Procedural steps taken and scientific information after the authorisation

Application number	Scope	Opinion/ Notification ¹ issued on	Commission Decision Issued ² / amended on	Product Information affected ³	Summary
PSUSA/10388 /202404	Periodic Safety Update EU Single assessment - empagliflozin, empagliflozin / metformin	12/12/2024	10/02/2025	SmPC	<ul style="list-style-type: none">In view of available data on the risk of “necrotizing fasciitis of the perineum (Fournier’s gangrene)” from the literature and spontaneous reports of Fournier’s gangrene reported in non-diabetic population and in view of a plausible mechanism of action, the PRAC considers that there is sufficient evidence to justify an amendment of the

¹ Notifications are issued for type I variations and Article 61(3) notifications (unless part of a group including a type II variation or extension application or a worksharing application). Opinions are issued for all other procedures.

² A Commission decision (CD) is issued for procedures that affect the terms of the marketing authorisation (e.g. summary of product characteristics, annex II, labelling, package leaflet). The CD is issued within two months of the opinion for variations falling under the scope of Article 23.1a(a) of Regulation (EU) No. 712/2012, or within one year for other procedures.

³ SmPC (Summary of Product Characteristics), Annex II, Labelling, PL (Package Leaflet).

					<p>product information in order to indicate that this ADR can occur irrespective of the indication. The PRAC concluded that the product information of products containing empagliflozin should be amended accordingly.</p> <ul style="list-style-type: none"> • In view of the available data on phimosis from spontaneous reports and the plausible mechanism of action, PRAC considers there is sufficient evidence to justify an amendment of the product information to highlight that genital infections may result in phimosis that can require circumcision. The PRAC concluded that the product information of products containing empagliflozin should be amended accordingly. • In view of the available data on haematocrit increased/polycythaemia from the literature and spontaneous reports and the plausible mechanism of action, the PRAC considers there is sufficient evidence to justify an amendment of section 4.4 of the SmPC to reflect that patients with pronounced elevations in haematocrit should be monitored and investigated for underlying haematological disease. The PRAC concluded that the product information of products containing empagliflozin should be amended accordingly. • In view of the available data on prolonged ketoacidosis and prolonged glucosuria from the literature and spontaneous reports, the PRAC considers there is sufficient evidence to justify an amendment of section 4.4 of the SmPC related to the warning on ketoacidosis to indicate that ketoacidosis may be prolonged after discontinuation of empagliflozin in some patients. The PRAC concluded that the product information of products
--	--	--	--	--	---

					containing empagliflozin should be amended accordingly.

PSUSA/10388 /201610	Periodic Safety Update EU Single assessment - empagliflozin, empagliflozin / metformin	18/05/2017	19/07/2017	SmPC and PL	Refer to Scientific conclusions and grounds recommending the variation to terms of the Marketing Authorisation(s)' for PSUSA/10388/201610.
WS/1173	This was an application for a variation following a worksharing procedure according to Article 20 of Commission Regulation (EC) No 1234/2008. B.I.a.1.z - Change in the manufacturer of AS or of a starting material/reagent/intermediate for AS - Other variation	13/07/2017	n/a		
II/0026	C.I.13 - Other variations not specifically covered elsewhere in this Annex which involve the submission of studies to the competent authority	22/06/2017	n/a		Comparison between refeeding with glucose or fat" in non-diabetic rats showed that treatment with empagliflozin resulted in a modest and transient burst of ketone in the blood according to the fat contained in the diet at re-feeding, after a fasting period. These findings in animals did not warrant changes to the SmPC.
II/0025	C.I.13 - Other variations not specifically covered elsewhere in this Annex which involve the submission	22/06/2017	n/a		Study 1245.22 is a non-interventional drug utilisation study to assess the characteristics of patients initiating

	of studies to the competent authority				empagliflozin treatment and evaluate the potential off-label use. In the study period of over 1 year, all empagliflozin initiators were older than 18 years and had at least 1 diagnostic code for diabetes mellitus. No use of empagliflozin was observed during pregnancy or breast-feeding. Overall, the use of empagliflozin was in accordance with the approved indication, only 1 case of off-label use in Type 1 diabetes mellitus was detected. Results from this study did not warrant amendments to the approved SmPC.
