24

DRAFT

25 **Executive summary**

26 This guideline describes the information to be included in the Summary of Products Characteristics
27 (SmPC), Labelling and Package Leaflet for Advanced Therapy Medicinal Products (ATMPs) containing
28 genetically modified cells.

29 **1. Introduction (background)**

30 The purpose of this core SmPC, Labelling and Package Leaflet (hereby referred to as core SmPC) is to
31 provide applicants and regulators with harmonised guidance on the information to be included in the
32 Product Information (PI) of ATMPs containing genetically modified cells.

33 **2. Scope**

34 This core SmPC only covers medicinal products containing genetically modified cells, allogeneic or
35 autologous, including viral vector modified and genome edited cells.

36 Examples for Chimeric Antigen Receptor T (CAR-T) cells and Cluster of Differentiation 34+ (CD34+)
37 modified cells are given in more detail. These can be used as model wording for other types of
38 genetically modified cells.

39 **3. Legal basis**

40 This guideline should be read in conjunction with Article 11 and Annex V of Directive 2001/83/EC as
41 amended, and Annexes II, III and IV of Regulation 1394/2007 on ATMPs. The guideline on SmPC and
42 QRD product information templates and other reference documents should be read in the context of
43 this guideline.

44 **4. Glossary of terms and abbreviations**

45	A	cell surface structures e.g. CD19, BCMA
46	Aph ID	apheresis identification number
47	ATMP	advanced therapy medicinal product
48	B	co-stimulatory domain e.g. CD28
49	C	signalling domain e.g. CD3-zeta
50	COI ID	chain of identity identification number
51	DIN	donor identification number
52	DOB	date of birth
53	JOIN	nomenclature for lot number
54	LIS	lot information sheet
55	n	a number of cells indicating dose or dose range
56	RfIC	release for infusion certificate

57 T temperature

ANNEX I
SUMMARY OF PRODUCT CHARACTERISTICS

DRAFT

135 <▼ This medicinal product is subject to additional monitoring. This will allow quick identification of
136 new safety information. Healthcare professionals are asked to report any suspected adverse reactions. See
137 section 4.8 for how to report adverse reactions.>
138

139 1. NAME OF THE MEDICINAL PRODUCT

140
141 [The strength should be expressed on the basis of the general term ‘cells’, which in this section is
142 considered to define cells which contribute to the therapeutic effect.

143
144 e.g. CAR-T cells = total number of viable transduced cells

145 e.g. total number of CD34+ cells including the transduced cells: in addition to the therapeutic effect of the
146 progeny of genetically modified stem/progenitor cells, the hematopoietic and immune reconstitution of the
147 whole population is clinically relevant.

148
149 The specific cell type contributing to the therapeutic effect should be specified in section 2 of the SmPC,
150 and in section 1 of Annex IIIA and IIIB in brackets beside the INN.

151
152 In those cases where there are two types of cells responsible for the therapeutic effect the strengths should
153 be separated by a slash ‘/’ as would be done for a fixed dose combination product
154 e.g. {X} $\geq 4 \times 10^6$ cells / $\geq 4.5 \times 10^6$ cells dispersion for infusion.

155
156 In line with the SmPC guideline, for containers where content is **delivered in full**, with no additional
157 preparation step which would warrant a calculation of the cells on the basis of the volume, *the total
158 amount in the container(s) (total use) would be the most meaningful expression.*

159
160 For containers where content may not be delivered in full and **calculation of total number of cells based
161 on volume** may be needed, or dose is calculated on the basis of patient body weight, it would be more
162 meaningful to express the strength on the basis of the **amount per volume (partial use).**

163
164 The term ‘container’ is understood as the ‘immediate’ container e.g. infusion bag, vial..etc.]

165
166 {(Invented) name strength pharmaceutical form}

167 [No ® ™ symbols included here and throughout the text; “cells” and “viral genomes” in plural.]
168
169

170 2. QUALITATIVE AND QUANTITATIVE COMPOSITION

171
172 [A detailed description of the cells or tissues contained in the product and their specific origin shall be
173 provided, including the species of animal in cases of non-human origin. The following sub-headings shall
174 be included:]

175 2.1 General description

176
177
178 [For CAR-T cell products the following wording should be included:]
179

180 {X} {<(INN)><(common name)>} is a genetically modified <autologous><allogeneic> cell-based
181 product containing T cells <transfected><transduced><edited> *ex vivo* using a <{name of editing
182 method}><{type of vector}> expressing an anti-**{A}** chimeric antigen receptor (CAR) comprising a
183 <murine><human> <anti-**{A}**> single chain variable fragment (scFv) linked to **{B}** co-stimulatory domain
184 and **{C}** signalling domain>.

185
186 [For CD34+ cell products the following wording should be included:]
187

188 {X} {<(INN)><(common name)>} is a genetically modified autologous CD34+ cell enriched population

189 that contains haematopoietic stem <and progenitor> cells (HS<P>C) <transduced><edited> *ex vivo* using
190 a <{name of editing method}> <{type of vector}> expressing the {gene name} <gene>.

191

192 **2.2 Qualitative and quantitative composition**

193

194 [Explanatory illustrations may be included, if necessary.

195

196 In cases where the quantitative information may vary between individual patient batches, separate
197 batch/patient specific documentation should accompany the product e.g. Lot information sheet (LIS)
198 or Release for infusion certificate (RfIC). The placement of this document should be mentioned in
199 section 2.2.]

200

201 [For CAR-T cell products the following wording should be included:]

202

203 Each patient-specific {container} of {X} contains <{(INN)}><(common name)> at a batch-dependent
204 concentration of <autologous><allogeneic>T cells genetically modified to express an anti-{A} chimeric
205 antigen receptor (CAR-positive viable T cells). The medicinal product is packaged in one or more
206 {container(s)} overall containing a cell <{pharmaceutical form}> of {n} [dose or dose range]
207 CAR-positive viable T cells suspended in a <cryopreservative> solution.

208

209 Each {container} contains {volume} of {pharmaceutical form}.

210

211 <The quantitative information of medicinal product, including the number of {containers} (see section 6)
212 to be administered, is presented in the <Lot information sheet (LIS)><Release for infusion certificate
213 (RfIC)> located <inside the lid of the cryoshipper used for transport>>.

214

215 [For CD34+ cell products the following wording should be included:]

216

217 Each patient-specific {container} of {X} contains <{(INN)}><(common name)> at a batch-dependent
218 concentration of genetically modified autologous CD34+ cell enriched population. The medicinal product
219 is packaged in one or more {container(s)} overall containing a {pharmaceutical form} of {n} [total amount
220 of cells/mL or range of cells/mL] of viable CD34+ enriched cell population suspended in a
221 <cryopreservative> solution.

222

223 Each {container} contains {volume} of {X}.

224

225 <The quantitative information of medicinal product, including the number of {containers} (see section 6)
226 to be administered, is presented in the <Lot information sheet (LIS)><Release for infusion certificate
227 (RfIC)> located <inside the lid of the cryoshipper used for transport>>.

228

229

230 <Excipient(s) with known effect:>

231

232 [Cryopreservative content should be listed here.]

233

4.1 Therapeutic indications

[Product specific]

4.2 Posology and method of administration

Posology

[For CAR-T cell products the following wording should be included:]

Treatment consists of a <single><multiple> dose(s) for infusion containing a {pharmaceutical form}> of CAR-positive viable T cells in <one><or more> {container(s)}.

The target dose is {total amount of cells per dose} CAR-positive viable T cells within a range of {n} [dose or dose range] CAR-positive viable T cells. See the accompanying <Lot information sheet (LIS)><Release for infusion certificate (RfIC)> for additional information pertaining to dose.

[For CD34+ cell products the following wording should be included:]

Treatment consists of a <single><multiple> dose(s) for infusion containing a {pharmaceutical form} of viable CD34+ cells in <one><or more> {container(s)}.

The minimum recommended dose of {X} is {n} CD34+ cells/kg.

In clinical studies, doses up to {n} CD34+ cells/kg have been administered.

See the accompanying < Lot information sheet (LIS)>< Release for infusion certificate (RfIC)> for additional information pertaining to dose.

The dose of {X} should be determined on the patient's body weight at the time of infusion.

Paediatric population

Method of administration

[Product specific]

For detailed instructions on preparation, administration, accidental exposure and disposal of {X}, see section 6.6.

4.3 Contraindications

<Hypersensitivity to the active substance(s) or to any of the excipients listed in section 6.1 <or {name of the residue(s)}>.>

4.4 Special warnings and precautions for use

[The order of warnings and precautions should in principle be determined by the importance of the safety information provided and the chronology of their occurrence.]

Traceability

The traceability requirements of cell-based advanced therapy medicinal products must apply. To ensure traceability the name of the product, the batch number and the name of the treated patient should be kept for a period of 30 years after expiry date of the product.

298 <Autologous use

299

300 {X} is intended solely for autologous use and should under no circumstances be administered to other
301 patients. {X} must not be administered if the information on the product labels <and><lot information
302 sheet><release for infusion certificate> <do><does> not match the patient's identity.>

303

304 <Transmission of an infectious agent

305

306 Although {X} is tested for sterility <and mycoplasma>, a small risk of transmission of infectious agents
307 exists. Healthcare professionals administering {X} should, therefore, monitor patients for signs and
308 symptoms of infections after treatment and treat appropriately, if needed.>

309

310 <Blood, organ, tissue and cell donation

311

312 Patients treated with {X} should not donate blood, organs, tissues and cells for transplantation. <This
313 information is provided in the Patient <Alert> Card which should be given to the patient after treatment.>

314

315 [Statements on screening for HBV, active HIV and active HCV should be included, when relevant.

316

317 For products containing a cryopreservant (e.g. DMSO) when administered, please include the following
318 statement:]

319

320 <Hypersensitivity reactions

321

322 Serious hypersensitivity reactions, including anaphylaxis, may be due to <cryopreservant> [e.g. dimethyl
323 sulfoxide (DMSO)] in {X}.>

324

325 [If patients are expected to enrol in a post-authorisation registry or registry based study to understand the
326 long-term safety and efficacy of the product, include the following statement.]

327

328 <Long-term follow-up

329

330 Patients are expected to be enrolled in a <registry><long-term follow-up scheme> in order to better
331 understand the long-term safety and efficacy of {X}.>

332

333 <Paediatric population>

334

335 4.5 Interaction with other medicinal products and other forms of interaction

336

337 <No interaction studies have been performed.>

338

339 [Please consider including the following statement as applicable:]

340

341 <Live vaccines

342

343 The safety of immunisation with live viral vaccines during or following treatment with {X} has not been
344 studied. Vaccination with live viral vaccines is not recommended <for at least 6 weeks><{specified
345 time}> prior to the start of <conditioning regimens><lymphodepleting chemotherapy >, during {X}
346 treatment, and until <immune><haematological> recovery following treatment.>

347

348 <Paediatric population>

349 <Interaction studies have only been performed in adults.>

350

351 4.6 Fertility, pregnancy and lactation

352

353 <Pregnancy>
354 <Breast-feeding>
355 <Fertility>

357 4.7 Effects on ability to drive and use machines

358
359 <{(Invented) name}> has <no or negligible influence> <minor influence> <moderate influence> <major
360 influence> on the ability to drive and use machines.> [describe effects where applicable.]

361
362 <Not relevant.>

364 4.8 Undesirable effects

365
366 [Immunogenicity must be addressed in the subsection “Description of selected adverse reactions”. Data
367 from clinical studies should be summarised in this subsection.]

368
369 <Paediatric population>

371 Reporting of suspected adverse reactions

372 Reporting suspected adverse reactions after authorisation of the medicinal product is important. It allows
373 continued monitoring of the benefit/risk balance of the medicinal product. Healthcare professionals are
374 asked to report any suspected adverse reactions via the national reporting system listed in [Appendix V](#)*.

375
376 [*For the printed material, please refer to the guidance of the annotated QRD template.]

378 4.9 Overdose

379
380 <Paediatric population>

383 5. PHARMACOLOGICAL PROPERTIES

385 5.1 Pharmacodynamic properties

386
387 Pharmacotherapeutic group: {group}, ATC code: <{code}> <not yet assigned>

388
389 <Mechanism of action>

390 <Pharmacodynamic effects>

391 <Clinical efficacy and safety>

392 <Paediatric population>

393

394 [If the European Medicines Agency has waived or deferred a paediatric development, the information
395 should be given as follows:]

396
397 [For waivers applying to all subsets:]

398 <The European Medicines Agency has waived the obligation to submit the results of studies with
399 <{(Invented) name}> in all subsets of the paediatric population in {condition as per paediatric
400 investigation plan (PIP) decision, for the granted indication} (see section 4.2 for information on paediatric
401 use).>

402
403 [For deferrals applying to at least one subset:]

404 <The European Medicines Agency has deferred the obligation to submit the results of studies with
405 {(Invented) name}> in one or more subsets of the paediatric population in {condition as per paediatric
406 investigation plan (PIP) decision, for the granted indication} (see section 4.2 for information on paediatric
407 use).>

408
409 [For medicinal products approved under “conditional approval”, include the following statement:]
410 <This medicinal product has been authorised under a so-called ‘conditional approval’ scheme.
411 This means that further evidence on this medicinal product is awaited.
412 The European Medicines Agency will review new information on this medicinal product at least every
413 year and this SmPC will be updated as necessary.>

414
415 [For medicinal products approved under “exceptional circumstances”, include the following
416 statement:]
417 <This medicinal product has been authorised under ‘exceptional circumstances’.
418 This means that <due to the rarity of the disease> <for scientific reasons> <for ethical reasons> it has
419 not been possible to obtain complete information on this medicinal product.
420 The European Medicines Agency will review any new information which may become available every
421 year and this SmPC will be updated as necessary.>

422 **5.2 Pharmacokinetic properties**

423
424
425 <Absorption>
426 <Distribution>
427 <Biotransformation>
428 <Elimination>
429 <Linearity/non-linearity>
430 <Pharmacokinetic/pharmacodynamic relationship(s)>
431

432 **5.3 Preclinical safety data**

433
434 <Non-clinical data reveal no special hazard for humans based on conventional studies of safety
435 pharmacology, repeated dose toxicity, genotoxicity, carcinogenic potential, toxicity to reproduction
436 and development.>

437
438 <Effects in non-clinical studies were observed only at exposures considered sufficiently in excess of
439 the maximum human exposure indicating little relevance to clinical use.>

440
441 <Adverse reactions not observed in clinical studies, but seen in animals at exposure levels similar to
442 clinical exposure levels and with possible relevance to clinical use were as follows:>

443
444 <Environmental risk assessment (ERA)>
445 [Not applicable for medicinal products containing genetically modified cells.]
446

447 **6. PHARMACEUTICAL PARTICULARS**

448 **6.1 List of excipients**

449
450
451
452 [The excipients should be listed in the language of the text, expressed qualitatively only. Preservative
453 systems should also be described.]
454

455 <None.>
456

457 **6.2 Incompatibilities**

458
459 <Not applicable.>
460

461 <In the absence of compatibility studies, this medicinal product must not be mixed with other
462 medicinal products.>

463
464 <This medicinal product must not be mixed with other medicinal products except those mentioned in
465 section <6.6> <and> <12>.>

466 467 **6.3 Shelf life**

468
469 [Information on the finished product shelf life and on the in-use stability after thawing and/or
470 reconstitution/dilution should appear here. Only one overall shelf life for the finished product is to be
471 given even if different components of the product may have a different shelf life.]

472
473 <...> <6 months> <...> <1 year> <18 months> <2 years> <30 months> <3 years> <...>

474 475 **6.4 Special precautions for storage**

476
477 [For storage condition statements, see [Appendix III.](#)]

478 [General storage conditions of the finished medicinal product should appear here, together with a
479 cross-reference to section 6.3 where appropriate.

480
481 As an example, for frozen cell products the following wording could be included:]

482
483 <{X} must be stored in <the vapour phase of liquid nitrogen $\{(\leq - \{T\} \text{ }^\circ\text{C})\}$ ><...> and must remain
484 frozen until the patient is ready for treatment to ensure viable cells are available for patient administration.
485 Do not re-freeze after thawing.>

486
487 <For storage conditions after <thawing><reconstitution><dilution> of the medicinal product, see
488 section 6.3.>

489 490 491 **6.5 Nature and contents of container <and special equipment for use, administration or 492 implantation>**

493
494 [Explanatory illustrations may be included, if necessary.]

495
496 <Not all pack sizes may be marketed.>

497 498 **6.6 Special precautions for disposal and other handling**

499
500 [Instructions for the transport, handling and preparation prior to administration, thawing, administration,
501 disposal and accidental exposure should be included:]

502
503 Precautions to be taken before handling or administering the medicinal product

504
505 <{X} should be transported within the facility in closed, break-proof, leak-proof containers.>

506
507 This medicinal product contains human <blood> cells. Healthcare professionals handling {X} should take
508 appropriate precautions (wearing <gloves><protective clothing><and><eye protection>) to avoid
509 potential transmission of infectious diseases.

510
511 [Information to verify prior to administration e.g. number of infusions bags, volume to be infused, patient
512 identity, breaches of integrity etc. should be included]

513
514 Preparation prior to administration

515
516 [If applicable, the thawing process must be detailed in full in the following section:]

517

518 <Thawing>

519

520 Administration

521

522 Precautions to be taken for the disposal of the medicinal product

523 Unused medicinal product and all material that has been in contact with {X} (solid and liquid waste)
524 should be handled and disposed of as potentially infectious waste in accordance with local guidelines on
525 handling of human-derived material.

526

527 Accidental exposure

528 In case of accidental exposure local guidelines on handling of human-derived material should be followed.
529 Work surfaces and materials which have potentially been in contact with {X} must be decontaminated
530 with appropriate disinfectant.

PARTICULARS TO APPEAR ON <THE OUTER PACKAGING> <AND> <THE IMMEDIATE PACKAGING>
{NATURE/TYPE}

1. NAME OF THE MEDICINAL PRODUCT

[A description of the type of cell as per section 2 of the SmPC should be included in this section beside the INN in brackets e.g. (CAR + viable T cells) or (CD34+ cells)]
{(Invented) name strength pharmaceutical form}
{active substance(s)}

2. STATEMENT OF ACTIVE SUBSTANCE(S)

[Where the advanced therapy medicinal product contains cells or tissues, the statement “This medicine contains cells of human/animal {as appropriate} origin” together with a short description of these cells or tissues and of their specific origin, including the species of animal in cases of non-human origin should be included.]
This medicine contains cells of <human> <animal> origin.

3. LIST OF EXCIPIENTS

[Preservative systems should be described.]

4. PHARMACEUTICAL FORM AND CONTENTS

5. METHOD AND ROUTE(S) OF ADMINISTRATION

Read the package leaflet before use.

6. SPECIAL WARNING THAT THE MEDICINAL PRODUCT MUST BE STORED OUT OF THE SIGHT AND REACH OF CHILDREN

Keep out of the sight and reach of children.

7. OTHER SPECIAL WARNING(S), IF NECESSARY

[In the case of advanced therapy medicinal products for autologous use, the unique patient identifier and the statement “For autologous use only” shall be included.]
<For autologous use only.>

8. EXPIRY DATE

[The expiry date may specify the day, or day and time for non-cryopreserved products.]

B. PACKAGE LEAFLET

[NOTE: The following items which must appear in the package leaflet are listed in Annex IV of Regulation (EC) 1394/2007.

Guidance notes in orange cross-refer to the section/information of the SmPC which is to be reflected in that particular section of the package leaflet.]

966 **Package leaflet: Information for the <patient> <user>**

967 **{(Invented) name strength pharmaceutical form}**
968 **{active substance(s)}**

969 [A description of the type of cell as per section 2 of the SmPC should be included in this section beside
970 the INN in brackets e.g. (CAR + viable T cells) or (CD34+ cells)]

971 < ▼ This medicine is subject to additional monitoring. This will allow quick identification of new
972 safety information. You can help by reporting any side effects you may get. See the end of section
973 4 for how to report side effects. > [For medicinal products subject to additional monitoring
974 ONLY]

975 < **Read all of this leaflet carefully before you start <taking> <using> this medicine because
976 it contains important information for you.**

- 977 - Keep this leaflet. You may need to read it again.
- 978 - If you have any further questions, ask your <doctor> <,> <or> <pharmacist> <or nurse>.
- 979 <- This medicine has been prescribed for you only. Do not pass it on to others. It may harm
980 them, even if their signs of illness are the same as yours.> [Do not include this statement in
981 case of hospital use.]
- 982 - If you get any side effects, talk to your <doctor> <,> <or> <pharmacist> <or nurse>.
983 This includes any possible side effects not listed in this leaflet. See section 4.>

984 **What is in this leaflet**

- 985 1. What X is and what it is used for
- 986 2. What you need to know before you <receive><are given> X
- 987 3. How X is given
- 988 4. Possible side effects
- 989 5. How to store X
- 990 6. Contents of the pack and other information

991 **1. What X is and what it is used for**

992 [(Invented) name, active substance(s) and pharmacotherapeutic group]

993 [Therapeutic indications]

994 [If appropriate, specify that:

- 995 - if the medicine is an advanced therapy medicine which contains cells or tissues, a description
996 of those cells or tissues and of their specific origin, including the species of animal in cases of non-
997 human origin, should be provided in line with section 2.1 of the SmPC.
- 998 - if the medicine is an advanced therapy medicine which contains medical devices or active
999 implantable medical devices, a description of those devices and their specific origin should be
1000 provided in line with section 2.2 of the SmPC.]

1001 [Information on the benefits of using this medicine]

1002 <You must talk to a doctor if you do not feel better or if you feel worse <after {number of} days>.>

1003 **2. What you need to know before you <receive> <are given> X**

1020 [Contraindications]
1021 **Do not <take> <use> X**
1022 - <if you are allergic to {active substance(s)} or any of the other ingredients of this medicine (listed
1023 in section 6).>

1024
1025 [Appropriate precautions for use; special warnings]
1026 **Warnings and precautions**
1027 Talk to your doctor <or> <,> <pharmacist> <or nurse> before <taking> <using> X
1028

1029 [All warnings and precautions for use included in section 4.4 of the SmPC should be provided here (as
1030 in the SmPC, the order should be in principle determined by the importance of safety information
1031 provided) and it should also be made clear for each warning or precaution for use, what action the
1032 patient should take to minimise the potential risk. In the case of advanced therapy products containing
1033 genetically modified cells the order will also be determined by the chronology of occurrence of the
1034 adverse drug reaction.]

1035
1036 **Children <and adolescents>**
1037

1038 [Interactions with other medicines]
1039 **Other medicines and X**
1040 <Tell your <doctor> <or> <pharmacist> if you are <taking> <using>, have recently <taken> <used> or
1041 might <take> <use> any other medicines.>

1042
1043 [Interactions with food and drink]
1044 **X with <food> <and> <,> <drink> <and> <alcohol>**
1045

1046 [Use by pregnant or breast-feeding women, information on fertility]
1047 **Pregnancy <and> <,> breast-feeding <and fertility>**
1048 <If you are pregnant or breast-feeding, think you may be pregnant or are planning to have a baby, ask your
1049 <doctor> <or> <pharmacist> for advice before taking this medicine.>

1050
1051 [Effects on the ability to drive or to use machines]

1053

1054 [Excipients warnings]
1055 **<X contains {name the excipient(s)}>**
1056

1057
1058 **3. How X is given**
1059

1060 [Dose (SmPC section 4.2)]
1061
1062 <The recommended dose is...>
1063

1064 **<Use in children <and adolescents>>**
1065

1066 [Route(s) and/or method of administration (SmPC section 4.2)]
1067
1068 **< Other medicines you will be given before X>**
1069

1070 **<How X is given>**
1071

1072 **<After X is given>**
1073

1074 **<If you <are given> more X than you should>**

1075 <If you miss an appointment>
1076
1077 < Call your doctor or the treatment centre as soon as possible to make another appointment.>

1078 [Duration of treatment (SmPC section 4.2)]

1080
1081 <If you stop <taking> <using> X>

1082 <If you have any further questions on the use of this medicine, ask your <doctor> <,> <or> <pharmacist>
1083 <or nurse>.>

1084

1085

1086 4. Possible side effects

1087

1088 [Description of side effects]

1089 [Begin this section with]

1090 Like all medicines, this medicine can cause side effects, although not everybody gets them.

1091

1092 <Additional side effects in children <and adolescents>>

1093

1094 Reporting of side effects

1095 If you get any side effects, talk to your <doctor> <or> <,> <pharmacist> <or nurse>. This includes any
1096 possible side effects not listed in this leaflet. You can also report side effects directly via the national
1097 reporting system listed in [Appendix V](#).* By reporting side effects you can help provide more information
1098 on the safety of this medicine.

1099

1100 [*For the printed materials: No reference to Appendix V should be included in the printed materials.
1101 The above grey-shaded terms will only appear in the published version of the approved product
1102 information annexes on the European Medicines Agency website. The actual details of the national
1103 reporting system (as listed in Appendix V) of the concerned Member State(s) shall be displayed on the
1104 printed version.

1105

1106

1107 5. How to store X

1108

1109 Keep this medicine out of the sight and reach of children.

1110

1111 [Expiry date]

1112 [The expiry date may specify the day, or day and time for non-cryopreserved products.]

1113 Do not use this medicine after the expiry date which is stated on the <label> <carton> <bottle> <...>

1114 <after {abbreviation used for expiry date}.>

1115

1116 [Storage conditions]

1117 [Information should be in accordance with section 6.4 of the SmPC; for storage conditions statements see
1118 [Appendix III](#).]

1119

1120 [Where applicable, shelf life after reconstitution, dilution or after first opening the container]

1121 [Information should be in accordance with section 6.3 of the SmPC; please also refer to “Note for
1122 Guidance on Maximum Shelf Life for Sterile Products for Human Use after First Opening or Following
1123 Reconstitution” (CPMP/QWP/159/96/corr).]

1124

1125 [Where appropriate, warnings against certain visible signs of deterioration]

1126 <Do not use this medicine if you notice {description of the visible signs of deterioration}.>

1127

1128

1129 6. Contents of the pack and other information

- 1130
1131 [Full statement of the active substance(s) and excipient(s)]
1132 **What X contains**
1133 - The active substance(s) is (are)..
1134 - The other <ingredient(s)> <(excipient(s))> is (are)... [A cross-reference to section 2 “X contains
1135 {name of the excipients}” should be included when applicable.]
1136

1137 This medicine contains genetically modified human <blood> cells.
1138

1139 [Pharmaceutical form, nature and contents of container in weight, volume or units of dose]

1140 **What X looks like and contents of the pack**
1141

1142 [Name and address of the MAH and of the manufacturer responsible for batch release, if different]

1143 **Marketing Authorisation Holder and Manufacturer**

1152 **This leaflet was last revised in** <{MM/YYYY}><{month YYYY}>.

1153
1154 **[For medicines approved under “conditional approval”, include the following statement:]**

1155 <This medicine has been given ‘conditional approval’.

1156 This means that there is more evidence to come about this medicine.

1157 The European Medicines Agency will review new information on this medicine at least every year and
1158 this leaflet will be updated as necessary.>

1159
1160 **[For medicines approved under “exceptional circumstances”, include the following statement:]**

1161 <This medicine has been authorised under ‘exceptional circumstances’.

1162 This means that <because of the rarity of this disease> <for scientific reasons> <for ethical reasons> it
1163 has been impossible to get complete information on this medicine.

1164 The European Medicines Agency will review any new information on this medicine every year and
1165 this leaflet will be updated as necessary.>

1166
1167 **<Other sources of information>**

1168 Detailed information on this medicine is available on the European Medicines Agency web site:

1169 <http://www.ema.europa.eu><, and on the website of {name of Member State Agency (link)}>.* <There
1170 are also links to other websites about rare diseases and treatments.> **[the last part of the statement is
1171 applicable to orphan medicines only.]**

1172
1173 **[*This statement is optional and it is only to be displayed on the final printed materials. It will not be
1174 included in the product information annexes as applicants may choose to include it for one or more
1175 Member States but not for all of them.]**

1176
1177 **[For medicines having been granted an exemption of having English only package leaflet according to Art
1178 63 of Directive 2001/83/EC, the following statement translated in all EU/EEA languages should be
1179 included here:**

1180 <This leaflet is available in all EU/EEA languages on the European Medicines Agency website.>
1181 **this information should appear prominently in the printed material.]**

1182
1183 -----

1184
1185 The following information is intended for healthcare professionals only:
1186

1187 [Instructions for the transport, handling and preparation prior to administration, thawing, administration,
1188 disposal and accidental exposure should be included as in section 6.6 of the SmPC:]
1189

1190 Precautions to be taken before handling or administering the medicinal product
1191

1192 <{X}> should be transported within the facility in closed, break-proof, leak-proof containers.>
1193

1194 This medicinal product contains human <blood> cells. Healthcare professionals handling {X} should take
1195 appropriate precautions (wearing <gloves><protective clothing><and><eye protection>) to avoid
1196 potential transmission of infectious diseases.
1197

1198 [Information to verify prior to administration e.g. number of infusions bags, volume to be infused, patient
1199 identity, breaches of integrity etc.]
1200

1201 Preparation prior to administration
1202

1203 [If applicable, the thawing process must be detailed in full in the following section:]
1204

1205 <Thawing>
1206

1207 Administration
1208

1209 Precautions to be taken for the disposal of the medicinal product

1210 Unused medicinal product and all material that has been in contact with {X} (solid and liquid waste)
1211 should be handled and disposed of as potentially infectious waste in accordance with local guidelines on
1212 handling of human-derived material.
1213

1214 Accidental exposure

1215 In case of accidental exposure local guidelines on handling of human-derived material should be followed.
1216 Work surfaces and materials which have potentially been in contact with {X} must be decontaminated
1217 with appropriate disinfectant.
