Scientific conclusions and grounds for the variation to the terms of the marketing authorisation(s)

Active substance(s): dolutegravir / abacavir / lamivudine

Procedure No. EMEA/H/C/PSUSA/00010075/202301

Period covered by the PSUR: 17/01/2021 To: 16/01/2023

Scientific conclusions

Taking into account the PRAC Assessment Report on the PSUR(s) for dolutegravir, dolutegravir / abacavir / lamivudine, dolutegravir / lamivudine, the scientific conclusions of PRAC are as follows:

In view of available data on cardiovascular events from the literature regarding abacavir, including a plausible mechanism of action, the PRAC considers that the warnings and precautions for use of products containing abacavir need to be revised to adequately reflect the current level of information on cardiovascular events and, in line with the current therapeutic guidelines, that a recommendation discouraging the use of abacavir containing products in patients with high cardiovascular risk should also be included in the product information. The PRAC concluded that the product information of products containing abacavir as is the case of Triumeq (dolutegravir / abacavir / lamivudine) should be amended accordingly.

Having reviewed the PRAC recommendation, the CHMP agrees with the PRAC overall conclusions and grounds for recommendation.

Grounds for the variation to the terms of the marketing authorisation(s)

On the basis of the scientific conclusions for dolutegravir, dolutegravir / abacavir / lamivudine, dolutegravir / lamivudine the CHMP is of the opinion that the benefit-risk balance of the medicinal product(s) containing dolutegravir / abacavir / lamivudine is unchanged subject to the proposed changes to the product information.

The CHMP recommends that the terms of the marketing authorisation of Triumeq should be varied.
