6.a - Change(s) to therapeutic indication(s) - Addition of a new therapeutic indication or modification of an approved one</p> | 30/05/2013 | 27/06/2013 | SmPC, Annex II and PL | Please refer to Scientific Discussion Glivec-H-406-II-80-VAR.  |

|---------|---|------------|------------|-------------|--|
| II/0085 | <p>Update of sections 4.2 and 5.1 of the SmPC in order to reflect paediatric data related to rare diseases. The Package Leaflet was proposed to be updated accordingly.</p> <p>C.I.4 - Variations related to significant modifications of the SPC due in particular to new quality, pre-clinical, clinical or pharmacovigilance data</p>                      | 15/11/2012 | 27/06/2013 | SmPC and PL | <p>As part of the PIP on the rare diseases conditions (myelodysplastic/myeloproliferative diseases (MDS/MPD) associated with platelet-derived growth factor receptor (PDGFR) gene re-arrangements, hypereosinophilic syndrome (HES) and/or chronic eosinophilic leukaemia (CEL) with FIP1L1-PDGFR<math>\alpha</math> rearrangement, Kit (CD 117)-positive gastrointestinal stromal tumours (GIST) and dermatofibrosarcoma protuberans (DFSP)), the MAH was required to submit a report on the extrapolation of efficacy from adult to paediatric patients including a complete evaluation of adult and paediatric data on disease pathophysiology in the adult versus the paediatric population, available safety, dose/PK exposure, dose/efficacy, PK exposure-efficacy data in children treated with imatinib in these rare diseases indications, and a review of published cases in the literature. The efficacy data reported in paediatric subjects appear to be replicating the adults' outcomes, for all indications but GIST. However, the level of evidence available cannot support a new indication. As an outcome of the review of this application, the CHMP agreed to the update of sections 4.2 and 5.1 of the SmPC. The PL is updated accordingly.</p> |
| II/0084 | <p>Update of section 4.8 undesirable effects of the SmPC in order to include the term subdural haematoma with the CIOMS frequency of "uncommon". The Package Leaflet is updated accordingly.</p> <p>C.I.4 - Variations related to significant modifications of the SPC due in particular to new quality, pre-clinical, clinical or pharmacovigilance data</p> | 15/11/2012 | 27/06/2013 | SmPC and PL | <p>Following the review of 9 cases of subdural hematoma (SDH) in study STI571, the MAH updated the SmPC to include SDH as an adverse drug reaction in section 4.8 undesirable effects of the SmPC. The PL is updated accordingly.</p>  |

| II/0059 | <p>This type II variation concerns an update of section 4.8 of the SmPC to include palmoplantar erythrodysesthesia syndrome as a post-marketing adverse reaction further to the CHMP request following the assessment of PSUR 10. The Package leaflet has been updated accordingly. In addition, the MAH proposed further improvements to the Package Leaflet and took into account results from a user consultation. Furthermore, the MAH updated the list of local representatives in the Package Leaflet. The MAH also took the opportunity to update the Product information in line with the latest QRD template (version 7.3).</p> <p>Update of Summary of Product Characteristics and Package Leaflet</p> | 18/02/2010 | 26/03/2010 | SmPC, Annex II, Labelling and PL | "Palmoplantar erythrodysesthesia syndrome" was a new signal identified during the period covered by PSUR-10 (11 May 2008 - 10 May 2009). A cumulative review included 10 cases, two of them with positive rechallenge. The CHMP concluded that this reaction should be added in section 4.8 "Undesirable effects" of the SmPC as a post-marketing adverse reaction with a frequency "not known". This information has also been included in section 4 "Possible side effects" of the Package Leaflet, coded with not known frequency: "Reddening and/or swelling on the palms of the hands and soles of the feet which may be accompanied by tingling sensation and burning pain". |
| II/0058 | <p>Update of the Detailed Description of the Pharmacovigilance system (DDPS) to version 8.0, including a change of the Qualified Person for Pharmacovigilance (QPPV). Consequently, Annex II has been updated with the new version number of the agreed DDPS.</p> <p>Changes to QPPV<br/>Update of DDPS (Pharmacovigilance)</p>  | 18/02/2010 | 26/03/2010 | Annex II                         | With this variation the MAH submitted a new version of the DDPS (core version 8.0 and product specific version 4.0) in accordance with the current Pharmacovigilance guideline. After assessing the documentation, the CHMP concluded that the submitted DDPS contained all required elements.   |

| II/0050 | <p>Update of section 5.1 of the SPC concerning an efficacy update based on the availability of a 84 month data analysis from the pivotal phase III study (CSTI571A0106) in newly diagnosed CML patients. This variation also fulfills the MAH follow-up measure (FUM 128) related to the submission of the annual update of this clinical study, including molecular results.</p> <p>Update of Summary of Product Characteristics</p>  | 19/03/2009 | 29/04/2009 | SmPC        | <p>Updated efficacy results based on the availability of a 84 month data analysis from the pivotal phase III study (CSTI571A0106) in newly diagnosed CML patients were evaluated. The results regarding the primary endpoint are positive. The outcomes appear to be very similar in regard to the last update (at 72 months). The response remains durable. No new relevant safety concerns have been raised.</p>  |
| II/0049 | <p>Update to section 4.2 to the posology for HES/CEL and update of the information on distribution in human milk under section 4.6, addition of Rhabdomyolysis, myopathy, Acute Generalized Exanthematous Pustulosis, ovarian haemorrhage, hemorrhagic ovarian cyst under section 4.8 and update of the information on overdose under section 4.9 of the SPC. The Package Leaflet has been updated accordingly. Furthermore, the SPC and Package Leaflet have been updated according to the latest QRD template.</p> <p>Update of Summary of Product Characteristics and Package Leaflet</p> | 19/03/2009 | 29/04/2009 | SmPC and PL | <p>A number of investigators have shown that all patients with hypereosinophilic syndrome (HES) and/or chronic eosinophilic leukaemia (CEL) that have reduced or discontinued the treatment with Glivec have experienced a haematological or molecular relapse. As a consequence, section 4.2 "Posology and Method of administration" was updated to include a statement:<br/>Treatment should be continued as long as the patient continues to benefit.</p> <p>The MAH submitted two recent publications on the distribution of imatinib and its major metabolite, CGP 74588, into breast milk in lactating women. However, since the effects of low-dose exposure of the infant to imatinib are unknown, women taking imatinib should not breast feed. Section 4.8 of the SPC "Undesirable Effects" was updated with the addition of rhabdomyolysis, myopathy, Acute Generalized Exanthematous Pustulosis, ovarian haemorrhage, hemorrhagic ovarian cyst.</p> <p>The information update on imatinib overdose under section 4.9 of the information of the SPC was updated.</p> |
