

KOGENATE Bayer

Procedural steps taken and scientific information after the authorisation

Application number	Scope	Opinion/ Notification ¹ issued on	Commission Decision Issued ² / amended on	Product Information affected ³	Summary
IB/0205/G	This was an application for a group of variations. A.7 - Administrative change - Deletion of manufacturing sites B.I.z - Quality change - Active substance - Other variation B.II.z - Quality change - Finished product - Other variation B.II.b.2.a - Change to importer, batch release	16/04/2018	n/a		

¹ Notifications are issued for type I variations and Article 61(3) notifications (unless part of a group including a type II variation or extension application or a worksharing application). Opinions are issued for all other procedures.

² A Commission decision (CD) is issued for procedures that affect the terms of the marketing authorisation (e.g. summary of product characteristics, annex II, labelling, package leaflet). The CD is issued within two months of the opinion for variations falling under the scope of Article 23.1a(a) of Regulation (EU) No. 712/2012, or within one year for other procedures.

³ SmPC (Summary of Product Characteristics), Annex II, Labelling, PL (Package Leaflet).

	arrangements and quality control testing of the FP - Replacement/addition of a site where batch control/testing takes place				
IG/0908	B.V.a.1.d - PMF - Inclusion of a new, updated or amended PMF in the marketing authorisation dossier of a medicinal product. (PMF 2nd step procedure) - Inclusion of an updated/amended PMF when changes do not affect the properties of the FP	07/03/2018	n/a		
WS/1319/G	This was an application for a group of variations following a worksharing procedure according to Article 20 of Commission Regulation (EC) No 1234/2008. B.I.b.2.a - Change in test procedure for AS or starting material/reagent/intermediate - Minor changes to an approved test procedure B.I.b.2.e - Change in test procedure for AS or starting material/reagent/intermediate - Other changes to a test procedure (including replacement or addition) for the AS or a starting material/intermediate	18/01/2018	n/a		
WS/1317/G	This was an application for a group of variations following a worksharing procedure according to Article 20 of Commission Regulation (EC) No 1234/2008. A31/0185	<p>Pursuant to Article 31 of Directive 2001/83/EC, Germany initiated a procedure on 6 July 2016 based on concerns resulting from the evaluation of data from pharmacovigilance activities.</p> <p>The PRAC was requested to assess the potential impact of the results of the SIPPET study (which concluded that recombinant factor VIII medicines had a higher incidence of inhibitor development than plasma-derived medicines), and to issue a recommendation as to whether the marketing authorisations of these products should be maintained, varied, suspended or revoked. The EMA concluded in September 2017 that there is no clear and consistent evidence of a difference in the incidence of inhibitor development between the two classes of factor VIII medicines: those derived from plasma and those made by recombinant DNA technology. Due to the different characteristics of individual products within the two classes, EMA concluded that the risk of inhibitor development</p>	14/09/2017	16/11/2017	SmPC and PL	Please refer to the assessment report: human coagulation factor VIII - EMEA/H/A-31/1448

	should be evaluated individually for each medicine, regardless of class. The risk for each product will continue to be assessed as more evidence becomes available.				
IG/0822	B.V.a.1.d - PMF - Inclusion of a new, updated or amended PMF in the marketing authorisation dossier of a medicinal product. (PMF 2nd step procedure) - Inclusion of an updated/amended PMF when changes do not affect the properties of the FP	14/07/2017	n/a		
IG/0806	B.V.a.1.d - PMF - Inclusion of a new, updated or amended PMF in the marketing authorisation dossier of a medicinal product. (PMF 2nd step procedure) - Inclusion of an updated/amended PMF when changes do not affect the properties of the FP	31/05/2017	n/a

A20/0150	Pursuant to Article 20 of Regulation (EC) No. 726/2004, the European Commission requested the Agency to re-evaluate the benefit-risk balance of Kogenate Bayer and Helixate Nexgen in light of newly available data on the increased risk of inhibitor development in previously untreated patients compared with other factor VIII products and to give	19/12/2013	20/02/2014	SmPC and PL	Please refer to the assessment report: EMA/H/C/000275/A-20/0150

	<p>its opinion on whether the marketing authorisation in the approved indication should be maintained, varied, suspended or revoked.</p> <p>The PRAC considered the publication of the results of the RODIN/PedNet study, the preliminary findings from the European Haemophilia Safety Surveillance System (EUHASS) registry and all available data submitted from clinical trials, observational studies, published literature and quality data for Kogenate Bayer and Helixate NexGen with regards to its potential risk of inhibitor development in previously untreated patients (PUPs).</p> <p>The PRAC noted that the efficacy of Kogenate Bayer/Helixate NexGen is not questioned and, on the basis of the available data, concluded that the current results do not confirm an increased risk of developing antibodies against Kogenate Bayer and Helixate NexGen when compared with other factor VIII products in PUPs with the bleeding disorder haemophilia A.</p> <p>The PRAC considered though that the frequency for inhibitor development in PUPs should be amended from "common" to "very common" in the section 4.8 of the SmPC and also recommended that the product information should be updated to reflect the most recent results from the RODIN study</p>				
IG/0385	B.V.a.1.d - PMF - Inclusion of a new, updated or amended PMF in the marketing authorisation dossier of a medicinal product. (PMF 2nd step procedure) -	18/12/2013	n/a		

	Inclusion of an updated/amended PMF when changes do not affect the properties of the FP				
WS/0463	<p>This was an application for a variation following a worksharing procedure according to Article 20 of Commission Regulation (EC) No 1234/2008.</p> <p>PMF Second step procedure</p> <p>B.V.a.1.b - PMF - Inclusion of a new, updated or amended PMF in the marketing authorisation dossier of a medicinal product. (PMF 2nd step procedure) - First-time inclusion of a new PMF NOT affecting the properties of the FP</p>	18/12/2013	n/a		
WS/0458	<p>This was an application for a variation following a worksharing procedure according to Article 20 of Commission Regulation (EC) No 1234/2008.</p> <p>Submission of the final study report of the Leopold I study and its extension. The study was a two-part, randomised, cross-over, open-label trial to evaluate the pharmacokinetics, efficacy and safety profile of a novel formulation plasma protein-free recombinant FVIII in previously treated subjects with severe haemophilia A under prophylaxis therapy. The study compared the novel formulation with the existing one of Kogenate Bayer/Helixate NexGen and was submitted under Art. 46 of the paediatric Regulation EC/1901/2006.</p> <p>C.I.13 - Other variations not specifically covered</p>	21/11/2013	n/a		The MAH submitted paediatric data for the marketed product KOGENATE Bayer from the Leopold I study in accordance with Article 46 of Regulation (EC) No 1901/2006. The PK analyses included the determination of BAY 81-8973, an investigational product, and KOGENATE Bayer. A lower AUC and t1/2 was observed for both drugs as a result of a higher clearance in the paediatric population. Section 4.2 of the SmPC already contains information on long term prophylaxis against bleeding in younger patients with severe haemophilia A, where it is suggested to have shorter dose intervals or higher doses. This information is consistent with the PK results from the study. Safety and tolerability were consistent with the known profile. No new safety concerns were identified. No changes to the product information in relation to the data submitted were considered necessary.

	elsewhere in this Annex which involve the submission of studies to the competent authority				
WS/0449	<p>This was an application for a variation following a worksharing procedure according to Article 20 of Commission Regulation (EC) No 1234/2008.</p> <p>Submission of the final report of a single dose, open-label, randomized, crossover study in subjects with severe or moderate Haemophilia A to compare the bioavailability of 2 different strengths of Kogenate FS (BAY 14-2222). The CHMP considered that no update to the product information was required.</p> <p>C.I.13 - Other variations not specifically covered elsewhere in this Annex which involve the submission of studies to the competent authority</p>	21/11/2013	n/a		As part the post-marketing commitment following the approval of the 3000 IU strength, the MAH submitted the final report of a single dose, open-label, randomized, crossover study in subjects with severe or moderate Hemophilia A to compare the bioavailability of 2 different strengths of Kogenate FS (BAY 14-2222). No new safety concerns were identified and tolerability was consistent with the other strengths of the product. Thus, no changes to the product information were considered necessary. The CHMP considers the obligation to perform a bioequivalence study for the 3000 IU strength fulfilled.
WS/0427/G	<p>This was an application for a group of variations following a worksharing procedure according to Article 20 of Commission Regulation (EC) No 1234/2008.</p> <p>Update of section 4.4 of the SmPC to include a warning on cardiovascular risk in haemophilic patients following two reports of myocardial infarction which occurred after administration of Kogenate Bayer/Helixate NexGen in patients with haemophilia A. The Package Leaflet is updated accordingly. Additional changes are made throughout the SmPC to bring it in line with the core SmPC for human plasma derived and recombinant coagulation</p>	19/09/2013	20/02/2014	SmPC, Annex II, Labelling and PL	Haemophilic patients with cardiovascular risk factors or diseases may be at the same risk to develop cardiovascular events as non-haemophilic patients when clotting has been normalized by treatment with FVIII. Elevation of FVIII levels following administration, in particular with existing cardiovascular risk factors, might put a patient at least into the same risk for vessel closure or myocardial infarction as for the non-haemophilic population. Consequently, patients should be evaluated and monitored for cardiac risk factors.

	<p>factor VIII products. Furthermore, the PI is being brought in line with the latest QRD template version 9.0.</p> <p>C.I.3.a - Implementation of change(s) requested following the assessment of an USR, class labelling, a PSUR, RMP, FUM/SO, data submitted under A 45/46, or amendments to reflect a Core SPC - Changes with NO new additional data are submitted by the MAH</p> <p>C.I.4 - Variations related to significant modifications of the SPC due in particular to new quality, pre-clinical, clinical or pharmacovigilance data</p>

	<p>Commission Regulation (EC) No 1234/2008.</p> <p>To introduce a change in a buffer used in the manufacture of active substance.</p> <p>B.I.a.2.c - Changes in the manufacturing process of the AS - The change refers to a [-] substance in the manufacture of a biological/immunological medicinal product and is not related to a protocol</p>				
IG/0244	<p>B.V.a.1.d - PMF - Inclusion of a new, updated or amended PMF in the marketing authorisation dossier of a medicinal product. (PMF 2nd step procedure) - Inclusion of an updated/amended PMF when changes do not affect the properties of the FP</p>	12/12/2012	n/a		
IG/0242	<p>C.I.z - Changes (Safety/Efficacy) of Human and Veterinary Medicinal Products - Other variation</p>	28/11/2012	n/a		
WS/0289	<p>This was an application for a variation following a worksharing procedure according to Article 20 of Commission Regulation (EC) No 1234/2008.</p> <p>Update of section 4.8 of the SmPC with the deletion of reference to only "one" anaphylactic reaction, as more than one anaphylactic reaction report have been received. No new frequency was assigned to the ADR term 'hypersensitivity'. No changes have been proposed for the PL.</p> <p>C.I.4 - Variations related to significant modifications of the SPC due in particular to new quality, pre-</p>	20/09/2012	23/10/2012	SmPC	<p>The MAH reviewed cases of anaphylactic reactions from CIOMS case report forms. There were three cases that were assessed as "severe" or "life-threatening". The MAH updated section 4.8 of the SmPC to reflect the additional cases of anaphylactic reactions.</p>

	clinical, clinical or pharmacovigilance data				
WS/0274	<p>This was an application for a variation following a worksharing procedure according to Article 20 of Commission Regulation (EC) No 1234/2008.</p> <p>The MAH updated section 6 of the SmPC and section 3 of the Package Leaflet (PL) in order to enhance the language with regards to the preparation and reconstitution of the product and to emphasize the use of appropriate filtration prior to administration of the product. A minor editorial change was also introduced in the PL.</p> <p>C.I.4 - Variations related to significant modifications of the SPC due in particular to new quality, pre-clinical, clinical or pharmacovigilance data</p>	20/09/2012	23/10/2012	SmPC and PL	Following the review of complaints concerning the appearance of particulate matter present in the vial from the Bio-Set reconstitution device, the cause was identified as stemming from the sterile Bio-Set assembly or sterile rubber stopper particles which could occur during the coring process when the sterile Bio-Set needle “cores” through the rubber stopper. The MAH implemented corrective actions through better wording in the SmPC and PL to reinforce the guidance on the preparation, reconstitution and appropriate filtering prior to administration of the product.
IB/0144	B.I.b.2.e - Change in test procedure for AS or starting material/reagent/intermediate - Other changes to a test procedure (including replacement or addition) for the AS or a starting material/intermediate	17/10/2012	n/a		
IG/0187/G	<p>This was an application for a group of variations.</p> <p>B.V.a.1.d - PMF - Inclusion of a new, updated or amended PMF in the marketing authorisation dossier of a medicinal product. II/0061	Update of Summary of Product Characteristics, Labelling and Package Leaflet	20/09/2007	30/10/2007	SmPC, Annex II, Labelling and PL	The MAH applied for a type II variation to update section 4.8 of the SPC with information on inhibitor development. The following wording was agreed with the CHMP: "In clinical studies, KOGENATE Bayer has been used in the treatment of bleeding episodes in 37 previously untreated patients (PUPs) and 23 minimally treated pediatric patients (MTPs, defined as having equal to or less than 4 exposure days). Five out of 37 (14%) PUP and 4 out of 23 (17%) MTP patients treated with KOGENATE Bayer developed inhibitors: Overall 6 out of 60 (10%) with a titer above 10 BU and 3 out of 60 (5%) with a titer below 10 BU. The median number of exposure days at the time of inhibitor detection in these patients was 9 days (range 3 - 18 days). The median number of exposure days in the clinical studies was 114 (range: 4-478). Four of the five patients, who had not achieved 20 exposure days at the end of the study,

					<p>ultimately achieved more than 20 exposure days in post-study follow-up and one of them developed a low titer inhibitor. The fifth patient was lost to follow-up.</p> <p>In clinical studies with 73 previously treated patients (PTP, defined as having more than 100 exposure days), followed over four years, no de-novo inhibitors were observed.</p> <p>In extensive post-registration studies with KOGENATE Bayer, involving more than 1000 patients the following was observed: Less than 0.2% PTP developed de-novo inhibitors. In a subset defined as having less than 20 exposure days at study entry, less than 11% developed de-novo inhibitors."</p> <p>The Package leaflet has been updated accordingly.</p> <p>In addition, the Product Information has been updated to comply with the QRD template (version 7.2) and to include minor editorial and linguistic changes. The list of local representatives has also been updated.</p> <p>The MAH applied for a type II variation, upon request from the CHMP following a class review of recombinant Factor VIII medicinal products, to update section 4.4 of the SPC to include a warning on c</p>

II/0058	Update of Summary of Product Characteristics and Package Leaflet	21/06/2007	24/07/2007	SmPC and PL	The MAH applied for a type II variation, upon request from the CHMP following a class review of recombinant Factor VIII medicinal products, to update section 4.4 of the SPC to include a warning on cases of inhibitors as follows:

					<p>'Cases of recurrence of inhibitors (low titre) have been observed after switching from one recombinant factor VIII product to another in previously treated patients with more than 100 exposure days who have a history of inhibitor development.'</p> <p>The Package Leaflet has been updated accordingly.</p>
